

INNOVATIVE SOLUTION

AIR FILTERS

Quality Filters specifically designed for the cryptocurrency mining industry

BEST CHOICE

MECH 8

HC MERV 10

SNOW/DUST
SCREENS

FRAME
AND PAD

The first renewable and sustainable Metal washable Filter in a MERV 8. This filter is designed to last 3 years and provide the lowest pressure drop in the industry. It is designed to capture up to 90% particle 3-10 micron in size and is great for moisture control.

High Capacity MERV 10. This filter is designed for an inexpensive option designed to last 1-3 months depending on location.

Designed to last 10 years, these snow and dust screens are specifically sized to prevent snow and dust buildup, as well as, protect and lengthen the life of your air filters.

Versatile frame/pad option. Metal frame is designed to last the life of your container and replaceable MERV 7 pads available. Quick, easy pad changeout for a truly low cost solution that lowers your cost per filter to under \$3.
