

CLOPAY COMMERCIAL – MODEL VS904

STACKING SERIES

VERTISTACK® CLEAR DOOR

The VertiStack® Clear door utilizes unique, compact stacking sections that take up minimal ceiling space, so it won't interfere with mechanical, electrical or plumbing fixtures. Vertically stacked sections with minimal projection on the wall allow for a clear and open ceiling. The sections can even be recessed into the ceiling if desired. Designed to operate smoothly and quietly, the door will not disturb patrons when operating.

COMPACT VERTICAL STACKING ENABLES CLEAN AESTHETIC

EXPAND YOUR FOOTPRINT

VertiStack® Clear allows you to bring the outside in. When the door is open, indoor seating can be extended to the outside areas, inviting a state of flow between interior and exterior spaces. When the door is closed, the glass panels let in ample sunlight to offer warm hospitality. The built-in gaskets between sections make the door IECC compliant for air infiltration, keeping patrons comfortable while reducing energy usage.

CLEAR AESTHETICS

VertiStack® offers a sleek design with minimal lines and angles. A clean, modern look from inside and out with aesthetic appeal is created since VertiStack® Clear has no visible hinges or exposed track or cable. Available in a variety of glass, acrylic and polycarbonate options, VertiStack® Clear also offers choices for customizable color and finish, giving designers free rein and flexibility to match or enhance any aesthetic.
