Radon Test Report

August 07, 2026  
Batch #: 080726-1

| Customer:             | Test Site:            |
|-----------------------|-----------------------|
| VICTOR BORUTA         | RE18096 POM           |
| 8 CONCORD BLVD        | 8 CONCORD BLVD        |
| WINSLOW TWP/CAMDEN    | WINSLOW TWP/CAMDEN    |
| SICKLERVILLE NJ 08081 | SICKLERVILLE NJ 08081 |

Chart given below gives the results of our measurements using Rad Elect E-PERM Short-term Electrets. If there is more than one measurement done at the same location, an average is applicable. Radon concentration measured in the lowest livable area under the closed house condition is used as a guideline in interpreting the results.  
Please see the enclosed U.S. Environmental Protection Agency's document to help you in interpreting the results. These results will not be revealed to anyone else except when required by law. Hera environmental, LLC. Hera Environmental

The Results are as follows:

| Serial No. | Type | Location | Test Start Date |         | Test End Date |         | Results (pCi/L) |
|------------|------|----------|-----------------|---------|---------------|---------|-----------------|
| SPN224     | SST  | Basement | 04-Aug-2026     | 3:15 PM | 06-Aug-2026   | 4:00 PM | <LLD            |
| SPN260     | SST  | Basement | 04-Aug-2026     | 3:15 PM | 06-Aug-2026   | 4:00 PM | <LLD            |

|                                 |          |            |
|---------------------------------|----------|------------|
| Average Radon Concentration in: | Basement | <LLD pCi/L |
|---------------------------------|----------|------------|

|               |                     |          |                   |                                     |
|---------------|---------------------|----------|-------------------|-------------------------------------|
| Deployed By:  | Nikhil Rashatwar    | MET13528 |                   |                                     |
| Retrieved By: | Nikhil Rashatwar    | MET13528 |                   |                                     |
| Analyzed By:  | Subash Rashat, Ph.D | MES10152 | Reader S/N: E0732 | Reader Calibration Due: 07-Jan-2027 |

Conditions:  
Tampering: None Observed  
Weather: No Abnormal Weather Conditions

Active Mitigation: Yes

Comment:

Note: <LLD = Less than the Lower Limit of Detection (LLD) of the Radon Detector.

Radon Health Risk Information

This notice is provided to you by an organization or individual certified by the New Jersey Department of Environmental Protection to perform radon or radon progeny measurements. N.J.S.A 26:2D-73 required that no certified person disclose to any individual, except to DEP or DOH the address or owner of a nonpublic building that the person has tested or treated for the presence of radon gas and radon progeny, unless the owner of the building waives, in writing, this right of confidentiality. In the case of a prospective sale of a building which has been tested for radon gas and/or radon progeny, the seller shall provide the buyer, at the time of the contract of sale is entered into, with a copy of the results of that test and evidence of any subsequent mitigation or treatment, and any prospective buyer who contracts for the testing shall have the rights to receive the results of that testing. Any questions, comments, or complaints regarding the persons performing these measurements, or related mitigation, or safeguarding services should be directed to the New Jersey DEP. Attn: Radon Section, Bureau of Environmental Radiation (1-800-648-0394). For NJ clients, please refer to NJRADON.ORG for further information and guidance.

HERA ENVIRONMENTAL MEB93466

IF CLOSED HOUSE CONDITIONS WERE NOT MAINTAINED DURING THE TESTING PERIOD, THIS TEST MAY BE CONSIDERED INVALID AND WE WOULD RECOMMEND RETESTING.
