WATER PUMPS

**POWERED by
HONDA[™]**

THE NEW STANDARD IN PRESSURE WASHER PERFORMANCE

From workshop to industrial,
the new Centurion Pump Series
delivers relentless power and
durability in every class.

- CP pumps exceed the toughest performance demands, setting a new benchmark for reliability and efficiency.
- Every model carries an industry-leading 7-year warranty, proving the quality in design and longevity.
- From compact axial units to heavy-duty triplex systems, CP Pumps are built to dominate any demanding commercial or industrial application.

CENTURION PUMP
Unmatched Performance.

THE POWER YOU NEED FOR EVERY JOB

Choose the series that fits your work. Whether it's light cleaning around the house, dependable equipment for daily use, or industrial-grade machines for nonstop performance.

WORKSHOP

SERIES

FOR HOMEOWNERS AND SMALL BUSINESSES WITH LIGHT, OCCASIONAL PROJECTS.

Perfect for cleaning driveways, siding, decks, vehicles, and other small jobs around the house or shop. These units are compact, lightweight, and affordable.

COMMON FEATURES:

- Powerease 225 Engine
- Axial Pump
- Powder-coated steel frame
- M22 or quick-connect fittings
- 25' Hose

COMMERCIAL

SERIES

FOR CONTRACTORS AND BUSINESSES WHO NEED DEPENDABLE EQUIPMENT EVERY DAY.

Ideal for garages, shops, property maintenance, and job sites. Designed for frequent use with powerful options that can handle tough daily tasks.

COMMON FEATURES:

- Honda GX or Powerease Engine
- Triplex Pump
- Powder-coated steel, stainless steel, or aluminum frame
- Quick-connect fittings
- 50' Hose

INDUSTRIAL

SERIES

FOR PROFESSIONALS WHO DEMAND MAXIMUM POWER AND PERFORMANCE.

Engineered for critical, high-duty jobs where reliability matters most. Industrial machines deliver power and durability to take on the toughest conditions all day, every day.

COMMON FEATURES:

- Honda GX Engine
- Triplex Pump
- Belt Drive
- Powder-coated steel or aluminum frame
- Quick-connect fittings
- 50' Hose

BREAKING DOWN A PRESSURE WASHER

Understand the key parts that deliver the power you need.

A pressure washer is more than an engine and pump, it's a system of components working together to deliver cleaning power. Using the acronym **THE POWER YOU NEED**, here are the essential elements that define performance, durability, and ease of use.

T H E P O W E R Y O U N E E D

T TEMPERATURE WATER TEMPERATURE

Cold water tackles dirt and mud, while hot water cuts through grease and oil for demanding jobs.

H HOSE PRESSURE HOSE

The hose delivers water under pressure. Length, fittings, and build quality affect ease of use, durability, and safety.

E ENDS INLET AND OUTLET FITTINGS

Fittings connect hoses, guns, and nozzles. Quick-connect is fast and convenient, while M22 thread is common on workshop units.

P PUMP PUMP TYPES

The pump generates water pressure. Axial pumps are compact and economical, and triplex pumps are stronger and longer lasting.

O OUTPUT PSI

Pounds per Square Inch measures pressure output. Higher PSI means greater cleaning force.

W WATER FLOW GPM

Gallons per Minute measures flow rate. More GPM moves dirt faster and improves rinsing.

E ENGINE GAS OR ELECTRIC

Engines and motors drive the pump. More horsepower or displacement delivers more pressure and flow.

R REPAIRS SERVICE & SUPPORT

Regular service extends machine life. A network of certified service centers keep your pressure washer working longer.

Y YOUR MAINTENANCE OWNER CARE

Changing oil, replacing filters, and proper winterizing prevent costly downtime and keep performance reliability high.

O OPERATION APPLICATION NEEDS

Choose a pressure washer matched to your needs such as light home use, regular commercial jobs, or daily industrial cleaning.

U UNLOADER PRESSURE CONTROL

The unloader regulates PSI and GPM, and protects the pump when the trigger is released.

N NOZZLES SPRAY TIPS

Different spray angles and sizes customize pressure and cleaning power for each job.

E ENVIRONMENT USAGE SETTING

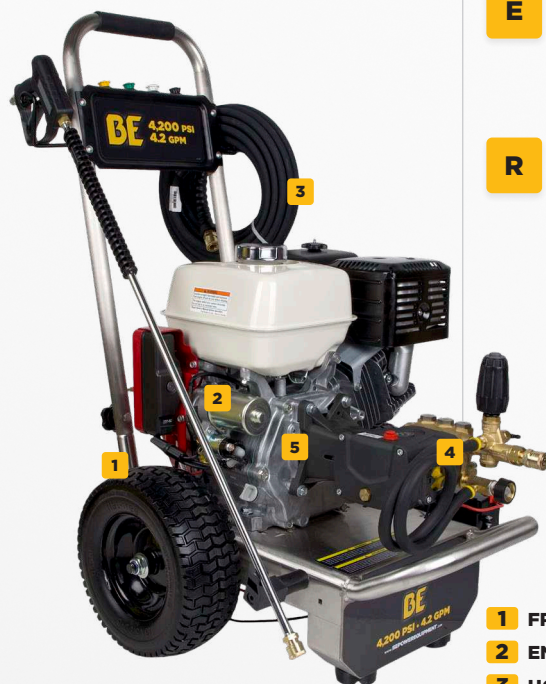

Electric units are quieter and emission-free indoors use, and gas models provide more power and mobility outdoors.

E ENGINEERING BUILD QUALITY

Every BE pressure washer is engineered and tested for reliable performance and value.

D DRIVE DRIVE SYSTEM

Direct drive is compact and cost-effective, while belt drive runs cooler and lasts longer.

1 FRAME & TIRE GUIDE: PAGE 8

2 ENGINE GUIDE: PAGE 6

3 HOSE GUIDE: PAGE 7

4 PUMP & UNLOADER GUIDE: PAGE 7

5 DRIVE SYSTEMS GUIDE: PAGE 6

DRIVE SYSTEMS

DIRECT DRIVE

A direct drive pump connects directly to the engine shaft with a hollow shaft design. Because the pump spins at the same speed as the engine, these units are compact, simple, and cost-effective. They're ideal for lighter-duty use where low maintenance and portability matter most.

BELT DRIVE

A belt drive pump uses pulleys and belts to reduce the pump speed. Running at a lower RPM means less heat, less vibration, and a much longer service life. Belt drive units are preferred for frequent or professional use, where durability and cooler operation are critical.

ENGINES

The engine is the powerhouse of every pressure washer, and reliability starts here. That's why we use overhead valve (OHV) engines, known for efficiency, durability, and easier servicing compared to side-valve designs. Their horizontal shaft setup also allows better alignment with the pump, making installation and maintenance simpler.

PUMPS AND UNLOADERS

The pump is the heart of a pressure washer, while the unloader acts as its safety valve. The pump sets the pressure and flow, and the unloader regulates it to protect the pump. Knowing pump types and how unloaders work will help you choose the right machine.

	Axial (wobble plate) pumps are compact, affordable, and lightweight. Best suited for light and medium-duty applications, they offer good performance at a lower cost but have a shorter lifespan than triplex designs.		Triplex pumps use a crankshaft and piston system to deliver greater efficiency, power, and durability. They are the choice for medium to heavy-duty use where long life and higher performance are required.		
			BUILT-IN UNLOADER <ul style="list-style-type: none"> • Compact design, saves space • Lower cost • Internal parts serviceable 		
			EXTERNAL UNLOADER <ul style="list-style-type: none"> • Bolted separately to pump head • Faster replacement and service • Greater PSI/GPM capacity • Improved heat management 		

Pumps: Page 112

HOSES

Using the correct hose and nozzle size keeps your washer performing at its best and prevents excess strain on the pump and engine. Regular care extends hose life and reduces the risk of blowouts. High pressure and heat make maintenance a safety priority.

TIPS FOR MAINTAINING HOSES

- **Use Correct Attachments:** Always match fittings, couplers, and adapters.
- **Don't Drag or Kink:** Avoid pulling hoses around sharp corners or rough surfaces.
- **Don't Flatten:** Braided layers can break and cause blowouts.
- **Use Within Limits:** Stay within rated temperature and PSI.
- **Store Safely:** Use reels or store off the ground to prevent damage.
- **Keep Clean:** Rinse after use; remove water before freezing temps.

FRAMES

Frames are the foundation of every pressure washer. The material and design affect durability, mobility, storage, and corrosion resistance. Choosing the right frame ensures your machine is easier to move, longer-lasting, and better suited to your work.

INDUSTRY LEADING WARRANTY

**PROTECT YOUR INVESTMENT.
EXTEND YOUR COVERAGE.
REGISTER TODAY.**

WHY REGISTER?

When you register your product online, you unlock extra value that goes beyond your standard warranty. Select engines and models qualify for up to 5 years of coverage, ensuring you get the most from your BE equipment.

- ✓ **Additional Warranty:** Gain up to 3 extra years on qualifying products.
- ✓ **Priority Support:** Fast access to warranty and technical help when you need it.
- ✓ **Exclusive Offers:** Registered customers are eligible for special promotions and contests.

SAFEGUARDING YOUR WARRANTY

Your receipt and product information are stored in our secure database, so you'll never worry about lost paperwork. With details at hand, warranty requests are faster, easier, and stress-free.

CONTESTS AND PROMOTIONS

From time to time, registered customers get access to exclusive promotions and prize draws. It's our way of saying thanks for making registration part of your ownership experience.

LIFETIME COIL WARRANTY

Now standard on all BE hot water pressure washers. Details on page 42.

REGISTRATION IS EASY

- 1** Go to: bepowerequipment.com/product-registration
- 2** Enter your product details and upload your proof of purchase.
- 3** That's it! Your product is securely registered in our system.

ELECTRIC PRESSURE WASHERS

#THEPOWERYOUNEED

QUIET, EFFICIENT, AND BUILT TO PERFORM

BE electric pressure washers are ideal for indoor or noise-sensitive areas while delivering the power for tough outdoor jobs. From portable home units to heavy-duty dealer frames, there's a model for every need.

CONVENIENT AND USER-FRIENDLY

Auto start/stop motors conserve energy and extend pump life. Long power cords with GFCI plugs ensure safe operation.

PORTABLE TO PROFESSIONAL

Choose from lightweight workshop models with easy transport wheels, to rugged powder-coated steel frames and wall-mounted commercial units.

DURABLE PUMPS

Reliable axial pumps power the compact units, while premium triplex pumps provide long-lasting performance in professional and dealer-grade systems.

VERSATILE OPTIONS

Models include features like 2-in-1 carry/wall-mount designs, hose reels, soap tanks, and high-pressure foam cannons for specialized cleaning.

BUILT FOR DEMANDING APPLICATIONS

Commercial frames with Baldor motors and triplex pumps handle continuous use, with multiple voltage options to fit your facility.

CLEAN POWER

Electric models produce zero emissions, run quietly, and deliver consistent pressure, making them as efficient as they are effective.

LIFETIME COIL WARRANTY

**ENGINEERED BY BE.
GUARANTEED FOREVER.**

Every BE Hot Water Pressure Washer is now equipped with a BE-built coil, engineered at our Tennessee plant and installed in our assembly plants across North America.

- Designed and manufactured by BE for maximum quality control
- Heavy-duty construction to withstand the toughest applications
- Confidence that only comes with BE engineering and guaranteed for life

BE QUALITY. PROTECTED FOR LIFE.

HOT WATER PRESSURE WASHERS

#THEPOWERYOUNEED

HOT WATER PRESSURE WASHERS

THE ULTIMATE SOLUTION FOR CUTTING THROUGH GREASE, OIL, AND GRIME.

WHY HOT WATER?

Hot water is a cleaning force multiplier. When combined with pressure and detergent, it breaks down grease, oil, and stubborn residue faster and more effectively than cold water. The result is shorter cleaning times, less chemical use, and deeper cleaning power.

KEY BENEFITS

- **Faster Results:** Cuts through oil, grease, and grime that cold water can't touch.
- **Lower Costs:** Reduces the need for harsh chemicals and saves labor time.
- **Versatile Cleaning:** Handles everything from heavy equipment to shop floors.
- **Professional Finish:** Leaves surfaces looking cleaner and more sanitary.

WHERE THEY EXCEL

Hot water pressure washers are the go-to choice in industries where performance and reliability matter most:

- **Agriculture:** Clean mud, grease, and buildup from machinery and tools.
- **Food Industry:** Maintain hygiene by degreasing kitchens, floors, and equipment.
- **Construction:** Remove oil, grime, and concrete residue from tools and vehicles.
- **Rental Fleets:** Offer customers a powerful cleaning option for tough jobs.
- **Waste Management:** Keep refuse trucks and bins clean and safe.
- **Mobile Services:** Contractors and detailers benefit from fast, effective cleaning.
- **Manufacturing:** Essential for maintaining equipment and workspaces.

BUILT FOR EVERY JOB

BE OFFERS ONE OF THE MOST COMPLETE RANGES OF HOT WATER PRESSURE WASHERS AVAILABLE.

WHEELED UNITS
Portable and rugged for maximum flexibility.

SKID MOUNT UNITS
Ready for vehicle or trailer installations where mobility and durability are key.

HOT BOX UNITS
Convert existing cold water machines into powerful hot water systems.

WHY CHOOSE BE

Every BE hot water pressure washer is designed with:

- Heavy-duty triplex pumps for durability and performance.
- Efficient diesel fired, natural gas fired, or liquid propane fired burners that heat water up to 200°F / 93°C.
- Powder-coated steel frames for protection and long life.
- User-friendly controls including adjustable thermostats and safety features.
- Lifetime coil warranty on all hot water models.

TMR / TRUCK MOUNT READY

ALL TMR UNITS ARE DESIGNED FOR FAST, SECURE MOUNTING ON A TRUCK OR TRAILER.

WHEELED UNITS START HERE

1. LIFT & SUPPORT

- Lift the machine using a crane or forklift.
- Use the mounting brackets and do not lift by the axles.

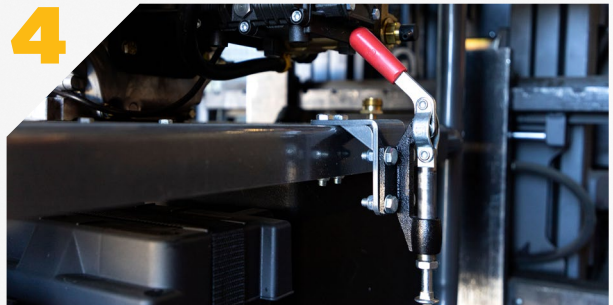

2. REMOVE WHEELS

- Unbolt and remove the wheels.

3. REMOVE AXLES

- Locate axle bolts and slide out the axles.

4. REMOVE BRAKES (OPTIONAL)

- If installed, unbolt and remove wheel brake(s).

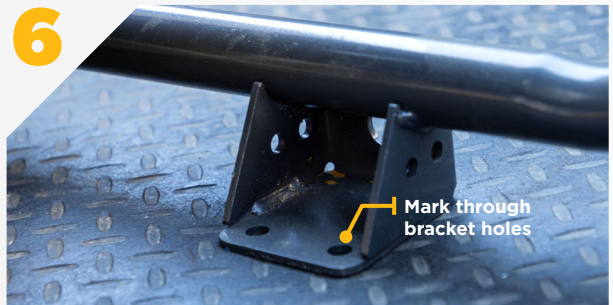

SKID UNITS START HERE

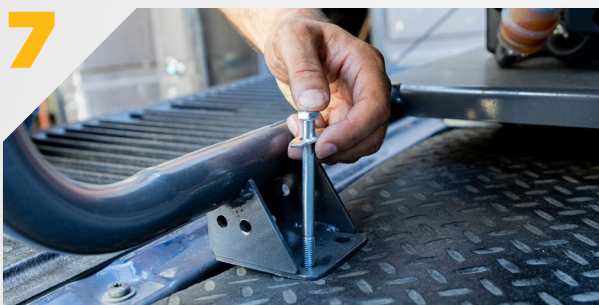

5. POSITION ON VEHICLE

- Set the machine onto the truck or trailer.
- Choose a location that balances the machine's weight.

6. MARK MOUNTING POINTS

- Position the brackets and mark drill holes.
- Bracket design may vary by unit.

7. DRILL & BOLT

- Drill holes through the platform and bolt the machine securely into place.

8. READY TO USE

- Your machine is now mounted and ready for work.

ATS READY INVERTERS

FOR AUTOMATIC BACKUP POWER

The BE BE7500iD and BE10500iT inverter generators now feature built-in 2-Wire Auto Start terminals, giving them ATS-Ready capability. That means they can automatically start or stop when connected to an Automatic Transfer Switch (ATS) or other compatible controller, with no manual intervention needed.

WHAT IT DOES

The 2-Wire Auto Start system uses a simple two-wire signal, the same proven technology used in standby generators worldwide. This allows seamless integration with most remote switches, timers, or third-party controllers.

WHY IT'S USEFUL

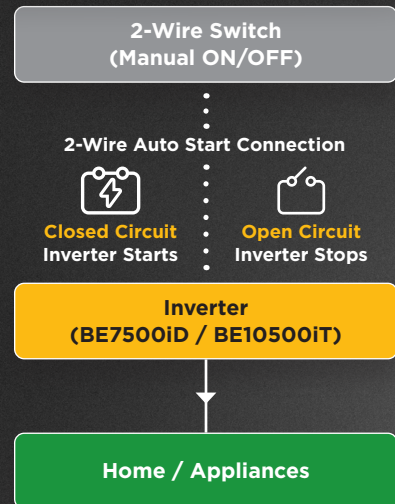

- **Hands-Free Control:** Start or stop your inverter from a remote location or automatically during power loss.
- **Automation-Ready:** Works with ATS units, solar controllers, and other automation systems.
- **Flexible Setup:** Connect to a manual switch, wall switch, or external controller with simple wiring and no special equipment.

WHY IT MATTERS

- **Seamless Backup:** Your inverter starts and stops automatically when paired with an ATS.
- **Reliable Integration:** Compatible with most transfer switches and 2-wire controllers.
- **Peace of Mind:** Your home or appliances stay powered — even if you're not there.
- **Trusted System:** Built on industry-standard 2-wire technology used in generators worldwide.

THE BENEFITS FOR YOU

- With the 2-Wire Auto Start feature, the BE 7,500W and 10,500W inverter generators are ATS-Ready, giving you true automatic backup power when paired with a transfer switch.
- When the grid fails your inverter steps in. When the grid returns it steps out.
- **Always on standby. Always ready.**

HOW IT WORKS

POWER OUTAGE DETECTED

The controller senses utility loss and closes the 2-wire circuit.

INVERTER STARTS

Your inverter powers up automatically, supplying backup energy.

POWER RESTORED

The controller opens the circuit, shutting down the inverter.

ALL AUTOMATIC

The system runs itself with no manual switching required.

INVERTERS & GENERATORS

POWEREASE®
ENGINES

#THEPOWERYOUNEED

RELIABLE POWER. SMART DESIGN. BUILT-IN PROTECTION.

Whether you're powering a jobsite, preparing for outages, or heading off-grid, BE generators and inverters deliver dependable performance and advanced safety. This guide helps you understand the key differences, features, and performance ratings.

WHICH TYPE IS RIGHT FOR YOU?

FEATURE	CONVENTIONAL OPEN FRAME GENERATOR	INVERTER GENERATOR
Power Output	Higher overall wattage	Lower output, but cleaner energy
Power Quality	Suitable for tools and appliances	Safe for phones, laptops, and electronics
Portability	Larger and heavier	Lightweight and compact
Noise Level	Louder	Ultra-quiet operation
Fuel Efficiency	Runs at constant RPM	Adjusts engine speed to demand
Maintenance	Standard upkeep	Standard upkeep
Serviceability	Easier to repair	More complex internals
Price	Lower cost per watt	Premium features at higher price

WATCH A VIDEO ON INVERTER VS
OPEN FRAME GENERATORS

HOW POWER IS GENERATED

BE generators convert gasoline into electricity using a gas engine and alternator. Inverters take it a step further, converting raw AC power into clean, stable electricity ideal for sensitive devices.

UNDERSTANDING POWER RATINGS

Knowing your wattage requirements helps you select the right model. Here's what to look for:

- **Volts (V):** Pressure of electricity. Usually 120V or 240V.
- **Amps (A):** Flow of electricity. Varies by device.
- **Watts (W):** Total power = Volts × Amps.

All Inverters and generators are rated in watts and most units list two wattage ratings:

- **Max/Starting/Surge Watts:** Temporary burst needed to **start** a device or handle power spikes
- **Running/Continuous Watts:** Power needed to **keep** a device running without interruption

For example, a table saw may need 1800W running, but spike to 4500W when cutting dense material. That extra wattage is called Overload Capacity and BE leads the industry in providing it without tripping the breaker.

COMMON APPLIANCE WATTAGE

APPLIANCE	MAX/STARTING/ SURGE WATTS	MAX/RUNNING/ CONTINUOUS WATTS
Table Saw	4500	1800
Air Conditioner	2500	800
Sump Pump	2000	500
Air Compressor	3000	1440
Freezer	2500	500
Electric Fan	600	300
Kettle	1600	1600
Laptop	60	60
Toaster	1500	1500
Radio	80	80
Phone Charger	60	60

POWER YOU CAN TRUST WITH PROTECTION BUILT IN

All BE generators and inverters include advanced safety features to keep people and equipment safe in any environment.

CARBON MONOXIDE DETECTION

Built-in sensors continuously monitor CO levels. If dangerous levels are detected, the generator automatically shuts down, keeping you, your crew, or your family safe from harmful fumes.

EXTREME COLD WEATHER START

Designed for harsh climates, our cold-start technology ensures reliable ignition in freezing temperatures so you're never left without power when you need it most.

LOW OIL SHUTDOWN PROTECTION

Protects your engine from damage by automatically shutting down when oil levels drop too low, preventing costly repairs and extending engine life.

MAGNETIC DIPSTICK PROTECTION

Captures harmful metal particles in the engine oil, reducing wear and tear on critical components and keeping your generator running longer.

OVERLOAD SHUTDOWN PROTECTION

Automatically shuts down the generator if power demand exceeds safe limits, preventing damage to the engine, alternator, and connected devices.

ONE-TOUCH BUTTON START

Forget pull cords and lost keys, just push for instant power. If it doesn't start right away, it automatically retries up to three times for a reliable start in any weather. (Available on electric start units only)

PARALLEL READY FOR MORE POWER WHEN YOU NEED IT

All BE inverter generators are parallel ready, allowing two units to be linked together with a BE Parallel Kit for increased power output.

- Simple way to combine two units for more power
- Plug-and-play connection using BE Parallel Kit
- Ideal for RVs, food trucks, job sites, or backup use

BE2800i, BE4000i AND BE4700iD: 85.561.079 PARALLEL KIT

The background image shows a large white tanker truck parked on a dirt road next to a green field. Two large, flexible, corrugated hoses are connected to the truck and extend across the grassy field towards the right. The scene is captured in the golden hour of late afternoon, with long shadows and a warm, orange-tinted sky. The hoses are the primary focus, leading the viewer's eye from the truck into the field.

NEED TO PUMP CHEMICALS?

Certain jobs call for more than a standard pump. BE's Chemical Transfer Pumps are built with fiber/polyester housings and impellers, giving you the durability and resistance you need for moving corrosive or abrasive liquids safely.

SEE THE FULL RANGE OF CHEMICAL TRANSFER PUMPS ON PAGE 98

WATER TRANSFER PUMPS

HONDA

#THEPOWERYOUNEED

WATER TRANSFER PUMPS

Water is essential for farming, construction, and emergency use. Whether it's clearing floodwater, managing irrigation, or fighting fires, BE water pumps give you the power to control water and move it efficiently. Our pumps are built tough for heavy use and trusted by professionals across North America.

TYPES OF PUMPS

WATER TRANSFER PUMPS

Designed for moving clean water efficiently. Ideal for general use in irrigation, draining, or filling tanks. Clean water use extends pump life.

HIGH PRESSURE PUMPS

Engineered for long-distance water movement. Delivers higher PSI and lower GPM. Works well for spray applications, hilltop delivery, and emergency fire control.

CHEMICAL / POLY PUMPS

Built with fiberglass-reinforced polyester for handling agricultural and industrial liquids. Suitable for fertilizers, mild acids, and corrosive fluids.

SEMI-TRASH PUMPS

Handles water with small debris like sand or silt. Ideal for dirty job sites, ditches, and construction zones. Durable housing and quick-access bolts make cleanouts easy.

FULL TRASH PUMPS

Heavy-duty pumps for tough jobs with large debris or solids up to 1 inch. Used for flood recovery, slurry water, and high-volume site clearing.

FIRE SUPPRESSION PUMPS & KITS

Portable high-pressure pump systems designed for fire prevention and emergency response. Available as complete kits with hoses and nozzles included. Built to be ready when every second counts.

KEY PUMP TERMS

Suction Lift: Vertical distance from the water source up to the pump's inlet.

Discharge Lift: Vertical distance from the pump to the discharge point.

Total Lift: Combined height of suction and discharge lift.

GPM (Gallons per Minute): How much water the pump moves. Higher GPM means more volume.

PSI (Pounds per Square Inch): Water pressure at the outlet. Higher PSI means longer pump distance.

CHOOSING A WATER TRANSFER PUMP

High Solid Content Water					✓	

KNOW YOUR PUMP

- 1 Fuel Tank:** Always leave room for fuel expansion.
- 2 Priming Plug:** Fill the pump with water here to prime pump before starting.
- 3 Discharge Outlet:** Connect discharge hose here.
- 4 Choke Lever:** Prepares a cold engine for starting.
- 5 Air Cleaner:** Protects engine by filtering dust and debris out of intake air.
- 6 Recoil Starter:** Used for pull starting the engine.
- 7 Engine Speed Lever (Throttle):** Used to adjust engine speed to control pump output.
- 8 On/Off Switch:** Set this switch to "ON" before using recoil starter. Set switch to "OFF" to stop a running engine.
- 9 Oil Fill Port:** Check and add engine oil here.
- 10 Oil Drain Bolt:** Drain engine oil here.
- 11 Suction Inlet:** Connect rigid non-collapsible suction hose here.
- 12 Water Drain Plug:** Remove to drain water from pump and flush internal components with clean water.
- 13 Pump Chamber:** Be sure to fill with water before starting.

THE KIT INCLUDES ALL THE PARTS NEEDED TO CONVERT ANY
BE TRANSFER PUMP INTO A PORTABLE WHEELED UNIT

PART#: 85.561.011

IN THE BOX

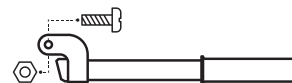

2 WHEELS

**2 AXLES
WITH AXLE PINS**

**2 SUPPORT FEET
WITH NUTS AND BOLTS**

**2 HANDLEBARS
WITH NUTS AND BOLTS**

PORTABLE WATER PUMP CONVERSION KIT

Part#: 85.561.011

- 1 2 x FLAT FREE WHEELS**
- 2 2 x AXLES WITH AXLE PINS**
- 3 2 x HANDLEBARS WITH NUTS AND BOLTS**
- 4 2 x SUPPORT FEET WITH NUTS AND BOLTS**

Water pump not included with the
conversion kit

TP-2065HT with 85.561.011 conversion kit installed

MOBILITY MADE EASY FOR EVERY BE TRANSFER PUMP

Convert your BE water pump into a rugged, portable unit.
Roll it where you need it, set it down, and get the job done.

- Flat-free wheels for easy transport
- Fold-down handlebars for control
- Heavy-duty support feet for stability
- Universal fit for all BE pumps

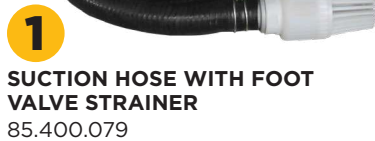

WATCH HOW TO INSTALL
THE PORTABLE PUMP KIT

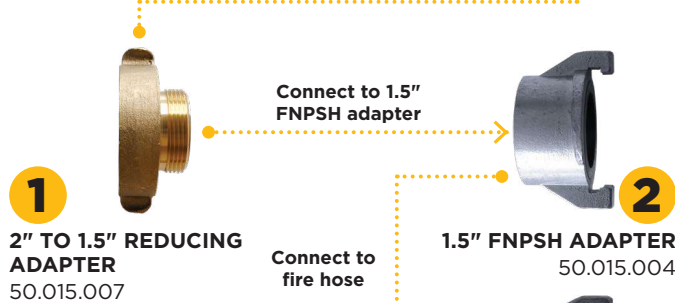

FIREFIGHTING CONVERSION

THE PARTS NEEDED TO CONVERT 2" HIGH PRESSURE PUMPS INTO A FIRE-READY SYSTEM

SUCTION INLET

DISCHARGE OUTLET

COMPATIBLE WITH:

HP-2065HR

HP-2070R

HP-2013HR

**FIRE SUPPRESSION ONLY.
NOT FOR DIRECT FIRE COMBAT.**

These high-pressure water pumps and conversion kits are designed for suppression support, not firefighting attack lines. They are ideal for spraying water around property perimeters or transferring water from tanks and ponds.

Not NFPA approved. Not intended as attack line equipment.

*The power rating of the engine indicated in this document is the net power output tested on a production engine for the engine model and measured in accordance with SAE J1349 at 3,600 RPM (net power) and at 2,500 RPM (max net torque). Mass production engines may vary from this value. Actual power output for the engine installed in the final machine will vary depending on numerous factors, including the operating speed of the engine in application, environmental conditions, maintenance, and other variables.

ECOM / E-COMMERCE READY PRODUCTS

BUILT FOR THE DIGITAL MARKETPLACE.

Our ecom ready products meet the high standards of today's online retailers and digital marketplaces. Whether you're a dealer, distributor, or global retailer, BE products are ready for the digital shelf with the assets, packaging, and fulfillment standards required for success in modern e-commerce.

WHAT MAKES A PRODUCT ECOM READY

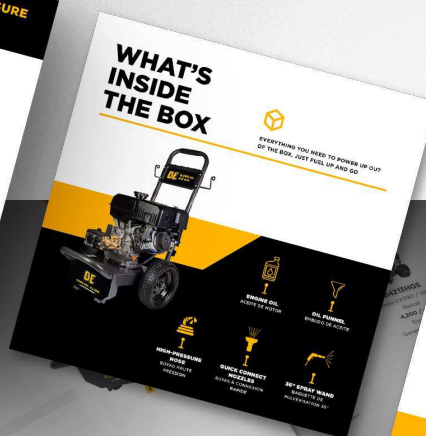

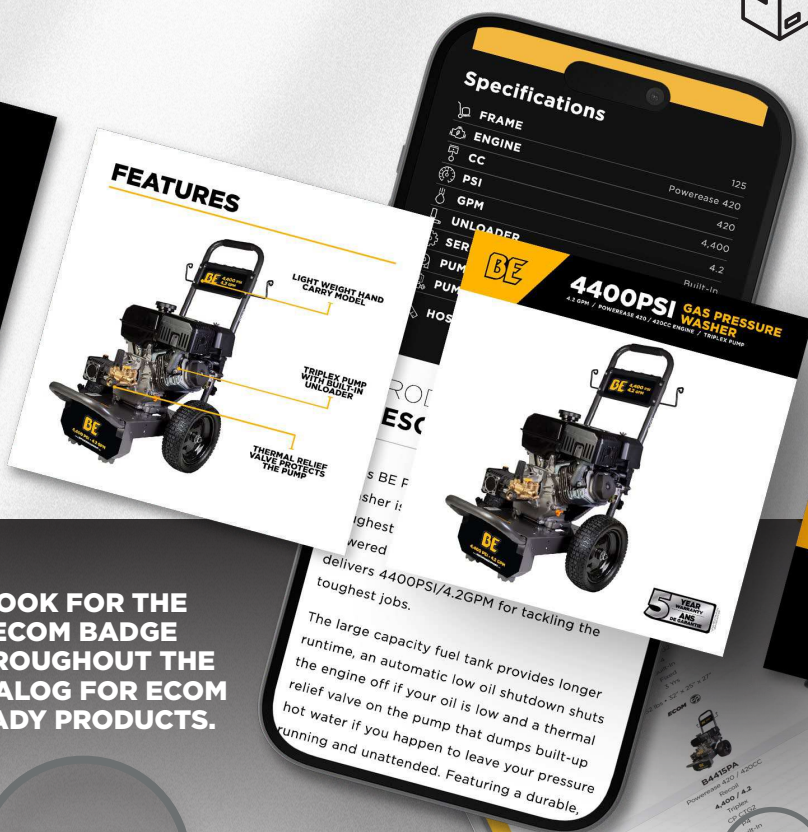

BE ecom ready products meet the full requirements for modern online retail. Each one includes:

- **Complete digital assets:** Long and short product descriptions, features, and specs ready for web listings.
- **High-quality images:** Lifestyle, carousel, and detailed product shots optimized for e-commerce platforms.
- **Infographics and callouts:** Clearly communicate key benefits at a glance on product pages.
- **Retail ready or protective packaging:** Ensures safe, professional delivery directly to the customer.

RETAIL READY PACKAGING

Most ecom ready products also feature our retail ready packaging. Designed for both store shelves and online fulfillment, RRP units combine eye-catching design with secure, efficient shipping.

LOOK FOR THE ECOM BADGE THROUGHOUT THE CATALOG FOR ECOM READY PRODUCTS.

The large capacity fuel tank provides longer runtime, an automatic low oil shutdown shuts the engine off if your oil is low and a thermal relief valve on the pump that dumps built-up hot water if you happen to leave your pressure running and unattended. Featuring a durable,

REPLACEMENT PUMPS

PMR / PUMPS MADE READY

The Pumps Made Ready logo (PMR) verifies that the pump is a complete replacement pump. All you do is unbolt your existing pump and bolt on the new one. They ship with an unloader installed, 3/8" QC for the pressure hose, 3/4" garden hose inlet with filter, thermal relief valve, soap injector, and oil.

- ✓ Total pump assembly replacement with minimal time and effort
- ✓ Remove the old pump and slide on a Pump Made Ready
- ✓ Take the guess work out of replacing a pump assembly

PMR / **PUMPS**
MADE READY

REPLACEMENT PUMPS MADE EASY

**ALL OUR PUMPS ARE EASY TO
INSTALL, BUILT TO LAST, AND
READY TO KEEP YOU WORKING.**

PUMPS MADE READY

- Pre-assembled with unloader, discharge, 3/8" quick-connect outlet, 3/4" garden hose inlet, thermal relief valve, and adjustable soap injector. Just connect and start cleaning with fast and easy installation.

DURABLE CONSTRUCTION

- Brass pump heads and stainless steel valves built for long life and heavy-duty use.

CONSISTENT PERFORMANCE

- Delivering high pressure for tough jobs like driveways, siding, and equipment cleaning.

SERVICEABLE DESIGN

- Replaceable seals and valves keep your pump working season after season.

SMOOTH OPERATION

- Precision pistons and bearings reduce vibration and extend equipment life.

NOZZLE SIZING CHART FOR PRESSURE WASHERS

Use this chart to select the correct nozzle size for your pressure washer. Match your machine's operating pressure (PSI) with it's nearest flow rate (GPM) to find the nozzle that delivers safe, efficient cleaning performance.

ORIFICE SIZE	500 PSI	1000 PSI	1500 PSI	2000 PSI	2500 PSI	3000 PSI	4000 PSI	5000 PSI
2	0.71	1.00	1.22	1.41	1.58	1.73	2.00	2.24
2.5	0.88	1.25	1.53	1.77	1.98	2.17	2.50	2.80
3	1.06	1.50	1.84	2.12	2.37	2.60	3.00	3.35
3.5	1.24	1.75	2.14	2.47	2.77	3.03	3.50	3.91
4	1.41	2.00	2.45	2.83	3.16	3.46	4.00	4.47
4.5	1.59	2.25	2.76	3.18	3.56	3.90	4.50	5.03
5	1.77	2.50	3.06	3.54	3.95	4.33	5.00	5.59
5.5	1.94	2.75	3.37	3.89	4.35	4.76	5.50	6.15
6	2.12	3.00	3.67	4.24	4.74	5.20	6.00	6.71
6.5	2.30	3.25	3.98	4.60	5.14	5.63	6.50	7.27
7	2.47	3.50	4.29	4.95	5.53	6.06	7.00	7.83
7.5	2.65	3.75	4.59	5.30	5.93	6.50	7.50	8.39
8	2.83	4.00	4.90	5.66	6.32	6.93	8.00	8.94
8.5	3.01	4.25	5.21	6.01	6.72	7.36	8.50	9.50
9	3.18	4.50	5.51	6.36	7.12	7.79	9.00	10.06
10	3.54	5.00	6.12	7.07	7.91	8.66	10.00	11.18

EQUATIONS

TO FIND THE NOZZLE SIZE:

$$\text{Nozzle Size} = \text{GPM} \div \sqrt{(\text{PSI} \div 4000)}$$

TO FIND THE GPM:

$$\text{GPM} = \text{Nozzle Size} \times \sqrt{(\text{PSI} \div 4000)}$$

TO FIND THE PSI:

$$\text{PSI} = (\text{GPM} \div \text{Nozzle Size})^2 \times 4000$$

THE SHADED CELLS ABOVE SHOW HOW TO FIND THE CORRECT NOZZLE SIZE FOR A MACHINE OPERATING AT 3000 PSI AND 4.0 GPM.

- Choose the PSI, match the nearest GPM, read across for the nozzle size.

Formula: Nozzle Size = $\text{GPM} \div \sqrt{(\text{PSI} \div 4000)}$

$$\text{Nozzle Size} = 4.0 \div \sqrt{(3000 \div 4000)}$$

$$\text{Nozzle Size} = 4.0 \div 0.866 \approx 4.6$$

Use a #4.5 Nozzle

SPRAY ANGLES

Choose the right spray angle for every job

0° - PINPOINT JET

Produces a concentrated jet stream for maximum cutting power, ideal for removing tough buildup in small areas.

Best for:

- Removing caked-on mud, tar, or grease
- Spot cleaning rust or paint when stripping is intended
- Reaching narrow gaps or cracks

Caution: Too aggressive for most surfaces and can cause damage.

15° - NARROW STRIP

Delivers a narrow, high-pressure spray that cuts through heavy dirt and coatings while still covering more surface than a pinpoint jet.

Best for:

- Heavy-duty cleaning on concrete, brick, or metal
- Stripping paint or coatings
- Removing stubborn stains and debris

25° - GENERAL CLEANING

Provides a versatile medium-width spray with strong cleaning power, perfect for most surfaces and everyday cleaning.

Best for:

- Decks, driveways, and siding
- Patio furniture, fences, and vehicles
- General outdoor cleaning jobs

40° - WIDE FAN

Creates a wide, gentle spray that safely rinses large areas and delicate surfaces without causing damage.

Best for:

- Washing windows, vehicles, and boats
- Rinsing off detergents and cleaners
- Light cleaning on wood, vinyl, or painted surfaces

65° - SOAPER NOZZLE

Produces a wide, low-pressure spray designed to apply soap or detergent for deep cleaning preparation.

Best for:

- Pre-soaking siding and fences
- Washing vehicles and boats
- Applying detergent to large surfaces

HOSE REEL SET UP

Hose Reel for High
Pressure Hose
85.402.001K

SEWER JETTER SETUP

1

1. INSTALL PLUG

- Screw the QC x 3/8" MNPT plug into the steel ball valve.

2

2. ADD REDUCER

- Thread the reducer bushing into the other side of the ball valve.

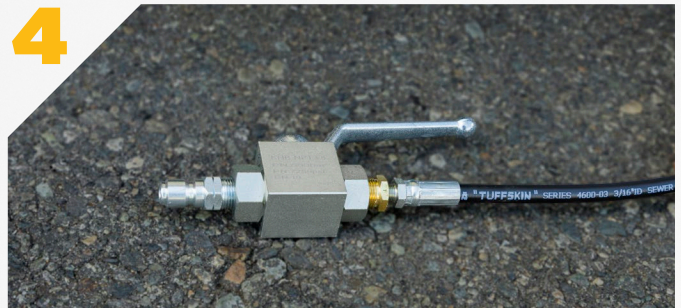

3

3. ATTACH HOSE

- Connect the sewer jetter hose to the reducer bushing.

4

4. CHECK ASSEMBLY

- Order should be: QC plug > ball valve > reducer bushing > jetter hose.

5

5. CONNECT TO PUMP OR HOSE

- Attach assembly to the quick-connect outlet on the pressure washer pump or the pressure washer hose.

6

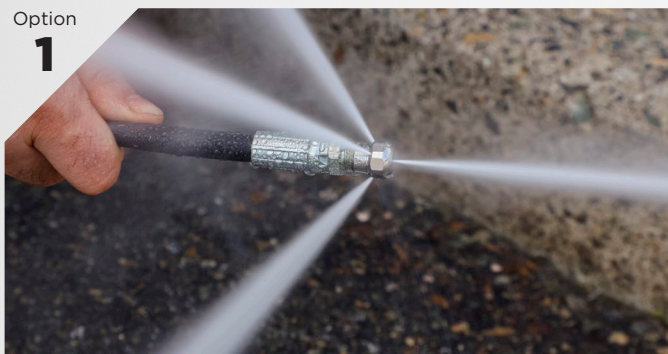

6. CHOOSE NOZZLE

- Select the nozzle type from below that suits your application.

Option

1

LASER NOZZLE

- One front jet and three rear jets cut through clogs and flush pipes.
PSI: 4,000 • Temp: 149°C / 300°F

Option

2

ROTATING NOZZLE

- Rotating rear jets drive the nozzle forward while clearing debris.
PSI: 3,650 • Temp: 99°C / 210°F

SANDBLAST KIT

COMPONENTS TO CONVERT COLD WATER GAS PRESSURE WASHERS TO A SANDBLAST SYSTEM

PART#	9001-9
NOZZLE	1/4" MNPT Tungsten Carbide 0° MEG Nozzle with 4.0 Orifice
HOSE	25ft x 3/4" Diameter Plastic Hose
PROBE	21.5" Brass Probe
MIN / MAX GPM	3.5 / 8.0

Scan to watch the sandblast kit set up video

SANDBLAST SETUP

1. ATTACH PICKUP TUBE

- Insert the flat end of the pipe into the hose and secure with the gear clamp where the hose and pipe intersect.

2. PLACE IN SAND BAG

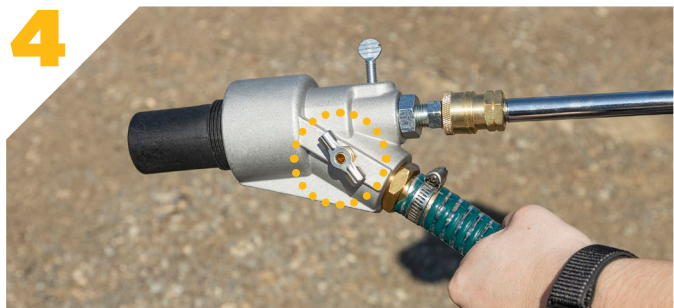

Use fine grain sand (20 grit)

- Cut a small hole in the bag and insert the pointed pipe end. Place bag and pipe away from work area to keep dry.

3. CONNECT NOZZLE

- Attach the sandblast nozzle to the quick-connect lance.

4. ADJUST MEDIA FLOW

- Turn the dial to set sand-to-water ratio. Left for more sand, right for less sand.

5. CONNECT WATER SUPPLY

- Hook up water source to your pressure washer inlet, hold trigger, and flush line with water for a few seconds.

7. BEGIN SANDBLASTING

- Start pressure washer and blast. Always test on scrap material first.

WARRANTY STATEMENT

BE Power Equipment Inc. warrants to the original retail purchaser that our new products are free from defects in material and workmanship for the timeframes set forth. If a defect is found in a BE Power Equipment product within the limitations outlined in this warranty statement, BE Power Equipment, at its sole discretion, will repair, replace, or credit the product.

The warranty coverage begins on the date of the retail purchase by the end-user. Valid proof of purchase must be presented with the warranty claim.

This warranty is limited to defects that occurred during regular operational use. It does not cover failures due to lack of maintenance, negligence, abuse, misuse, including, but not limited to, freezing damage, alterations, chemical deterioration, scale buildup, rust, thermal shock, thermal expansion, transportation damage, oil changes, valve adjustments, fuel system maintenance, or the use of incorrect parts. Furthermore, using the wrong fuel, water, or power supply is considered a form of misuse.

This warranty does not cover normal wearing items such as O-rings, valves, seals, filters, spark plugs, or packings. These are normal wearing items and should be factored into your regular maintenance schedule.

The warranty herein is in lieu of all other warranties, express or implied, including any implied warranty of fitness for a particular purpose. BE Power Equipment does not authorize any of its dealers, service centers, agents, employees, or any other party to expand, extend, or modify the scope of this warranty in any manner on behalf of BE Power Equipment.

BE Power Equipment expressly disclaims liability for injuries to persons or property, or for incidental damages, rental loss, time loss, transportation costs, or consequential damages. It is the buyer's responsibility to ensure the correct installation, application, and use of the product purchased.

HONDA ENGINE WARRANTY

Honda requires their warranty claims to be evaluated and processed at their respective authorized service centers. Locations can be found on their respective website.

REGISTERED PRODUCT EXTENDED WARRANTY

BE offers an extended warranty on its products upon registration on the website. To qualify for the extended warranty, products must be registered within 90 days of purchase. This extended warranty does not apply to Honda engines; it is your responsibility to follow and adhere to the Honda warranty processes and procedures. BE retains sole discretion in determining whether the failure results from a manufacturing defect or workmanship and is the cause of premature failure.

WARNING - LIMITATION OF LIABILITY

Use of this equipment is at the operator's sole risk.

BE Power Equipment shall not be held responsible for any **personal injury, property damage, or economic loss** resulting from:

- Improper use or maintenance
- Unauthorized modifications
- Failure to follow safety instructions or operating guidelines
- Use of the product beyond intended or specified purposes

In the event of equipment failure or manufacturer defect, BE Power Equipment's liability is strictly limited to **repair or replacement** of the product under warranty, if applicable. In no case shall BE Power Equipment, its distributors, or affiliates be liable for **incidental, indirect, or consequential damages** of any kind, to the extent permitted by law.

ALWAYS read and follow all safety instructions and manuals before operation. Improper use can result in serious injury or damage.

By using this product, you accept these terms.

FREIGHT POLICIES

Canada Customers

- Please contact your sales representative for details on freight policies specific to your shipping zone.

USA Customers

- All courier packages will be shipped via UPS or FEDEX.
- If prepaid levels are not met, orders will then be shipped via prepaid and charge.
- The total order weight cannot exceed 100 lbs - actual or cubed weight.
- Maximum weight per box cannot exceed 50 lbs (orders may be shipped in multiple boxes).
- A \$25 fee applies on residential deliveries.
- Courier-able items are at the discretion of BE Power Equipment, ie. hose, long wands, batteries, fluids, etc.
- All equipment is not courier-able due to potential freight damage.

Courier Shipment Back Order Policy

- Prepaid courier shipments that have back ordered items will be shipped via prepaid and charge as soon as the items are available.

LTL Shipment Policy

- All LTL shipments will be shipped via "Best way" based on geographical location of delivery.
- If prepaid levels are not met, orders will then be shipped via prepaid and charge.
- LTL shipments start at any items on a pallet.
- An additional fee applies on residential deliveries.
- An additional fee applies to power tailgate use.
- An additional fee applies on attempted deliveries where it is required to reschedule.
- An additional fee applies for delivery appointments.
- Fees may be billed after initial invoice.

LTL Shipment Back Order Policy

- LTL shipments that have back ordered items will be shipped via prepaid and charge as soon as the items are available unless original shipment qualified for prepaid (free) shipping.

SHIPPING CLAIMS PROCEDURE

1. Freight Damage - is defined by product arriving with observable damage to package and/or product.
 - 1.1 Freight damages **MUST** be reported within 48 hours of receipt.
 - 1.2 Damaged packaging must be photographed immediately for records.
 - 1.3 If freight company is arranged by dealer, then it is incumbent on them to contact their own freight company and file a claim directly with them.
 - 1.4 If freight was arranged by BE Power Equipment Inc., then contact BE Power Equipment Inc. with the following information (regardless of receipt or refusal of shipment).
 - 1.4.1 Purchase order of product
 - 1.4.2 Pictures of damage
 - 1.4.3 List of products effected
 - 1.4.4.4 Model Number of product
 - 1.4.5.5 Serial Number of product
2. Hidden Damage - is defined by product arriving and the package having no visible signs of damage. Upon opening the packing damage is noted on the product.
 - 2.1 Hidden damage **MUST** be reported within 48 hours of noticing the damage.
 - 2.2 Hidden damage claims cannot be reported on items received more than 6 months prior.
 - 2.3 When hidden damage is discovered, contact BE Power Equipment Inc. with the following information.
 - 2.3.1 Purchase order of product
 - 2.3.2 Pictures of damage
 - 2.3.3 Model number of product
 - 2.3.4 Serial number of product

BE Power Equipment Inc. will advise on course of action to remedy situation.
