REPUTATION

THE CLEAR CHOICE

THAT MAKES YOUR
DECISION EASY

WHO IS ELECTRIC MIRROR

- We're an American original
- Family owned
- Invented the product and category
- Headquartered in Everett, Washington

“My family and I founded this company on the simple idea of offering the very best products, backed by the very best warranties, and supported by the very best team – and we’ve never wavered from that commitment.”

Jim Mischel, CEO

WHY CHOOSE ELECTRIC MIRROR?

- We're the undisputed leader
 - Inventor of lighted mirrors
 - Global leader for over 22 years
 - Over 50 design and utility patents to date
 - 14 additional patents pending
 - 1.5 million products in use daily
 - Distributed in over 100 countries

"From the products we create, to the components we use, to the workers we employ, our mission is to produce a product we're proud to stand behind, and you'll be proud to call your own."

Aaron Mischel, Executive Vice President

WHY CHOOSE ELECTRIC MIRROR?

- You'll be in good company

- Hospitality
- Commercial
- Industrial
- Corporate
- Education
- Healthcare
- Senior Living
- Multi-Family
- Residential Single Family

"I've been in this business a long time. And everyone in this business knows Electric Mirror is the best."

Bob Kalman, FF&E Purchasing Exec

WHY CHOOSE ELECTRIC MIRROR?

- Hotel guests everywhere love us!

LUXURY

UPPER UPSCALE

UPSCALE

UPPER MIDSCALE

"I'll never stay in another hotel again unless they have one of Electric Mirror's cool lighted mirrors in the bathroom."

Teresa Wenta, hotel guest, as written in TripAdvisor hotel review

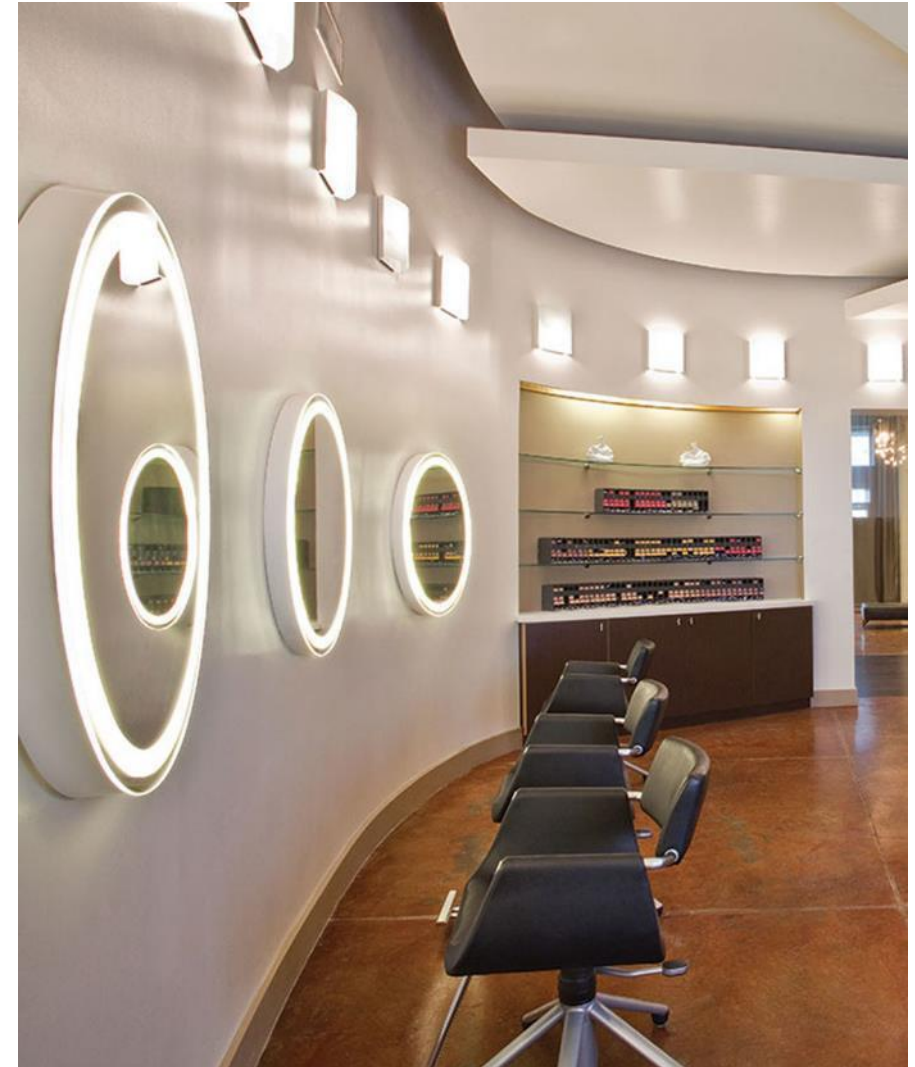

WHY CHOOSE ELECTRIC MIRROR?

- We've got your back
 - Best-in-class customer service
 - U.S. based field service team
 - Ongoing consulting
 - Best in class, nationwide commercial lighting agent network

"You can buy from Electric Mirror with confidence.

If there's ever an issue with your product, we'll stand behind it and make it right."

WHY CHOOSE ELECTRIC MIRROR?

- We eliminate the worry
 - The most experienced company
 - Single-source vertical integration
 - Warranties you can trust

“We don’t just sell mirrors, we sell peace of mind. That’s why designers, architects, and owners do business with us over and over again.”

Jon Johnston, Sr. Vice President of Sales

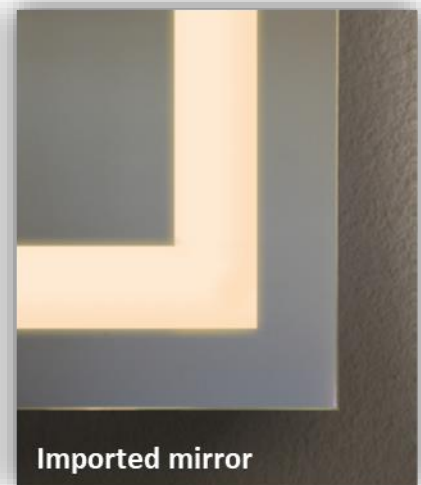

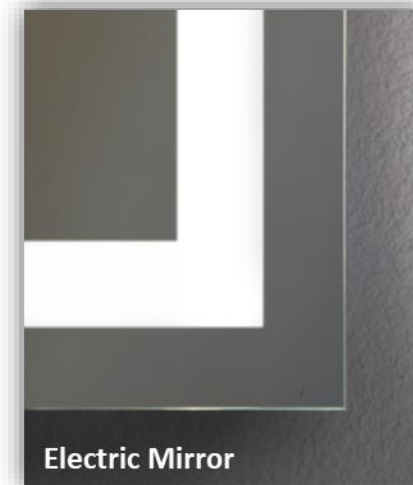

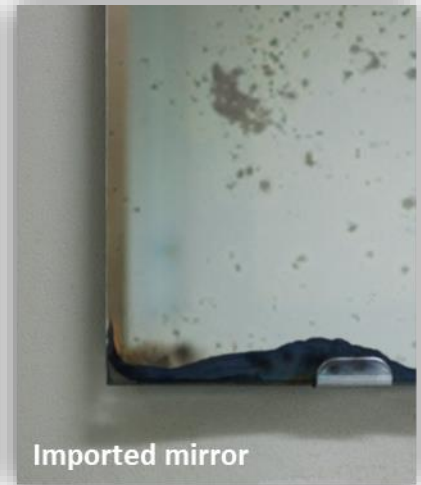

WHY CHOOSE ELECTRIC MIRROR?

- We use virtually indestructible mirror
 - Not all mirror glass is created equal
 - No other brand uses our proprietary glass manufacturing methodology
 - Ours won't distort, corrode or yellow with age
 - Our mirror passes rigorous CASS testing

"CASS testing has long been considered the gold-standard for corrosion testing. The fact that Electric Mirror has invested in its own CASS chamber and conducts regular testing is commendable. The fact that Electric Mirror's glass outperforms that of its competitors' time and time again is remarkable."

Rick McCurdy, Harvard Chemistry Ph.D. and renowned glass performance and integrity expert

WHY CHOOSE ELECTRIC MIRROR?

- We offer peace of mind
 - UL certifications for all products
 - Original, patented designs
 - No manufacturing shortcuts

"We know our products are top quality. But don't just take our word for it. UL certifications and patents speak volumes."

Patrick Erickson, Chief Design Engineer

WHY CHOOSE ELECTRIC MIRROR?

- We provide the lowest TCO
 - Highest quality components
 - Longer replacement cycles
 - Years of maintenance-free operations

“Sure, some imported products may be cheaper. But price is temporary. Value lasts forever.”

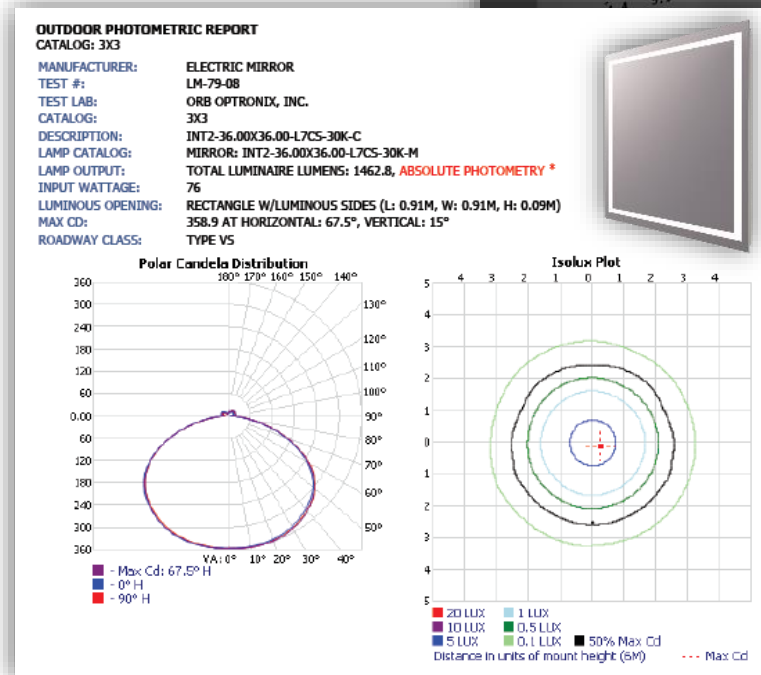

WHY CHOOSE ELECTRIC MIRROR?

- We'll provide IES files
 - In process of developing web page with IES files
 - Starting with top sellers Integrity and Silhouette
 - Will continue to add more

"We understand the commercial lighting market and the need for accurate and updated IES files and information."

Chris Hammelef, President, Commercial Lighting Division

WHY CHOOSE ELECTRIC MIRROR

- We're committed to product development
 - Invented the first lighted mirror
 - 50 patents issued to date
 - 14 patents pending
 - Extensive roadmap of products in development
 - Recent introductions:
 - Bevel Collection of lighted mirrors
 - Radius Collection of lighted mirrors
 - Poet vanishing message technology

"We built this company on innovation, and it's still a driving force behind our success."

Doc Mischel, Chairman, Vice President R&D

THE LATEST TECHNOLOGY - RADIANCE

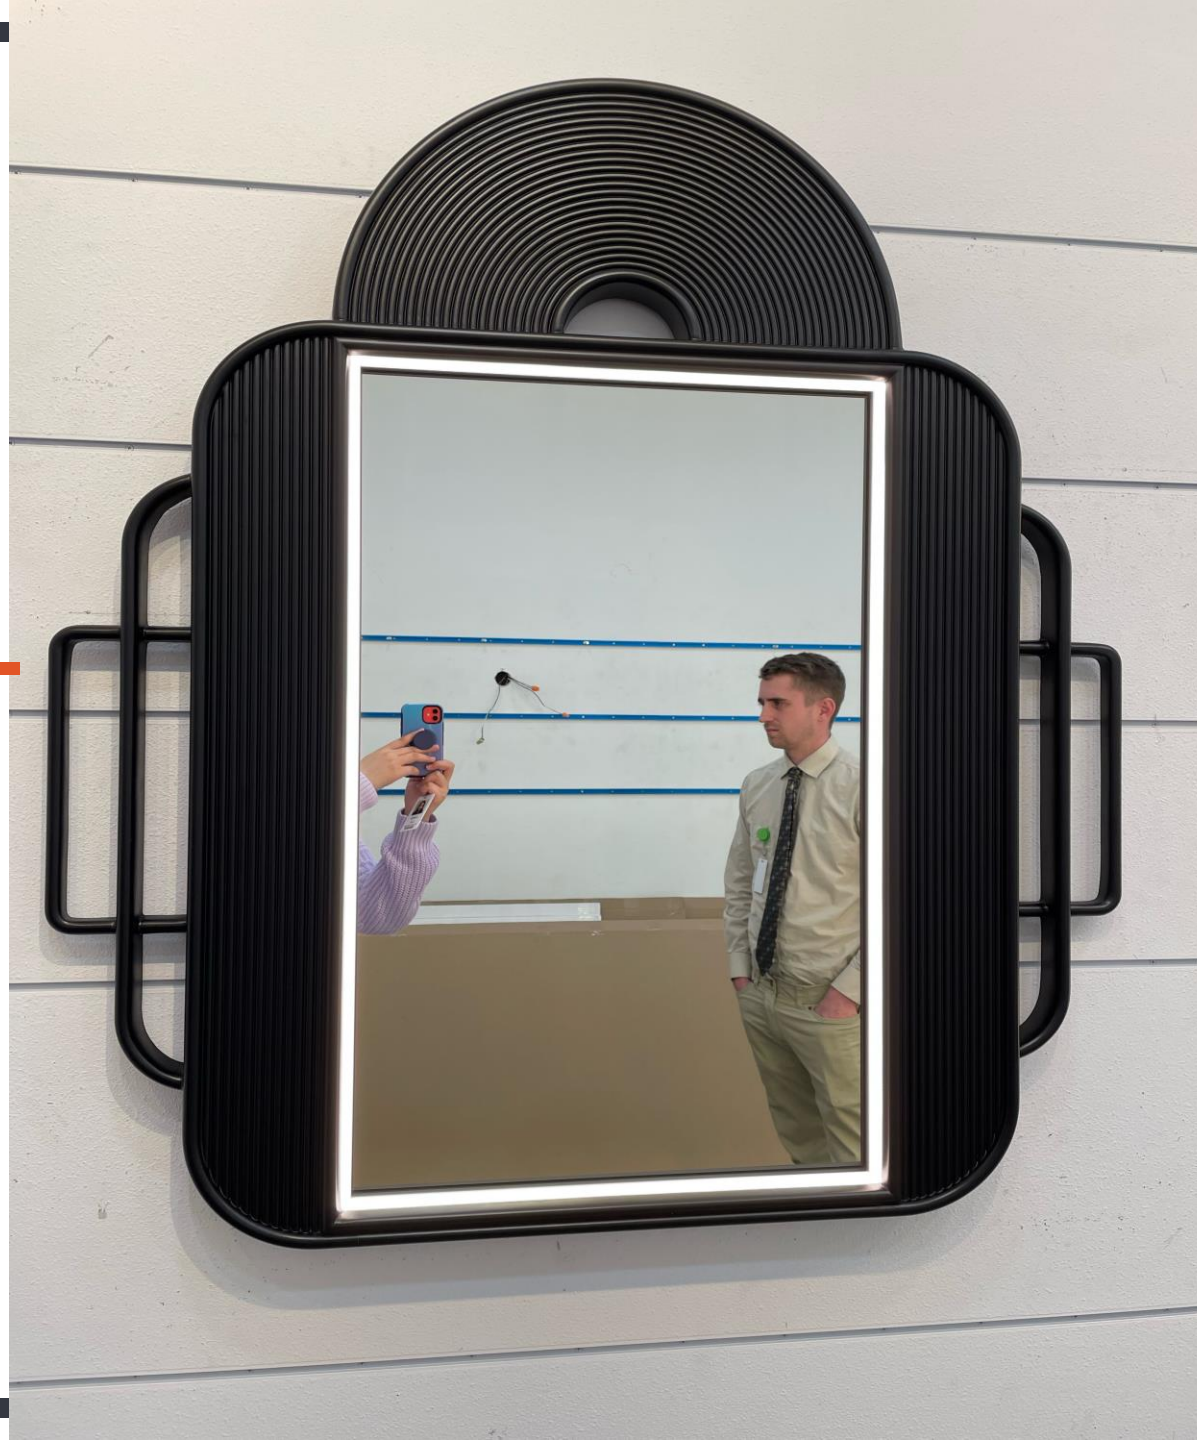

- A focus on what matters.
- Featuring inward-facing directional lighting, this front-lit mirror provides a striking border of brilliant facial illumination that creates fewer shadows and an impressively sharp reflection.
- And because light comes through built-in diffusers on the front of the mirror instead of through the mirror glass, half the wattage is needed to produce the same illuminance as a standard lighted mirror, saving you money without sacrificing performance.

THE LATEST TECHNOLOGY - RADIANCE

THE LATEST TECHNOLOGY - RADIANCE

ELECTRIC MIRROR ENHANCEMENTS

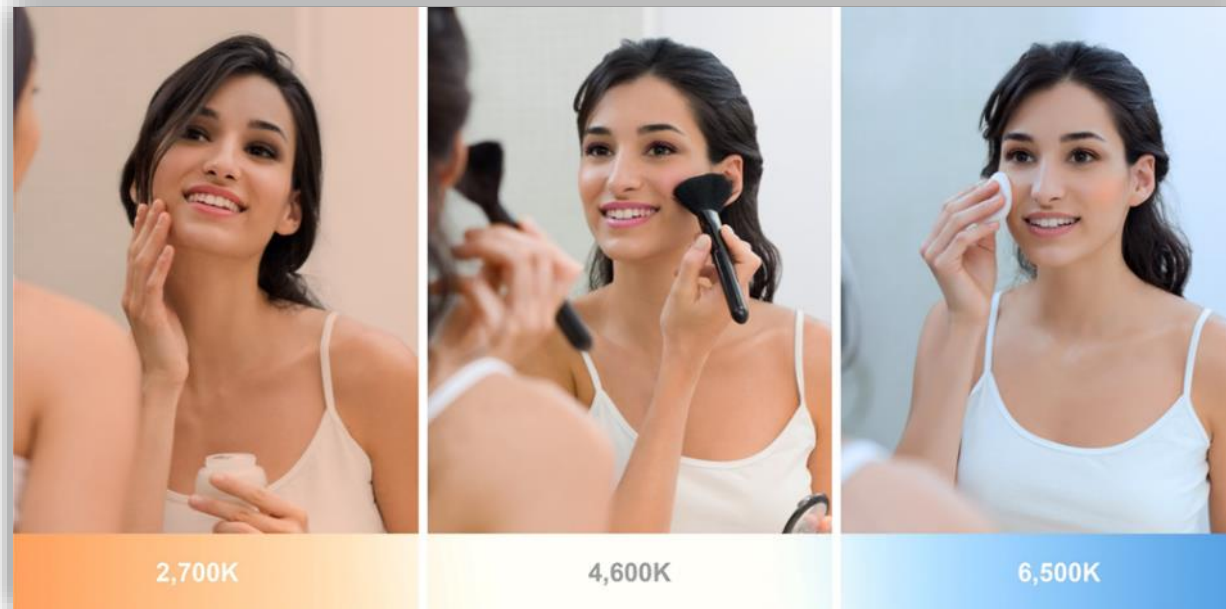

AVAILABLE TECHNOLOGY - AVA

- It's a thing of beauty.
- Color Mixing Technology at your fingertips!
 - When you look beautiful, you feel beautiful. And with Ava, you can be confident you'll look beautiful no matter where you go.
 - For optimal makeup application, Ava lets you adjust your mirror's LEDs, selecting the color that best matches the environment you're preparing for.
 - Outdoors, indoors or an evening out, Ava helps you look your beautiful best.
- This feature is not motion activated

AVAILABLE TECHNOLOGY - AVA

After one hour of non-use, Ava's Energy Save Mode automatically dims the lights to 25% brightness at 2,700K. Tapping the button in this state returns it to 100% brightness at 2,700K.

THE BEAUTY OF SIMPLE INTERACTION

Mirror first turns on at 2,700K at full brightness. Tap to cycle through 2,700K, 4,600K and 6,500K.

AVAILABLE TECHNOLOGY - CAMEO

The possibilities are endless.

- Design an exhilarating space. Inspire a whimsical feeling.
- Revive a glamorous era.
- With Cameo Laser Designs, you can create your own unique lighted mirror masterpiece.
- We invented the art of laser-etching for lighted mirrors, and no other company offers you the proprietary technology necessary to bring your inspiration to life with laser-etched perfection.

AVAILABLE TECHNOLOGY - CAMEO

- We invented the art of laser-etching for lighted mirrors, and no other company offers you the proprietary technology necessary to bring your inspiration to life with laser-etched perfection.

AVAILABLE TECHNOLOGY - KEEN

- The brightest way to dim.
- Bring your lighted mirror to life with the beauty and functionality of Keen dimming.
- With one simple touch, this latest generation of our patented Keen technology offers the richest dimming experience, the smartest eco-friendly technology, and the highest return on your investment.

AVAILABLE TECHNOLOGY - KEEN

- With one simple touch, this latest generation of our patented Keen technology offers the richest dimming experience, the smartest eco-friendly technology, and the highest return on your investment.
- Energy consumption is reduced on average by 60%, making a big impact automatically.
- This feature is not motion activated
- New California code requires dimming

BRIGHT LIGHTING
Ideal for tasks such as hair styling and shaving.

STANDARD LIGHTING
Good for general room illumination.

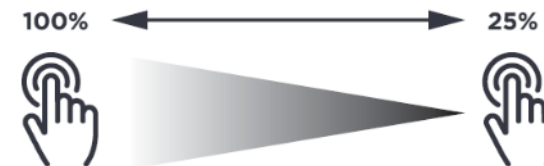

SOFT LIGHTING
Great for creating a relaxing atmosphere.

NIGHT GLOW LIGHTING
Convenient for guiding you when the room is dark.

THE EASIEST OPERATION

Tap to cycle through On at 66%, 100%, Night Glow, 25% and back to 66%.

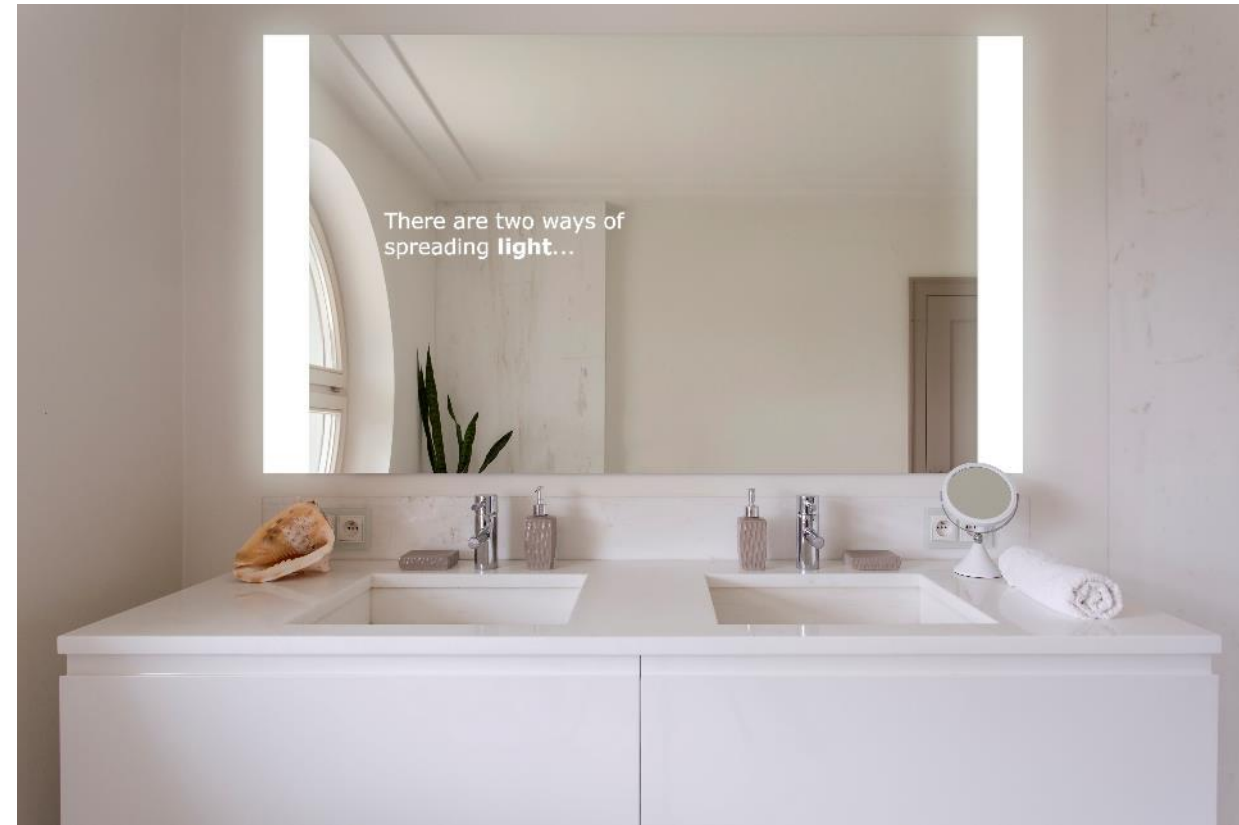

Touch and hold to gradually change light between 100% and 25% brightness.

After one hour of non-use, Keen's Energy Save Mode automatically dims the lights to 25% brightness.

AVAILABLE TECHNOLOGY - POET

- Vanishing messages that captivate.
- Poet technology allows messages to unexpectedly appear, then vanish, in the mirror.
- Using Poet, hotels can captivate their guests' attention with poetic words, phrases or quotes that elicit positive feelings, raise esteem and preference for the hotel brand, and result in return visits and increased occupancy.

AVAILABLE TECHNOLOGY - POET

- A unique way to connect with people that will leave them feeling pleasantly surprised and thoroughly delighted.
- Poet lets you inspire people with messages that unexpectedly appear, then vanish, in the their mirrors.

AVAILABLE TECHNOLOGY - POLARIS

The best solution to light the way.

- Like its Northern Star namesake, the Polaris Wire-Free Nightlight illuminates your way and helps you navigate your surroundings.
- Better yet, because it's battery-powered, it eliminates the added and often hidden costs associated with hardwired nightlights.
- Only Polaris offers you the unsurpassed value of wire-free, battery-powered, rechargeable nightlight functionality.

AVAILABLE TECHNOLOGY - POLARIS

- Features a 2,200K amber light color that minimizes sleep disruption
- Motion active light turns on when you enter the bathroom and turns off 3 minutes after motion is no longer detected
- The batteries recharge from the electricity that powers the lights in the mirror when the lights are turned on.
- Installed during factory assembly

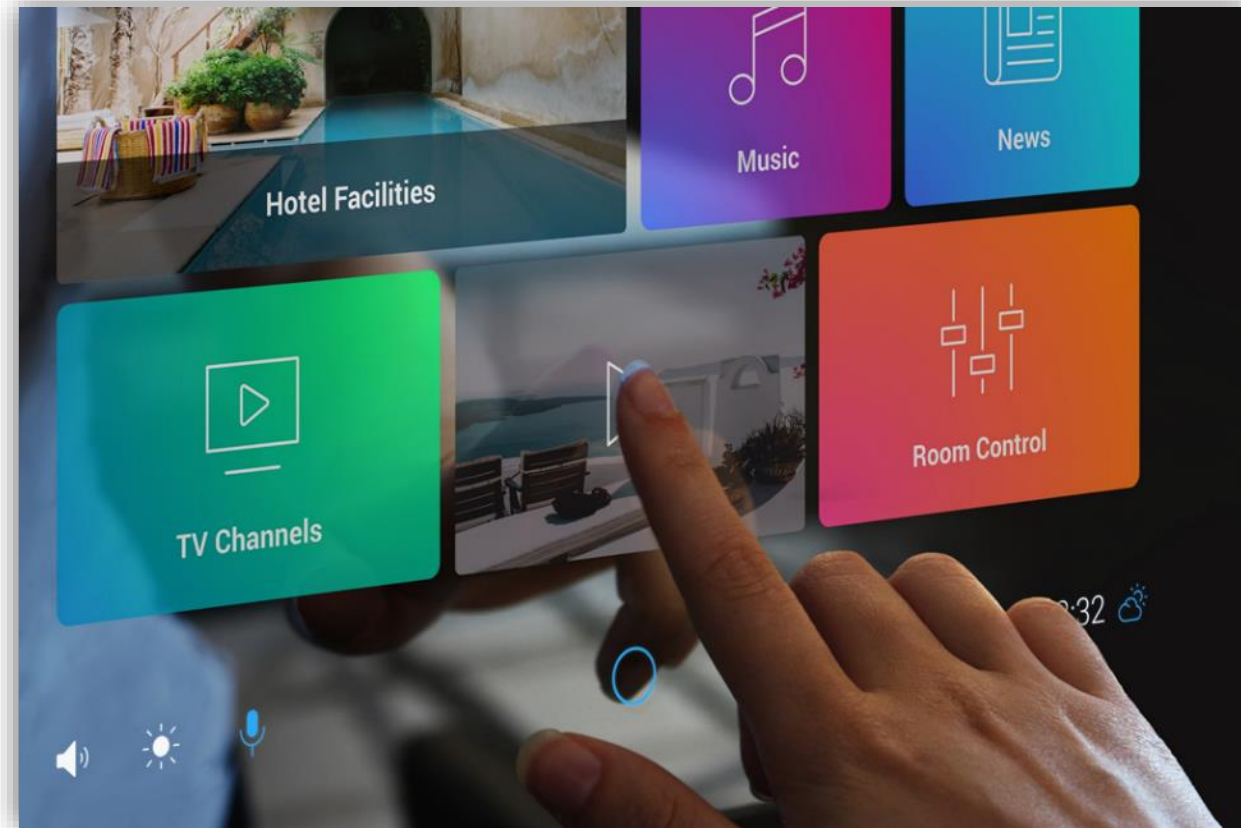

AVAILABLE TECHNOLOGY - SAVVY

- Helping to redefine the customer experience.
- Like an in-room concierge, Savvy is an interactive mirror display that provides information on services, nearby attractions and local weather.
- It lets users customize the environment to their liking with music, lights and video.
- And it provides for two-way communication between you and your customers.
- With Savvy, you'll create the ultimate experience that will have them coming back for more.

AVAILABLE TECHNOLOGY - SAVVY

- Command central of your life!
- Enhanced functionality that comes from compatibility with Android-based App or Device
 - Health and wellness apps
 - Social Media
 - News
 - Sports
- When turned off, the display vanishes completely, leaving nothing but a stunning mirror for you to enjoy.
- Turn Savvy on, and that same mirror becomes the technological heartbeat of your home.

AVAILABLE TECHNOLOGY - SEAMLESS

- Flawless time without equal.
- An innovative and convenient upgrade, the Seamless LED Clock is a must-have addition for any of our lighted mirrors.
- Featuring illuminated digits that show through the mirror without the distraction of a clock display window, Seamless creates an image of time that flawlessly blends in with the mirror's surface.

AVAILABLE TECHNOLOGY - SEAMLESS

- Wiring Options
 - Hard wired to separate circuit, is on all the time with our without lights
 - Hard wired with lights, turns off with mirror via wall switch
 - Cord Connect to Power socket behind mirror

Seamless
Clock

Other
Clocks

AVAILABLE TECHNOLOGY - VIVE

- Music in your mirror.
- Fine tune your lighted mirror with Vive and turn any room into your own personal amphitheater.
- Vive allows you to pair your Bluetooth-enabled smart phone or tablet to your mirror, instantly transforming it into a wireless stereo system.
- Simple and easy to use, Vive can create a symphonic streaming audio experience in any space.

LIGHTING CONFIGURATIONS

ENCLOSED CHASSIS WITH TASK LIGHTING

Designed to maximize direct, forward-facing illumination, this style is ideal for precision tasks such as makeup application and shaving. The fixture includes a white powder-coated chassis for a finished side view, with LED lights that are installed on the interior, directing light forward through the frosted areas of the mirror surface. For Mirrors with an enclosed chassis see 'Standard Frost Patterns' section.

OPEN CHASSIS WITH TASK LIGHTING AND WALL GLOW

With this style, the LEDs are installed with diffusers on the outside of the chassis for a finished side view, while also providing both forward-facing task lighting and a soft halo of light glowing around the perimeter of the mirror for added room ambiance. Since this style allows light to emanate from the sides, the forward-facing task lighting may be perceived as less bright than that of an enclosed chassis. For Mirrors with an Open chassis see 'Standard Frost Patterns' section.

OPEN CHASSIS WITH WALL GLOW ONLY

Maximizing the ethereal light radiating from the sides of the mirror, this style features an open chassis with wall glow only, emitting light from LEDs installed with diffusers on the outside of the chassis for a finished side view. This style is designed to provide beautiful ambient light that appears to be glowing from within the wall. For Mirrors with an Wall Glow only see 'Standard Frost Patterns' section.

DIAMOND CLEAR

- ELECTRIC MIRROR® is now the only lighted mirror, mirror TV, and lighted mirror TV manufacturer to use Diamond Clear™ pure white glass on the full standard product line.
- A pure white glass has a neutral edge that fits any color palette.
- In standard industry glass, the green tint in the glass can actually affect the light color. With Diamond Clear™, our natural lighting from 3000K LEDs transmits through the glass, unimpeded by an unwanted green hue.
- Electric Mirror's Diamond Clear™ product is the only one that can boast a true natural reflection. Eliminate a green-tinted reflection by using Diamond Clear™ pure white glass in your next project.

Diamond Clear

Regular Mirror

TV MIRROR GLASS

IRIS

Iris® mirror, used on our Savvy™ SmartMirror™ and Eclipse™ TV Cover, offers stunning quality, reduced glare, and a viewing experience close to that of a standard monitor or HDTV. The display virtually vanishes when off, leaving only a subtle, faint outline of the display perimeter that may be noticeable up close. Iris is the first mirror glass that allows viewing even in daylight environments. Iris mirror is slightly darker than a typical mirror, making it ideal for bedrooms and living rooms.

SPECTRUM

Best suited for bathrooms that are not all white or overly bright, Spectrum™ is excellent for makeup application and preparing for the day. Spectrum mirrors have a highly reflective mirror surface and provide a good TV image when turned on. When the TV is off, the screen area is camouflaged, leaving only a light gray image where the TV is located. For maximum TV clarity in all-white, or brightly lit bathrooms, see our B-Series technology below.

B-SERIES

Ideal for all-white or brightly colored bathrooms, B-Series™ is a custom option that provides a crisp, clear viewing experience with reduced glare. B-Series mirrors have a highly reflective mirror surface and an impressively bright TV image when turned on. When the TV is off, the TV screen area is black.

LIGHTING COLOR

- Electric Mirror is the leader in natural-looking LED lighting that reflects true beauty.
- Color temperature, measured on a Kelvin (K) scale, is often an aesthetic choice.
- Since we know a bright, warm color is generally most flattering, we designed our mirrors with the standard light temperature of 3000K.

PHOTOMETRY, CRI AND CHROMATICITY

- For every model room we measure
 - The light in terms of it's perceived brightness to the human eye (Photometry)
 - The quality of color beyond just how bright something is (Chromaticity)
 - The ability of the light to reveal the colors of various objects as compared to natural light sources (CRI – Color Rendering Index)
- These are provided along with the model room mirror

- Data for how lighting affects the designed space
 - We know different materials affect how a room appears
 - We are working to provide the data needed for our units to upload into architectural programs simulating the light of a room

INSTALLATION MAKEUP MIRRORS

1. Remove cover plate from base of makeup mirror
2. Affix mounting plate to electrical box and wire per instructions
3. Replace decorative cover

WHY ELECTRIC MIRROR?

WHY CHOOSE ELECTRIC MIRROR

- We invented the Lighted Mirror!
- Domestic and International Options
- Vertically Integrated Factory – not an assembly shop
- Lowest total cost of ownership
 - Highest quality components
 - Longer replacement cycles
 - Years of maintenance-free operations

“Sure, some imported products may be cheaper. But price is temporary. Value lasts forever.”

Don Jacques, Chief Operating Officer

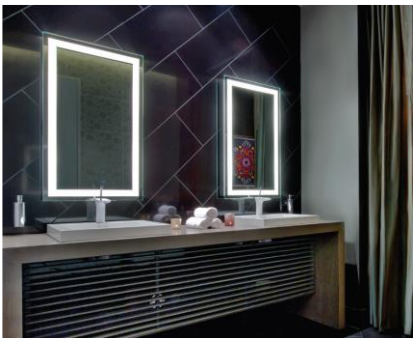

COMPETITIVE ADVANTAGE

- Overall product quality and support
- Production in USA vs. Globally
- Product design; light and frost pattern
- Quality of material used for the chassis and the mirror
- Custom design and engineering options
- Product warranty
- Client list and history in industry
- All integrated technology options
- Product and glass upgrades
- Company's customer service policies
