Ranch-Rail Fencing

Mendota

"Available in 2, 3, & 4-rail"

Crossbuck Mendota

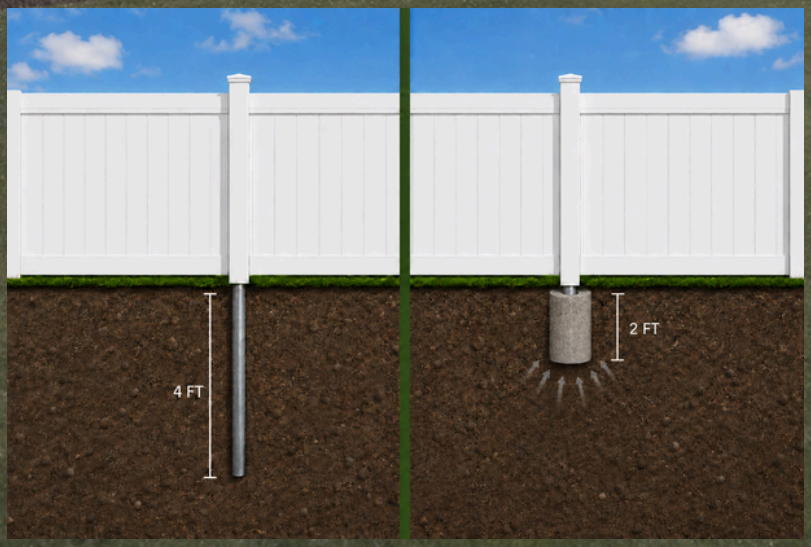

Steel Driven Posts

Strength below the surface.

- WT-40 steel posts are driven approximately 4 feet into the ground and concealed inside each PVC post.
- The narrow, deep-driven profile gives freezing soil less surface area to lift than a wide concrete footing, helping reduce frost heaving and keep the fence straight and aligned.
- Galvanized inside and out for lasting strength and corrosion resistance.
- WT-40 steel pipe has a minimum yield strength of 50,000 psi and meets ASTM F1043, Group IC specifications.

Information & Options

- Custom spacing/design is available.
  (additional fabrication wait-times may apply)
- High quality, low maintenance
- UV protection to prevent fading
- Multiple color and style options
- Steel posts for exceptional durability
- Ability to work with nearly any terrain
- Earth tone colors
- Reinforced bottom rail
- Good neighbor construction
- Made in the USA

Post Cap Options

Inside Pyramid

Outside Pyramid

French Gothic

New England

Picket Top Options

Pointed

Dog Ear

Fence Color Options

White Almond Clay

Information & Options

Gates

- Custom gate sizes
- Self-closing hinges and latches available
- Diagonal brace bars help prevent sagging, keep gates aligned, and provide lasting strength and smoother operation.

Standard Latch

- Powder coated stainless steel hardware and fasters (black and white hardware options)

Keystone Latch

- Design & Operation: Features a thumb-release push button on one side and a gravity latch lever on the opposite side. It allows secure locking and unlocking from either the inside or the outside.
- Weather Resistance: Engineered to resist rust, corrosion, and UV rays.
