SDH RECOGNIZED AS A FOUNDING PARTICIPANT IN REGIONAL HEALTHCARE QUALITY IMPROVEMENT INITIATIVE

SATANTA, KS — Satanta District Hospital (SDH) has been recognized as a Founding Participant in the Midwest Quality Innovation Network–Quality Improvement Organization's Excellence in Motion: Provider Recognition Program, an initiative of the Centers for Medicare & Medicaid Services (CMS). The recognition acknowledges organizations that have demonstrated a commitment to advancing healthcare quality, improving patient outcomes, and participating in collaborative efforts to address healthcare challenges across the region. By enrolling with the Midwest QIN-QIO during the launch of its 13th Statement of Work (2025–2030), SDH joins a network of healthcare providers dedicated to continuous quality improvement and better outcomes for the patients, residents, families, and communities they serve.

A Commitment to Quality and Collaboration

The Midwest QIN-QIO works with healthcare providers across a 14-state region to support quality improvement through technical assistance, evidence-based practices, data insights, and collaborative learning opportunities.

As a participant in this initiative, SDH now has access to resources and partnerships that support efforts to:

- Improve patient safety and care quality
- Strengthen care coordination across settings
- Enhance emergency preparedness and resilience
- Advance healthcare cybersecurity practices

- Support workforce well-being and retention
- Promote patient-centered care and communication

The Excellence in Motion program recognizes organizations that actively engage in quality improvement efforts and demonstrates a commitment to building stronger healthcare systems and healthier communities.

We are honored to be recognized as a Founding Participant in the Excellence in Motion program. This recognition reflects our organization's commitment to continuous improvement and our dedication to providing high-quality care for the individuals and communities we serve. We look forward to collaborating with healthcare partners across the region to share best practices and advance meaningful improvements in care.

About the Midwest QIN-QIO

Telligen and Mountain Pacific serve as the CMS-designated Quality Innovation Network–Quality Improvement Organization (QIN-QIO) for Alaska, Washington, Oregon, Montana, Idaho, Utah, Wyoming, Colorado, North Dakota, South Dakota, Nebraska, Kansas, Iowa, and Missouri. The Midwest QIN-QIO partners with healthcare organizations, clinicians, community stakeholders, and patients to advance healthcare quality, improve outcomes, and support safer, more effective care across the region.
