Please treat this as a recommendation letter for my vendor Custom ComTek as the COO of an AAM accredited museum. I know what a dependable vendor means and all the qualities that a vendor must possess can be found in the operations of Custom ComTek, they are extremely professional when it comes to supplying goods and services to Great Explorations, Inc.

The museum has been working with ComTek since 2012 and there has not been a day where we had to complain about their professionalism they value both time and money and deliver goods and services within the stipulated deadlines the same can be said about the pricing policies they're extremely competitive prices.

The museum purchased a phone system from ComTek in 2012 and had several upgrades and changes to the system to date, we also purchased all new LCD lighting and our working with ComTek on an active threat alarm alert system.

I would recommend Custom Comtek in any endeavor they undertake.

I'm extremely satisfied with the way they conduct their business and hope that you have the same pleasant experience with them.

Sincerely,

Alan Kahle
Chief Operating Officer
