Neighborhood Story

BRIDGING INNOVATION FROM A STEEL FOUNDATION

At the confluence of two great rivers, this neighborhood's past was founded in steel. The J&L Steel mill occupied both sides of the mighty Monogahela River and along the Ohio River. A multitude of mills, factories and warehouses with interconnecting bridges defined its industrial heritage. Now that era has passed, technology is now the driving force of the neighborhood.

CONNECTING THE NEIGHBORHOOD PAST AND PRESENT

Before the railroads came to town, the rivers here were flowing freeways of flatboats and steamers. Today, commercial barges drift beneath the city's trademark yellow bridges. The Three Rivers Heritage Trail runs right in front of the hotel and is an expansive urban riverfront trail system connecting visitor to opportunities for recreation and commuting.

BRIDGES CROSSING

The hotel is adjacent to the iconic Hot Metal Bridge. The rooftop terrace affords views of the Southside and this historic industrial passageway. The Hot Metal Bridge was used to transport crucibles of molten iron from furnaces on one side of the river to the steel mill. At one point 15% of all US Stel passed over this bridge at a rate of 180 tons per hour.
