COMBO7

INFLUENCE SPRAY AID WITH LOW ODOR TECHNOLOGY

GENERAL INFORMATION

Combo 7 is a nonionic, low foaming penetrant/surfactant, which may be used to enhance the activity and effectiveness of manyagricultural and industrial chemicals. Whenused according to label directions it will provide more uniform coverage of spray solutions by reducing surface tension and aid in penetration. The degree of drift hazard varies with the type of pesticide and application conditions. Read and follow all label directions when applying pesticides. Combo 7 may be used to acidify some spray solutions, thereby preventing alkaline hydrolysis of pesticides that are sensitive to high pH. Combo 7 will also show drift control properties by producing a more uniform spray pattern and improving deposition. The product will retard, but not eliminate drift.
