

TECHNICAL DATA & PRODUCT DESCRIPTION

Surface Seal

PAGE 2

SECTION 7: TECHNICAL DATA

Physical: Liquid

Color: Clear

Odor: None

Specific Gravity: 1.02

pH: +/- 11

Flammability: None

Toxicity: Low, almost insignificant

Freeze Harm: Possible, avoid freezing

Freeze Temperature: 32 F

VOC / VOS Content: Low, almost insignificant

Composition: Aqueous Siliconate

Environmental Impact: Safe, Low VOC

Surface Bond Quality: Excellent

Paintability: Good

U.V. Resistance: Good

Clean-up solvent: Water

SECTION 8: SOME ATTRIBUTES

- Enhances surface traction quality
 - More abrasion resistant surface
 - More crack resistant surface
 - More spall resistant surface
 - Increased surface density
 - Preserves original surface appearance
 - Can be used on wide variety of surfaces
 - Prevents surface water-wetting
 - Resists oil and repels water
 - Improves freeze damage resistance
 - Improves fungus / mildew resistance
 - Retards or eliminates efflorescence
 - Remains resilient
-
