

Shure Season

0-0-1

GUARANTEED ANALYSIS

Soluble Potash (K2O).....	1.0%
Iron (Fe)	1.0%
Manganese (Mn)	1.0%

Derived from: Potassium humate, Iron EDTA, and Manganese EDTA

ALSO CONTAINS BENEFICIAL SUBSTANCES:

Bacillus subtilis	624,000 CFU/mL
Pseudomonas putida	624,000 CFU/mL
Seaweed Extract	2.0%
Humic Acid (derived from leonardite).....	2.0%
Glucose	20.0%

GENERAL INFORMATION

Shure Season is a blend of essential plant nutrients, beneficial microbes, and soil amending ingredients designed to boost plant functions, improve soil structure, increase nutrient uptake, activate plant essential enzymes, and improve stress tolerance. The glucose present in this blend, provides the plant with supplemental carbohydrates, freeing up energy for other plant functions. Carbohydrates are also a necessary source for building strong root systems, along with stems and leaves. When combined with humic acid and seaweed, microbial growth will be fed and stimulated, boosting nutrient mobilization and uptake. Seaweed and humic are also important for improving the soil structure, resulting in healthier plants. Not only do the iron and manganese activate enzymes, they are essential for chlorophyll production and photosynthesis. Lastly, potassium combined with the biologicals improves the plant's tolerance to both biotic and abiotic stresses, paving the way for healthier plant growth.

TECHNICAL DATA

Net Weight: Bulk as Invoiced	
Weight Per Gallon lbs/gal @68° F	9.81
Specific Gravity	1.18
pH at 68° F	6-8
Freezing Point	35° F

For the agronomic application rates suitable for your geographical area or the maximum allowable non-nutrient application rate per acre, consult a trained soil specialist or your dealer.

USE RATES

Foliar: 16-32 oz/A
In-furrow: 16-32 oz/A
Broadcast: 16-32 oz/A

NET CONTENTS:

2.5 U.S. GALLONS (24.53 lbs)
