

What To Expect:

From Showroom to Installation

1. Visit Our Showroom

Browse our samples and talk with one of our project coordinators about what you're looking for. Please bring rough measurements, a sketch, or project plans in order for us to give you the most accurate estimate.

2. Choose Your Material

Whether you've already visited a local supplier to select your stone or are just getting started, our showroom team can help guide you in the right direction. We work closely with all the suppliers in the area.

3. Receive Your Estimate

We'll prepare a detailed quote outlining the scope of work and anticipated project cost for your review.

4. Approve the Project & Deposit

Once your cabinets are installed and you're ready to move forward, a 50% deposit is required to schedule a template.

5. Templating

A member of our team will visit your home or jobsite to take precise measurements and create a custom template for fabrication.

6. Review & Approval

If needed, we'll update your quote based on the final measurements. Before cutting begins, you'll receive a layout showing seam locations and slab placement for approval.

7. Fabrication

After approval, we begin crafting your countertops. Typical turnaround time is 7–12 business days from the template date, provided material is available and all project details have been finalized.

8. Final Payment & Installation

The remaining balance is due before installation. Our installation team will complete the install, perform any necessary finishing work, and review the completed project with you.
