3-LAYER CONSTRUCTION

America's Favorite Garage Doors[®]

Model GD2SU; Shown in Black with SQ22 Windows

GALLERY® STEEL

The Gallery® Steel three-layer construction provides exceptional strength, energy efficiency and dent resistance as well as a beautiful carriage house appearance. The 2" or 1-3/8" thickness of Intellicore® polyurethane or bonded polystyrene insulation and thermal break makes these doors heat and cold resistant while the tongue-and-groove joint helps seal out wind, rain and snow. Available in short and long panels with multiple window options, the three-layer Gallery® Steel is virtually maintenance-free, so the first fabulous impression becomes a lasting impression.

intellicore®
insulation technology

Warmer. Quieter. Stronger.

Gallery® Steel garage doors featuring Intellicore® insulation technology represent the ultimate smart choice for homeowners. Clopay's Intellicore® insulation is a proprietary polyurethane foam that is injected into a garage door, expanding to fill the entire structure. The result is a door with incredible strength and durability. Its dense insulation also produces a quieter door, and with one of the industry's leading R-values of 18.4, it provides year-round comfort and improved energy efficiency. Smart, indeed.
