

Questions to Ask Your Attorney

If you or a loved one has been injured in an accident caused by someone else's actions, you may suffer from much more than physical pain. Whether you were injured in a car accident, because of [medical malpractice](#), or by a faulty product, your injuries could also leave you financially devastated. Medical bills, rehabilitation costs, lost wages, and other expenses associated with your injury can add up quickly. Fortunately, you can take legal action and potentially recover financial compensation to pay for your resulting losses by filing a civil lawsuit against the responsible party.

Recovering from an injury can be a very trying time in your life. That is why you need to make sure you have a skilled and knowledgeable attorney on your side as you pursue compensation. Before hiring your attorney, make sure you ask some basic questions to ensure he or she is right for you. To schedule a free consultation with our experienced and dedicated legal team, contact the Cincinnati personal injury lawyers of Stepleton Dugan, LLC, at 513-449-6041 today.

Important Questions to Ask

As much as an attorney will ask you questions about your case, you need to ask him or her questions to ensure you are getting the right attorney for your situation and needs. Start off by asking these basic questions:

- Do you have any experience handling these types of cases?
- Have you had success with these cases in the past?
- Do you have the time to dedicate to my case?
- Will you personally be handling my case?
- How long do you think my case will last?
- How much do you charge?

By asking these questions up front, you can get a good idea and feeling about whether or not a given attorney is best for your case.
