

COMPLETE AMS WATER CONDITIONERS, DRIFT CONTROL, 90-10 SURFACTANT

GENERAL INFORMATION

Padlock PLUS combines a blend of water conditioning agents including AMS while simultaneously controlling drift and being fully compatible with glyphosate. This combination provides a distinct advantage over other water conditioners. The rewards with Padlock PLUS grow when you consider all the beneficial products bundled together in this water conditioning blend. With Padlock PLUS you get the speed and quick mixing of spray grade liquid AMS, nonionic surfactant, and our industry best Padlock drift control.

BENEFITS

- ▶ Complete metallic ion bonding
- ▶ Reduces the amount of other adjuvants you have to add to your tank mix
- ▶ Our special polymer blend gives you an option that does not contribute to volatility

RATES

- The application rate is 1-8 quarts per 100 gallons spray solution, depending on water hardness, wind speed, and other weather conditions.
- 1 gallon per 100 gallons has demonstrated better performance than 8 pounds of AMS.
- Additional amounts of AMS might need to be added depending on label and percentage of water hardness.

INGREDIENTS:

Polyvinyl polymer (polyacrylamide, non-reactive), ammonium sulfate, emulsifiers, nonionic surfactant.....100%
Total.....100%

CONTAINS NO NPE OR APE
