

BUENO MIXERO

Compatibility Agent for Liquid Fertilizer-Pesticide Mixtures

HOW IT WORKS

Bueno Mixero is a compatibility agent for direct addition to liquid fertilizers. It should be used where combining a liquid fertilizer and a pesticide is desired and improved stability of the mixture is required. Compatibility of liquid fertilizer-pesticide mixtures is essential to ensure trouble-free, accurate and uniform application. Crop protection chemicals do not always mix with liquid fertilizers or their components may separate too quickly, which renders their combination impractical. Incompatibility may be due to pH, concentration and type of certain salts and percentage of water content in the liquid fertilizer. Bueno Mixero is effective in improving compatibility and stability of most liquid fertilizer-pesticide mixtures. Bueno Mixero is completely soluble in liquid fertilizers such as 28-0-0,

BENEFITS

1. Improves tank mix compatibility
2. Enhances mix stability
3. Supports efficient application

PRINCIPAL FUNCTIONING AGENTS:

Nonionic surfactant, fatty alcohol glycoside, and amino alcohol....	45.4%
Other.....	54.6%
Total.....	100.00%

USE RATES

Jar Test for Compatibility Prior to Use.

LIQUID NITROGEN FERTILIZERS – Use 1 to 2 pints/100 gallons of fertilizer (or 0.5 to 1.0 liters/400 liters).

LIQUID MIXED FERTILIZERS – Use 2 to 3 pints/100 gallons of fertilizer (or 1.0 to 1.5 liters/400 liters)

Although liquid fertilizer-pesticide mixtures prepared as suggested above may be stable from a few hours to overnight, it is advisable to apply the mixture as soon after preparation as is practical. Agitation during application is recommended, when available. Always agitate before using if mixture has been allowed to stand.
