

OIL LOCK

Oil Emulsion DRA

HOW IT WORKS

Oil Lock is a drift control and spray deposition aid that enhances canopy penetration and leaf surface coverage while reducing driftable fines. When mixed with certain pesticides or fertilizers, some adjuvants may increase the risk of crop injury (phytotoxicity). Prior to using Oil Lock, the applicator or crop advisor should be familiar with the specific pesticide mix, have prior experience using Oil Lock with it, or perform a phytotoxicity test to ensure crop safety.

PRINCIPAL FUNCTIONING AGENTS

Modified soybean oil and proprietary surfactant blend.....100%

All ingredients are exempt from the requirement of a tolerance in 40 CFR 180.

MIXING

If the pesticide label does not provide specific mixing instructions, begin by filling the spray tank with at least 50% of the total intended carrier volume. When using a premixing vessel or inductor, fill it with at least 20% of the desired final carrier volume. With the carrier agitating, add tank mix components in the following order:

- a. Add compatibility agent and/or defoamer, if required
- b. AMS, dry formulations (WP, DF, WDG, SP), and dry drift retardants
- c. Dry soluble and suspension fertilizers / micronutrients
- d. Liquid drift retardants and flowable formulations (F & FL)
- e. Liquid concentrates, suspension concentrates, microencapsulated and capsule suspension (LC, SC, ME, CS)
- f. Emulsifiable concentrates (E, EL or EC)
- g. Solutions and soluble liquids (S or SL)
- h. Liquid micronutrients and fertilizers
- i. Water conditioners and other adjuvants (COC, HSOC, MSO, NIS)
- j. Finish filling to desired spray volume level and continue agitation

USE RATES

For use with dicamba: 0.3% v/v

Use 3-6 oz. per acre

Quick Mix Reference Table - Use Rates (gal)

Spray Tank Volume (gal)	Settle (VRA) 40 oz/A @15 GPA	Oil Lock (DRA) - 0.3% v/v
500	10.42	1.50
600	12.50	1.80
700	14.58	2.10
800	16.67	2.40
900	18.75	2.70
1000	20.83	3.00
1100	22.92	3.30
1200	25.00	3.60
1300	27.08	3.90
1400	29.17	4.20
1500	31.25	4.50
1600	33.33	4.80
