Play Area Wood Chips[®]
"One of the best friends a kid ever had"[®]

***Exclusively Produced and Distributed
by:***

Product Data Sheet

Product Identification and Description

- Playmate Play Area Wood Chips
- Engineered public playground safety surfacing product
- Produced and distributed by Ever-Green Landscape Construction Supply at 2762 N Center Point Rd, Cedar Rapids, Ia 52411

Material Composition and Properties

- 100% virgin mixed hardwood species
- Clean and debarked hardwood chips
- Natural, untreated, free from dirt, debris, heavy metals and other foreign objects
- Not a construction and demolition recycled product
- Always focused on sustainable forest harvesting methods

Performance and Safety Standards

- Always following guidance from the National Program for Play Area Safety at <https://playgroundsafety.org/>
- Meets and exceeds loose-fill and EWF testing and specifications
- Tested every 5 years to meet ASTM specifications
- Passes ASTM F1292 Impact Attenuation at 15" un-compacted depth at a critical fall height of 18ft.
- 9" compacted, 11' loose fill maximum critical fall height of 16'
- Passes ASTM F2075 as EWF (engineered wood fiber)
- Meets Accessibility requirements ASTM F1951
- No known reported injuries in over 30 years
- All test results available by request

Recommended Installation Guidelines

- Always know your highest platform height
- Never install a loose-fill depth of less than 12" around fall zones
- Critical fall height is 4' above tallest platform
- Be sure to have at least 9" of compacted material on most public playgrounds
- Be sure to have proper and consistent base grade level for drainage

Maintenance and Longevity

- Be sure that high traffic areas and fall zones maintain a constant compacted depth of 9" or more at a critical fall height of 16' or less
- Natural wood products breakdown, creating a safer, softer area.
- Always maintain your edges to assure no trip hazards
- Proper maintained areas will require a fresh topdress each year
- Be sure area remains compacted for proper wheelchair accessibility
- Sustainable natural wood products are cleaner, safer and healthier than any synthetic or petroleum based surfacing options
- Making sure that the playing surface drains properly will benefit the longevity of this product
