## GET YOUR GLOW ON!

### Skin Brightening/Anti-Aging

Get Your GLOW On! Pads with TCA reduce the appearance of fine lines, wrinkles, blemishes, and scarring. They stimulate the production of collagen by increasing ceramide and free fatty acid levels in the skin. They work to protect against cell damage and accelerate cellular turnover to brighten skin. Safe and effective for all skin tones.

#### Key Active Ingredients:

- Glycolic Acid: Tackles hyperpigmentation, dullness, and signs of skin aging, such as lines and wrinkles
- Lactic Acid: Improves signs of aging. Stimulates collagen renewal and firms skin. Hyperpigmentation (sunspots or age spots) fades and fine lines and wrinkles soften and smooth out.
- Mandelic Acid: Accelerates cell turnover by dissolving the tiny bonds that hold skin cells together, helping to remove dead skin on the surface that can lead to dull complexions, as well as fine lines.
- Salicylic Acid: Accelerates cell turnover. Helps remove dead skin on the surface that can lead to dull complexions, as well as fine lines.
- Phytic Acid: Helps to clear out and shrink pores while also helping to brighten the skin following post-inflammatory lesions.
- Azelaic Acid: Helps fight acne, treat rosacea, lighten pigmentation, and remove dead skin cells.
