

Facts on GAS BURNING FIREPLACE Flues In Masonry Chimneys

HOLES IN FLUE LINING

Gaps between tiles will allow major by products of combustion (Carbon Dioxide & Carbon Monoxide) to escape the flue lining and potentially get into your home.

CARBON MONOXIDE GETTING INTO HOME

Carbon monoxide is often referred to as the silent killer. This poisonous gas is both colorless, odorless and tasteless. Mild exposure to the gas can lead to flu-like symptoms.

CARBON MONOXIDE STATISTICS

15,000 people are poisoned by carbon monoxide every year in the US.

500 people die every year by carbon monoxide.
