

285 GRADY WHITE FREEDOM FOR 2025

Looking for balance between family and fishing? The big-water 285 Freedom dual console strikes a marvelous median between family comfort and serious fishing features along with some thoughtful recent updates! Changes include a redesigned hard-top with integrated electric Sure Shade option, new larger windshield, spacious helm station, dual aft facing electro-extending lounge seats, and standard cockpit side door! The 285 Freedom also has the next generation Sea V2 hull, which produces the softest, driest, most stable rough water performance ever offered in a series of offshore boats. Whether you're taking the family to dinner, tubing, fishing offshore, or headed to the Bahamas, this "battle ship" tough but comfortable Grady has it all! All 2025 models carry composite stringers and transoms, and a five-year TRANSFERRABLE hull warranty.
