• TrexPro® Platinum Builder

As the leading Trex contractors in their markets, TrexPro® Platinum builders are experts in completing even the boldest of outdoor living projects. Ask us about the additional LABOR WARRANTY you receive on Trex products we install.

TrexPRO® PLATINUM

• Diamond Piers

Based on time-tested spread pile technology, the Diamond Pier foundation uses the strength of a precast concrete head to lock in four weight-bearing, galvanized steel pins that transfer the load to a larger area of undisturbed soil than the traditional concrete footing

• We use all KDAT Framing

We use all KDAT Framing - Kiln Dried After Treatment (KDAT) wood is pressure treated lumber that's been dried after the pressure treating process to deliver better performance against warps, cups, twists and checks. Unlike most "green" or "wet" pressure treated wood, KDAT pressure treated wood can be painted or stained immediately.

• 3D Rendering & In House Design Services Available

• All Building Permits and Inspections Obtained by Us through your Local Municipality
