TURN USED OIL INTO SHOP HEAT

1. Turn used oil into free heat
Start saving your used oil to turn into quality heat for your shop.

2. Slash your heating bills
Cut or eliminate propane, natural gas, or electric heating costs.

3. Reduce cradle-to-grave liability
Burn used oil onsite to eliminate long-term environmental risk.

Dependable

Superior-quality components provide long-lasting performance, even in the harshest environmental conditions.

Efficient

Using zero-loss drain technology minimizes energy consumption, reducing cost of ownership and environmental impact.

Innovative

Hot-gas bypass and active mesh vapor capture are among the market-leading methods employed in ABAC dryers to deliver superior performance combined with unparalleled reliability.

DATA-DRIVEN DIAGNOSTICS WITH ENHANCED PID ANALYSIS

Data Visualization: Enhanced graphing capability to visualize multiple parameters to identify the relationship between PIDs and pinpoint system anomalies.

Live Data Fusion: Record and compare value changes across multiple systems.

Parameter Grouping: Multi-PID selection for analyzing related parameters simultaneously. Ideal for engine fault and performance and emissions troubleshooting.

Reference Sampling: Record, store, and review selected PIDs for pre- and post-repair comparison that will flag min, max, and average.

Real-Time, Split-Screen Analysis: Access the oscilloscope directly from the current Live Data screen.

CALL FOR DETAILS

From electronically controlled compressors to advanced heat pumps, modern vehicles demand diagnostic tools built for this new era – intelligent, connected, and precise.

- Step by step guided instructions for equipment hookup and the entire repair workflow
- Vehicle-specific overview of A/C specifications and locations, including compressor and refrigerant metering types
- A single screen workflow that incorporates HVAC live pressures and OBD sensor values, including blend door functionality and outlet temperature readings
- First A/C tool that will conclusively identify refrigerant leaks and/or excessive moisture
- Introducing the use of Nitrogen for a pressure leak test "system tightness test" and purge procedures for faster evacuation

- First A/C manifold gauge tool that decouples from the A/C lines while still monitoring low & high pressures
- Variable displacement compressors test by either OBD bidirectional commands and/or physical connection to the ECV valve while comparing live low & high side pressures on a single tool
- Large sight glass allows for visual inspection for excessive UV dye, oil contaminants, component failures caused by heat, and solid particulates
- Self-diagnostics to determine equipment efficiency, tightness, and accuracy

X-939 Intelligent Driving Calibration System

The X-939 Intelligent Driving Calibration System is designed to meet the growing demand for precise ADAS calibration and 4-wheel alignment in modern repair shops. As vehicles continue to evolve, accurate calibration and alignment are essential for both safety and performance.

- **Automatic ADAS calibration:** 4 high-resolution cameras and 4 high-precision motors can be used to complete ADAS alignment and parallelization
- **Target tracking and finding:** Supports automatic tracking and finding of targets by the camera.
- **Real-time self-calibration:** Real-time self-calibration between camera modules to adapt to automated movements.
- **Dual-screen streaming synchronization, two-way control:** Supports 24-inch high-definition display and 13.3-inch diagnostic tablet streaming synchronization, and two-way control, making operation more convenient.
- **High-precision motion control:** Equipped with 4 axial high-precision stepper motors to meet the automation of forward, backward, left, right, rotation and lifting movements.
- **Ground level compensation:** Calculate the vehicle's level performance through four camera modules, and adjust the pitch and roll knobs to meet ADAS calibration requirements.
- **Target distance measurement recognition:** No need for manual measurement, just place the distance measurement target to quickly complete the distance measurement.

Go to: <https://napaterebates.spotplatforms.com>

Click on "Create an Account" to create your rebate account

You'll receive a verification email and will need to click the link in that email to verify your account in order to login for the first time

Click on "Submit Application"

Select the applicable promotion from the corresponding supplier, to submit your application

Follow the steps for completing the rebate application

Eligible rebate value is restricted to the base purchase price of the product, excluding any local, state, federal taxes or shipping charges.

You must purchase a minimum of \$1,000 from any single supplier that you are claiming a rebate from, anything below \$1,000 will not qualify. You will need to upload a copy of your NAPA invoice with your application.

IMPORTANT: Hit the green "Submit" button on the final review page to submit your application for approval.

You will receive a notification once your rebate has been approved and funds are available in your SpotRebate account.

Once you get this approval notification, you can login and redeem your rebate funds for a reward card.

Options include prepaid debit cards and retail gift cards.

Purchases must be made between October 1, 2026 and December 31, 2026.

All rebate applications must be submitted prior to 11:59pm Eastern Time on February 28, 2027.
