

NONIONIC SURFACTANT + ORGANOSILICONE

GENERAL INFORMATION

Rivet 90 OS is the superior nonionic surfactant on the market with class leading performance in numerous different application when applied with defoliants, herbicides, insecticides, and fungicides. Rivet 90 OS's combination of surfactant and organosilicone reduces the surface tension beyond that of conventional NIS products, enabling your spray droplets to spread out over the entire surface of the plant. Rivet 90 OS also exhibits substantial wetting and adhesion, along with reducing spray droplet bounce.

BENEFITS

- ▶ Adheres water droplets to plants
- ▶ Reduces surface tensions
- ▶ Protects from environmental degradation
- ▶ Increased rainfastness
- ▶ Improves wetting

RATES

- 1 to 2 quarts per 100 gallons of water
- Follow chemical label recommendations for nonionic surfactant

In all cases, follow chemical manufacturer's label or speak with your certified crop advisor. Rivet 90 OS is a non-foaming surfactant that is compatible with most chemical formulations including dry flowables. If tank mix concerns arise, perform a jar test.

INGREDIENTS:

Principal Functioning Agents:

| | |
|---|------|
| Nonionic Surfactant & Organosilicone..... | 90% |
| Inert Composition..... | 10% |
| Total..... | 100% |

CONTAINS NO NPE OR APE
