

# PRE-PACK MACHINERY

## Fruit Peeler

The Pre-Pack Machinery Fruit Peeler is an industrial-quality fruit and vegetable peeler built for the Fresh-Cut Produce Supplier. Its heavy-duty stainless steel material ensures a long service life and easy cleaning.

The design has been an ensured favorite for 20 years, and this is still the best semi-automatic machine available in the market today.

It reaches maximum yield by following the contour of the fruit and adjusting to the depth as needed. For example, our melon peeler will be able to adjust to the size of any cantaloupe or honeydew melon so peeling is easy. It also features stainless steel construction, total wash-down components, and an open design that makes cleaning fast and easy. It has a low noise level and doesn't require the use of protective equipment.

We use high-quality Allen-Bradley Micro Logix PLCs, Baldor inverter duty motors, and Toshiba variable frequency drives that can handle harsh conditions.

## Commercial Peelers You Can Trust

We manufacture commercial peelers for the following fruits and more:

- Cantaloupe
- Honeydew
- Rubabage
- Summer and Butternut Squash
- Pumpkins
- Eggplant
- Papaya
- Jicama
- Pineapple
- Mangos

## Features of Our Fruit Peeler

- Peels up to seven pieces per minute
- Reduces labor cost
- Adjusts automatically to products from 5" to 15.5"
- Features 7 preset speeds for your various needs
- Can be easily cleaned with standard cleaning agents
- Stainless steel construction and food-grade materials
- Peeling blades can be easily replaced in minutes
- Small 24" X 30" footprint
- Highly reliable
- Very low maintenance
- Simple to operate
- One person can operate multiple units
