Dr. Susanne K. Woloson has been in private practice since July 2000, creating her own corporation in 2004 to specialize in all types of vascular surgery, including varicose vein treatment. A decade later, Dr. Woloson founded Northwest Vascular and Vein Specialists—a boutique practice devoted exclusively to venous disease and varicose veins. “Providing superior care to my patients has always been my priority,” says Dr. Woloson, who was one of the first vascular surgeons performing minimally invasive vein ablations nearly 20 years ago. Having performed more than 10,000 laser ablations, her experience puts her among the pioneers in the field. She is considered one of the best vein doctors in the Chicago area with a practice that embraces the latest technologies as they develop. “We provide the most up-to-date options from the treatment of cosmetic spider veins to the most complex vein issues,” she adds. “We pride ourselves on educating patients, giving them the time they need during appointments, and ensuring that they feel comfortable and leave with a clear understanding of their treatment options. And, I respond to my patient’s phone calls quickly and call them with their results on the day of their exam.”

Northwest Vascular and Vein Specialists is located at 1614 W. Central Road, Suite 100, in Arlington Heights, at 900 Technology Way, Suite 230, in Libertyville, and 9843 Gross Point Road in Skokie. For more information, call 847-916-8902 or visit northwestveinspecialists.com.
