

OFF DRIVEWAY DELIVERY WAIVER FORM

Please read carefully and sign below in agreement with our terms.

With all "off driveway deliveries", our driver reserves the final say whether they think they can safely dump in your desired area.

This is something we will NOT make exceptions to.

Our trucks used for deliveries range in weight from 15,000-35,000 lbs without any material in them. Going "off driveway" our trucks could sink/get stuck in soft areas, damaging objects underground that are not seen, which can cause damage both to your property and our trucks.

Some helpful info regarding deliveries to protect your property and our delivery trucks:

When selecting a location for material to be dumped please look UP! When our truck bodies rise, they can reach heights of 15+ feet, so please choose a location away from power lines or low hanging tree branches.

Our trucks need a width of at least 10 feet to dump safely.

With your signature below you are agreeing that:

You take all responsibility for any damage to sidewalks, walkways, irrigation systems, septic lines, lawns, curbing, and any other property in the path of delivery.

ROX Recycling Inc takes no responsibility for damage that is caused to the property when going "off driveway".

You release ROX Recycling Inc and its Employees/Hauler from all liability with the "off driveway delivery".

If our truck gets stuck, the purchaser agrees to pay a rate of \$150 per hour the truck is out of service, the cost to fix the damage to our truck as well as all the associated costs for towing. If our truck gets stuck and you do not take full responsibility, you will be charged an additional \$500 as an inconvenience fee and will be liable for all legal costs that we may incur to handle the situation.

***Our trucks will NOT drive on concrete or asphalt driveways as they may crack or cause unintentional damage without a signed waiver.**

****This one form covers multiple trucks and deliveries until this order is complete.**
