

## CROP OIL CONCENTRATE

### GENERAL INFORMATION

EGE COC is a uniquely designed 83/17 crop oil concentrate. The high performing surfactant reduces the surface tension of the spray mix, allowing it to wet and uniformly cover the intended target. EGE COC's humectant properties will extend the dry time of the applied herbicide, and in result, increase the absorption of active ingredients through the plant's cuticle. EGE COC is low phytotoxic and is compatible with fertilizers including AMS. Use when a COC is required with post emergence herbicides, desiccants, defoliants, and other pesticides.

### BENEFITS

- ▶ Enhanced chemical coverage and absorption
- ▶ Extended dry time with low phytotoxicity
- ▶ Excellent compatibility & flexibility

### RATES

1-8 quarts per 100 gal spray mix.

For certain in crop applications, lower rates such as these may be needed 4-25 oz per acre.

### INGREDIENTS:

Proprietary blend of alkanoates and nonionic surfactant. . . . . 100%

### CONTAINS NO NPE OR APE

Proudly Made  
in the USA
