Ag Leader®

Over thirty years ago, Ag Leader was started by an engineer with a dream of making farmers' lives better. That dream led him to inventing the first commercially successful on-the-go yield monitor. Today, we have that same goal as we bring precision technology to the market, helping farmers plan, apply and harvest more efficiently and accurately.

Ag Leader SMS is a precision farming software that helps farmers make data-driven decisions for their field activities. SMS has two versions: SMS Basic and SMS Advanced, each with different features and capabilities.

SMS Basic allows farmers to process data from most precision ag displays, generate crop plans, create and manage guidance lines, print summary maps, charts and reports, write simple prescriptions, and more.

SMS Advanced offers more in-depth analysis tools, such as creating report and print layouts, discovering yield influencers, revealing management zones, creating formula-based prescriptions, interpreting NIR imagery, better visualizing field topography, managing operational activities. SMS Advanced also has additional modules that can be purchased separately, such as Booklet Printing, Water Management, Plot Prescription, and Field Trial and more.

Ag Leader SMS also has a mobile version, SMS Mobile, that allows farmers to collect information from the field using any portable device, such as mapping field boundaries, soil sampling, crop scouting, coverage, and general logging.

SUREDRIVE

- Individual Row Section Control: Save seed and plants by shutting off rows individually preventing seed wastage and plant damage.
- Variable Rate or Prescription Based: This feature enables the planter to adjust the population according to the field conditions and the desired outcome.
- Turn Compensation: Keep population consistent around curves and slopes by adjusting meter speed.
- Design: The SureDrive unit is maintenance free and sealed for quality and durability.
- Fits Most Meters: Compatible and flexible with almost any planter meter.
- Powerful: This feature highlights the strength and performance of the SureDrive unit, which has four sturdy gears, precision bearings, a drive chain and a synthetic fluid bath.
- Tech Specs: 2-90 RPM, 12-volt, 6.2 amps, 4.5 Nm torque

Ag Leader®

STEADYSTEER

- Complete system for steering, planting, application, harvest and more
 - Controlled by Ag Leader's InCommand displays
 - WAAS to RTK ready for pass-to-pass accuracy
 - Fit to most vehicles with 13 motor orientation options and detachable motor
 - Fast line acquisition in tough terrains
 - All-in-one user experience with InCommand displays
 - Easy installation on steering column of various machines
 - Portability and simple transfer between vehicles
- Tech Specs
- High-torque motor and durable gear teeth design
 - User-friendly calibration and tuning from InCommand display
 - GPS compatibility with Ag Leader receiver and correction source options
 - Fits hundreds of agricultural vehicles

SUREFORCE

- Replaces manual springs or airbags that have a delay in response
- Instant automatic response to overcome tough field conditions by adjusting for soil types, conditions, tillage practices, compaction, light soils, weight on planter and more
- Easy to operate with three system settings (low, medium, high) and no margins or guessing
- Fits most planters from 1 to 36 row configurations
- Powerful dual-acting, hydraulic, and responsive actuator

SureForce has advanced tech specs that:

- Individual row control to monitor, record and control weight needs of each row
- Up to 250 pounds of uplift and 650 pounds of downforce
- 200 readings per second from gauge wheel sensors on every row

NEW ARRIVALS

FURROWRUNNER

MAKE FURROWS, EVEN AFTER PLANTING.
DOESN'T BUILD A RIDGE & LESSENS THE CHANCES OF ROOT PRUNING.
IMPROVES WATER FLOW EFFICIENCY.

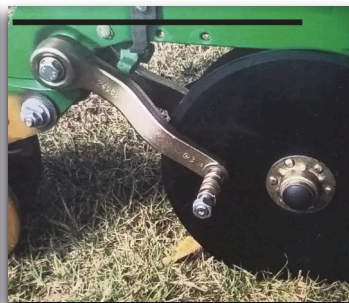

THE FLAT 20 IN. DOUBLE DISC VINECUTTER POWERS THROUGH AND PUSHES BACK DIRT & RESIDUE CREATING A NARROW, BUT DEEP GROOVE THAT WON'T COLLAPSE.

THE FURROWRUNNER CREATES EFFICIENT WATERWAYS THROUGH HIGH-RESIDUE CONDITIONS. GREASEABLE HEAVY-DUTY PARALLEL LINKAGE.

NORSEMAN

Norseman Gauge Wheel Arm Kit
 for JD XP, ME5, EE, JD 1530, 1535 drills with XP row units, Harvest International. Includes 2 arms and hardware to bolt arms to row unit and to bolt gauge wheels to arms for one row.
 (Rotary scrapers are NOT compatible with Norseman arms.)

Norseman scraper ring for JD, Kinze, gauge wheel unique mounting method allows flex to avoid mud build-up. Conical profile keeps the scraper ring securely mounted and maintains optimal angle of attack. Clean opener blades make for a well-defined seed trench. Use in conjunction with Norseman roller bearing gauge wheel arms to dramatically reduce maintenance intervals.

COVER CROP

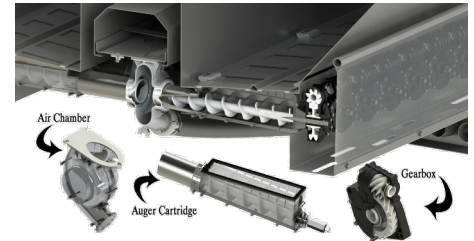

Complete Dry Fertilizer Application System

to help you start reaping the benefits of Deep Band fertilizer.

-High Capacity 6 or 9 Ton Poly Tank.

-Poly Tank & Lid are made out of a high quality plastic with UV stabilizer to increase the life of the tank and lid. All components are stainless or plastic that are in direct contact with fertilizer, for maximum corrosion resistance.

-Proper placement can increase yields & can reduce Your Fertilizer Costs By as much as 30%. - Montag patented Auto Steer System Allows for easy maneuvering, tighter turns and less crop damage with controlled traffic patterns.

**MONTAG AUTO-STEER CART + CAMSO TRACK
= UP TO 70% LESS YIELD ROBBING COMPACTION**

CORN COUPLER DISCHARGER

20Cu. Ft. (Approx. 16 Bushels)

Steel Hopper With Hinged Lid.

24 Individual Meters On Single Shaft - 12 Face Left and 12 Face Right for Convenient Hose Routing. 1" Diameter Hose Required. Metering Wheels Suitable for Use With Many Commonly Used Small Seeds.

Hydraulically Driven Blower (8 GPM Required Variable Rate Hydraulic Drive (Less Control Console).

NOTE: Control System Must Be Capable of Controlling Pulse Width Modulating Valving. Mounted To A Square Tube Base For Ease of Mounting on A Variety of Equipment. Hopper Access Platform Included.

TURBO-SEEDER COVER CROP ATTACHMENT TILLS AND SEEDS IN THE SAME PASS WHILE ALLOWING EVEN SEED DISTRIBUTION!

Reap the benefits of both cover crop crops and true vertical tillage with the new **Turbo-Seeder™** attachment for **Turbo-Max™**. *Till your soil, size residue and plant cover crops in one pass!*

COVER CROP

Gandy Orbit-Air One of the leaders for planting cover crops & small grains. The 62 series has 16 or 24 outlets with slide closures, 12v motor, metering wheels, weather-tight cover, fill platform and a hydraulic blower.

LOW PROFILE HEADER MOUNT (pictured at left) is 8 bu. and 18 outlets with a split shaft. Puts out rye grass, turnips, tillage radishes and more in a single pass while harvesting row crops

Seed Cover Crop While You Harvest! Save a Trip...

ADU DRILL UNITS

ACHIEVE UNIFORM
PLANTING AND
FAST EMERGENCE

DAWN  **underground agriculture**

The **DuoSeed** cover crop Inter-Seeder is tailored toward the next generation of cover cropping techniques. The system helps with early stand establishment of dual plant cover put directly into row crops.

Founded in 1984, *Ag Spectrum*[®] aims to revolutionize agriculture with the Maximum Farming System. Combining ongoing research *improve fields, yields, and real-world* farming experiences, they . With over 100 representatives in 20 states,

- Science-Based: Rooted in proven scientific principles
- Education: Promoting sustainable agronomic practices
- Systematic Approach: Holistic crop production methods
- Integrity: Honesty in all endeavors
- Partnerships: Collaborating locally
- Leadership: Supporting an Independent Associate Network
- Long-Term Focus: Prioritizing long-term benefit over short-term gains

CORN

Pre-Planting

PLANT PRIORITIES

Stimulate microbiological activity to ensure proper nutrition is available

Planting

PLANT PRIORITIES

Establish root system, healthy stand, and even emergence

Emergence through V6

PLANT PRIORITIES

Maximize yield potential by setting kernel rows and number along the cob

Establish sufficient vegetative tissue to support later reproductive phases

Initial Flowering R1

PLANT PRIORITIES

Integrity of flowering process to increase and hold flowers that will develop into pods

Pod Filling R3

PLANT PRIORITIES

Pod development and retention, as well as stimulate pod fill and fruit size

BED PREP

BED CONDITIONER WITH 4 BAR HARROW.

ONE PASS SEED BED PREP MACHINE, YOU CHOOSE SWEEPS TO CLEAN TOPS OF BEDS OR MIDDLEBUSTERS TO CLEAR FURROWS. THE HEAVY-DUTY CHOPPER BASKET SIZES RESIDUE AND LEVELS SEED BEDS, FOLLOWED BY THE 4-BAR SPIKE HARROW TO EVENLY DISTRIBUTE RESIDUE AND FINISH THE SEED BED IN PREPARATION FOR THE PLANTER.

CREATE THE PERFECT SEED BED WITH DOUBLE MIDDLEBUSTERS CLEARING THE FURROW BEFORE AND AFTER THE HEAVY DUTY CHOPPING REEL THAT CLEARS AND SIZES RESIDUE. THE REAR DOUBLE FINISHING BASKETS CREATE A FIRM, LEVEL BED WITH PROPERLY CONDITIONED SOIL FOR OPTIMUM PLANTING.

OPTIONAL DOUBLE DISC FOR HEAVY RESIDUE CONDITIONS

C-SHANK LISTER BED CONDITIONER

SMOOTH TO RUN, YET AGGRESSIVE ON RESIDUE AND CLOUDS. THE FRONT CHOPPER REEL HANDLES TOUGH RESIDUE AND BREAKS UP DIRT, WHILE THE SPRING LOADED C-SHANK MIDDLEBUSTERS CLEAR FURROWS. THE DOUBLE FLAT-BAR FINISHING BASKETS LAY DOWN A SMOOTH, WELL DEFINED SURFACE FOR PLANTING.

BED PREP

SINGLE DISC BEDDER

THE SINGLE DISC BEDDER PULLS EASIER THAN THE TRADITIONAL DOUBLE DISC BEDDER, ALLOWING MORE FLOW IN TOUGH RESIDUE, WITH LESS PLUGGING. THE SIMPLE DESIGN REDUCES MAINTENANCE COSTS AND DOWN TIME. ADDITION OF THE OPTIONAL ROLLER WILL FLATTEN BED TOPS, LEAVING A FLAT SURFACE AHEAD OF THE PLANTER.

OPTIONAL STABILIZER & ROLLER

60FT. AVAILABLE

STABILIZING GAUGE WHEEL

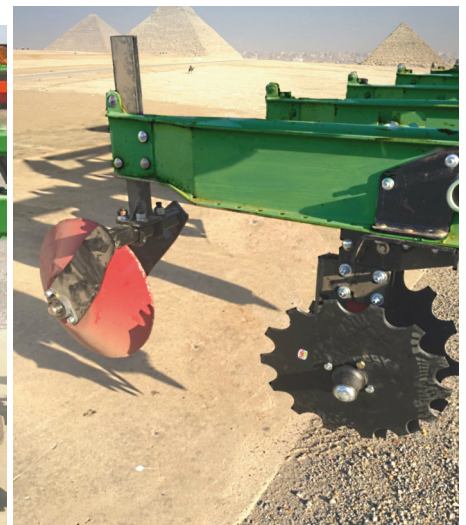

LISTER BEDDER

PARALLEL LISTER BEDDER

CULTIVATE, RUN WATER FURROWS, AND BUILD BEDS IN THE TOUGHEST HIGH RESIDUE CONDITIONS.

OPTIONS INCLUDE A REAR SWEEP ATTACHMENT, A MIDDLEBUSTER WITH DOUBLE LISTER DISCS TO CLEAN FURROWS OR VINE-CUTTER DOUBLE DISC FURROW ATTACHMENT FOR HEAVY RESIDUE OR COVER CROP.

GAIN EFFICIENCY WITH BANDED NITROGEN

Maximize efficiency by putting out nitrogen where and when emerging corn plants need it. Moisture moves nutrient bands into the root zone and dilutes the solutions to prevent root burn or injury.

PLACEMENT WITH NO IMPACT ON DEPTH OR CLOSING

360 BANDIT mounts to the row unit in front of the closing wheels. With no impact on closing the trench using a spring-loaded coulter and shallow placement, 360 BANDIT doesn't rob downforce from the row unit.

ACCURACY WITH FLEXIBILITY

360 Y-DROP utilizes your sprayer to put liquid fertilizers and other nutrients right where your corn needs it most and gives you the ability to apply at later V-stages of growth in season.

Yield Saver Enhances
your corn head gathering chains by adding angled intermeshing bristles to fit together in a tight formation capturing the lost kernels that typically fall by the wayside

Don't let yield fall through the cracks!

Undercover gives you the ability to spray fungicides, insecticides and other foliar products under the plant canopy allowing for better absorption of products.

eSet®

Improve Performance and Accuracy

out of your existing J.D. Planter Vac Meters, Proper Seed Spacing Pays. ESet Meter kits assure proper seed placement and spacing as well as accurate singulation of multiple seed sizes and the Ability to Plant with Over 98% accuracy.

Simple Upgrade, Big Change

Eset is a meter upgrade for JD planters that gives you picket fence stands without having to make time consuming adjustments as you plant.

Standard 17XX & 17X5 / ME5 JD Vac Meters

\$136.00/Row

Pro-Series JD

To Ensure Meter Performance and Accuracy have your Meters Calibrated Yearly or After 1,000+ acres
Install & Calibrate on MeterMax Ultra test stand to ensure Field Readiness - **\$35.00/Row (VAC PLANTERS)**

vSet®

vSet gives you the option to convert your mechanical Finger Pick Up **Kinze** and **J.D. Planters** to Vacuum

Allowing you to plant a wider variety of hybrids at a wider range of speed with more accuracy and correct spacing!

20/20 Seedsense Capabilities include:

- Row by row averages of Population monitoring
- Planter Meter Performance such as excessive planter meter skipping or doubling
- Seed Spacing monitoring to ensure correct seed placement
- Row unit ground contact and excessive downforce monitoring
- Variable Rate Control with Precision vDrive and liquid rate control with vApply
- Downforce control with Deltaforce hydraulic downforce system
- Yield monitoring with Yieldsense
- Row by row liquid monitoring with FlowSense
- Row by row closing system control and monitoring with FurrowForce

Precision Planting vDrive with DeltaForce and SpeedTube optimizes your existing planter for speed and greater control of prescription seeding rates with unprecedented accuracy.

vDrive®

No Drive System Maintenance, No Worries

vDrive Electric Drive motors attach only to Precision Planting vSet2 Meters, vDrive gives you the ability to control your planter seeding rate at the push of a button without the hassle of transmissions or chain drives. vDrive allows more accurate Variable Rate Seeding with Prescriptions along with sectional or individual row swath control.

DeltaForce®

DownForce Control Made Automatic

Control Row Unit Downforce To The Row with DeltaForce Hydraulic Downforce System. Ensures and maintains planter to ground contact and keeps excessive row unit weight off the seed bed with a one second response time.

SpeedTube®

Speed Doesn't Have to Kill

Be able to cover more acres faster with the high speed and accuracy of SpeedTube. Belted drive system, along with feeder wheels at top of tube, ensures accurate seed placement and eliminates bouncing at the start ensuring precise seed to trench placement.

CornerStone®

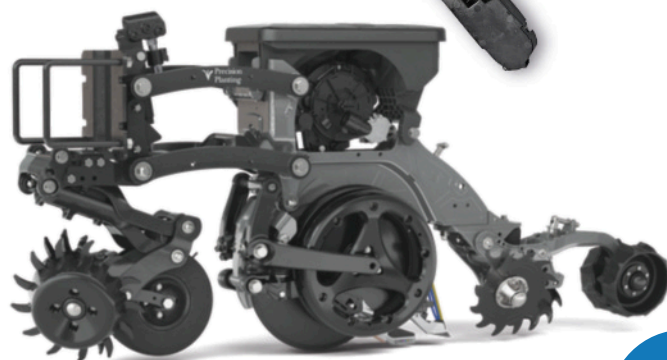

Complete Planting System

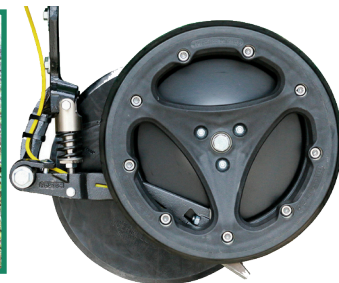

CornerStone®, from Precision Planting, is a fully custom, factory-built planting system with integrated Precision Planting hardware. Gain unmatched planting performance through ease of in-field use, simple adjustments for changing planting conditions, and best-in-class durability and serviceability.

The top three Precision Planting products must be installed to achieve accurate seed placement at high speeds
For a Complete Planter Specific Quote give us a call!

Compatible with: Corn, Soybeans, Cotton Singulated (not compatible with peanuts, two hill or three hill cotton)

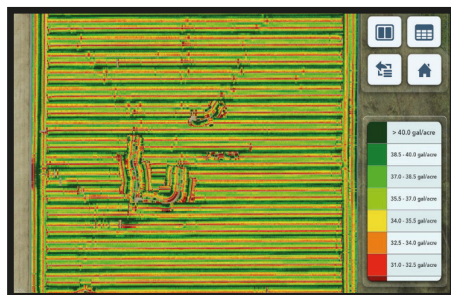

Conceal™

Conceal is a planter fertility attachment that is cleanly tucked into the row unit and utilizes a liquid knife placing nutrition in the soil 3" away from seed.

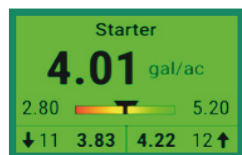

ReClaim™

ReClaim eliminates the wasteful and time-consuming process of priming your booms. By keeping your boom cycling product before a nozzle ever sprays to the ground. Your first droplets are the right concentration, more effective, and time saving, without needing a new sprayer.

Gives you the ability to map multiple Products/ Rate changes in Fieldview

FlowSense™

FlowSense allows row-by-row monitoring of liquid products while planting so you can visually see any variance or if a row is becoming restricted. EM FlowSense replaces traditional turbines with an electromagnetic pulse sensor allowing, for greater variability of liquid products.

FurrowForce™

Managing soil density is a key component of creating the best environment for the seed. FurrowForce solves this problem by maintaining a set amount of weight on the stitch wheels to firm the soil over the seed, remove air out of the soil, and retain moisture for a longer period of time to give each seed the chance to germinate consistently.

Reveal™

Row unit-mounted row cleaners hurt row unit ride and affect down force requirements. Reveal is frame mounted, removing its impact on the row unit. With its own internal gauge wheel, Reveal precisely controls the depth of the cleaning tines to create a consistently clean and ideal seeding environment for even emergence to occur.

RESIDUE MANAGEMENT

2967 Screw Adjust Residue Manager

Easily Make Adjustments to Depth!

- Simple to set and maintain appropriate working depth from above unit
- **DRAMATICALLY** reduces adjustment time
- Attaches directly to the face plate of the planter row unit
- Includes depth gauge on front of unit for uniform setting on all rows
- Allows for fine tuning of the residue manager and adjusts in 1/16" increments and features a 3/4" socket to speed changes
- **EASILY CONVERT PIN ADJUST TO SCREW ADJUST MODEL**

- Out through the toughest residue
- Won't throw residue in front of adjacent rows

CIH 2967-097B for 30"-
40" SHOWN WITH
**OPTIONAL Sharktooth
Wheel & Floaters**

(Also available for 15"-22" rows)

- Set with one wheel leading or with both wheels parallel or interlocked
- Floater wheels available.
- Handle tough conditions including tech hybrids, corn-on-corn acreage and cover crop.
- UNR model for 15"-22" minimizes thrown residue in front of adjacent row.
- New design allows attachments for multiple planter use and use with Precision CleanSweep
- Cable drive may require optional guard. 6-8 row hex shaft could hit on some models.
- Can be ordered specifically for use with Precision Planting Conceal
- Compatible with Precision Planting Cleansweep

2967 Pin-Adjust Residue Manager Also in Narrow Row

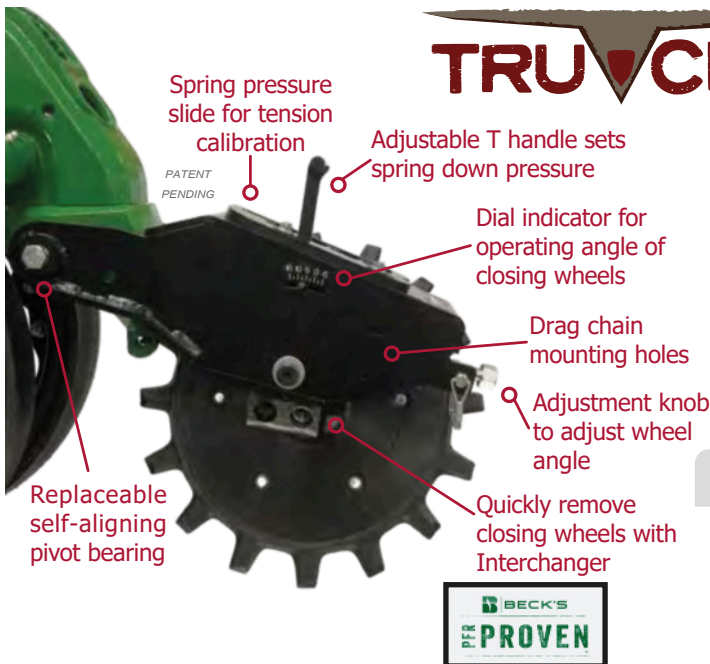

Rugged Design for Endurance

- Improves soil moisture, water permeation, aeration, and soil tilth
- Sealed heavy-duty double row greaseable bearings
- Bolt-on hub caps stay in place and keep dirt out
- Strong wheel system provides durability
- Tapered fingers clear residue and clods with clean strokes that parallel the ground
- Sharktooth is ideal for clearing wheat stubble

**Standard or -BW JD 2967-028
(AVAILABLE IN SHARKTOOTH -ST)**

RESIDUE MANAGEMENT

6000 Tru-Closer

- Features 20° range of camber motion (-5° toe in to +15° toe out)
- Toe out setting brings the seed trench closed, eliminating air pockets and enhancing seed-to-soil contact.
- Slide equalizer adjusts spring pressure to calibrate row-to-row down force setting on each closing wheel.

6200-108 Drag Chain

This chain has a 5/8" twisted line, beveled, five-sided square twist link, to pull more heavy soil onto the trench. Helps close in wet conditions.

6200-005 Poly Twister Wheel Kit

- Wheel utilizes poly spikes & a rounded center
- Available with ring only option or full assembly
- Closes seed trench in both wet and ideal conditions
- Available with short spikes for shallow planted crops like cotton

Optional Ring only insert kit

6200 TWISTER CONVERSION KIT FOR CASE IH

- Improves closing of furrow
- Bracket mounts Twister wheels to Case IH Series planters

Residue Manager Coulter Combo

Works Great on Standard or Ultra Narrow Row Planters!

The ULTIMATE Space-Saver Combo

- 3" narrower and 5" shorter than the 2960/2967 combo
- Minimizes displacement of residue into adjacent rows
- Fits most narrow row planters
- Coulter blade and residue manager that adjust independently in 3/8" increments
- Lock down or Float to follow soil contour
- Adjustable Depth Control

FERTILIZER APPLICATION

2962 FLOATING RESIDUE MANAGER FOR DOUBLE DISC FERTILIZER COULTER

- » Adjustable for both depth and distance from the row
- » Screw adjustment depth
- » Clears residue and Fertilizes in one pass
- » Good choice for higher rates of starter fertilizer
- » RH or LH units available
- » *Price Includes SharkTooth Blade, Screw Adjust Residue Manager, and Floater Wheels*

2962-003A-LH or -004A-RH Liquid Mount with One Smooth Blade/One Notched and 2962-005 Sharktooth Residue Manager and Floater Wheels. Fits **JD** and **Kinze**.

2959-003 INJECTION SYSTEM

- » Planter mounted one pass system
- » 16" blade cuts slot 2" to left or right of row
- » Adjustable Depth
- » **Residue Manager included in price**
- » **Optional mounting kit for Precision Planting Cleansweep™ to enable air adjustment**

2959-003/2967-180

Finger Wheel Residue Manager (shown)

2959-003/2967-180-ST Sharktooth Wheel. Fits **JD** & **Kinze**.

2968 IN-BETWEEN FERTILIZER OPENER

JD FERTILIZER OPENER

- Mounts on planter row unit behind gauge wheel
- Eliminates fertilize build-up
- 10" disc (or 8" on Case IH)
- Apply fertilizer from 2" or 3" off the row
- Adjustable depth in 1/4" increments
- Includes injection kit (optional springload knife kit available)

Available with Single or Dual Discs

JD (except **CCS STACKFOLD**), **Kinze**, **White**
8000-9000
Additional pricing for
spring loaded knife optional

CASE FERTILIZER OPENER

- Available as a dual- or single wheel opener
- For placement of starter or nitrogen fertilizer
- Disc is located behind gauge wheel, eliminating fertilizer and damp soil buildup on gauge wheel

Fits case 1200

Fits case 2000

CASE FERTILIZER CLOSER DISC

2" Off Row Placement
2968-030 for **CASE IH 8"**
Single Disc.

UMO-100 FERTILIZER OPENER

The Martin UMO-100 fertilizer opener mounts directly to the planting unit and is compact enough to be mounted within our 1360 and C125 floating row cleaners.

Optional Dual discs & dry fertilizer tube available

- Can be set to place liquids 1-3 in. from seed row
- Fits Deere 7000 - 1700 series planters, Kinze, Harvest International LaserPro & Case IH 1200 & 2000 series planters

PLANTER ATTACHMENTS

9" TOOTHED or RAZOR CLOSING WHEELS FOR CASE IH & JD/KINZE COTTON CLOSING

BSCW899Z

Nine inch diameter Toothed or Razor wheel replaces closing disc on Case IH & JD/Kinze cotton closing planter row units.

BSCW899

Moist soil is moved toward the seed at seeding depth, even in hard or sod conditions. In wet conditions, the soil is prevented from forming a continuous ribbon by the lifting action of the teeth as they rotate up out of the soil.

- Reduces closing wheel arm pressure
- Closes seed trench in most severe conditions
- Leaves soil above the seed loose & compaction free
- Eliminates side wall compaction
- Case IH **must** have offset closing wheel arm.

15" Single Closing Wheels Available with Spading or Dimple Wheels

Single 3/8" thick, 15" diameter right or left toothed steel wheel with cast hub & diamond shaped points

BSCW1543

- For JD 7200 & 7300 series planters with 17mm attached stud style arms.

BSCW1541

- Same as above for use with rolls pin style arms

BSCW1544

- For planters with *Bolt-On* hubs: Deere 1700 series, Kinze and White

13" SINGLE CLOSING WHEELS FOR DRILLS & AIR SEEDERS

BSCW75 \$172 w/dimple wheel \$172 w/spading wheel

- For JD750/1850 Drill

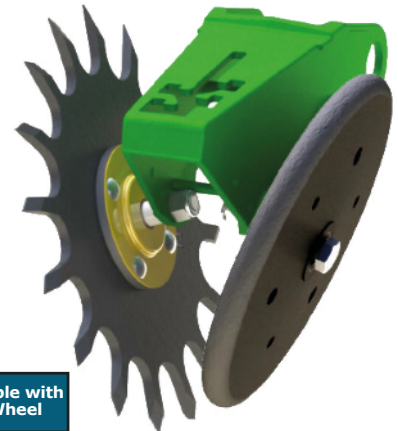

BSCW156 \$104 w/dimple wheel \$117.50 w/spading

- For JD 1560, 1860, 1590 & 1890 Drill

*Aerates above seed, helps warm seed bed
*Or choose 1/2" thick, 20 point dimple
that firms soil at points and leaves looser
*Less aggressive than the diamond point.
*Mounts on existing wheel arm

Also available with Dimple Wheel

DIMPLE WHEEL OPTION:

- 1/2" thick, 13" diameter steel wheel with rounded points
- Single 2-row ball bearing
- Double threaded specially designed axle
- Fits Deere 750 and 1850 drills
- Firms soil at rounded points while leaving looser area between points
- Less aggressive than spading wheel
- Choose between 14 or 20 Dimple

13" DOUBLE CLOSING WHEELS

BSCW1341 \$380 per row-Double Wheel

- For JD 7000 & early Kinze planters with Roll pin studs

14" DUAL CUPPED RAZOR WHEEL

BSCW1444C

- 1/4" thick, heat-treated wheels, with 18 beveled razor teeth
- Cast hubs with long life 5203 double row bearing with 6 lip seal

14 Dimple

20 Dimple

DRAG CHAIN KIT

- Heavy square edge cross chain and brackets
- Bolts to all Max-Emerge units
- Fits Kinze and White units with bolt-on wheels
- Drags loose soil to fill voids

DCK-01

Combo

PolyTech Industries' RFM Auspoint Coil Closing and Gauge Wheel eliminate the day-to-day hassles of the conventional rubber tire system.

The Gauge Wheel self cleans, overcomes replacing rubber tires, keeps the dry soil away from the seed trench, gives a smoother ride for better seed placement and is deal for no-till or conventional planting.

The Closing Wheel overcomes cracking, gives a better press, can provide a more even germination and sifts the soil back over the furrow to retain moisture.

GFX-P Pneumatic Row Cleaner Gfx-P Pneumatic, Remote-Adjust, Floating Row Cleaner

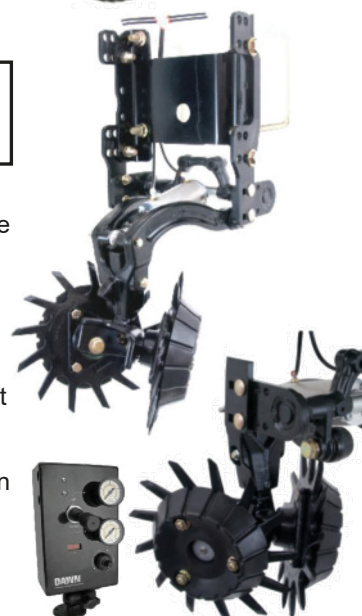

The Gfx-P uses the same frame mounted, trailing arm geometry as the hydraulic Gfx row cleaner.

The air cylinder generates the same down force as the hydraulic version.

If you are interested in a lower cost version of the Gfx, this is an excellent way to move into the Dawn FX product line, and may

Be outfitted with hydraulic actuators in the future if the air option is not adequate for your needs.

Hydraulic model available

PLANTER ATTACHMENTS

M 1202- Series

The M-Series allows you to cater to the demands of your field conditions. The field proven curved tooth works great in min-till, no-till, res-till ground. It can be changed quickly to utilize the heavy-duty rubber wheel in conventionally tilled ground.

The M-Series Curvetine™ (1202 R/L) is drop-forged and has a **lifetime guarantee** against bending or breaking (1206 TWINROW, JD & MONOSEM)

Curvetine™ 1203 Closing Wheel

The Curvetine M-Series Closing System has the ability to quickly change from the Curvetine M-wheel, to a heavy-duty, steel rimmed rubber wheel. In just a few seconds, you can quickly switch from one style of the wheel to another.

Gaugetine 1204 Closing Wheel

The Model 1204 Gaugetine combines the crumbling action of the Curvetine with a band of material which gauges the depth of the wheel. This is most popular in shallow planted crops where limited ground penetration is needed. Also, works well in heavier ground for farmers who do conventional (clean) tillage.

102151
\$12.50 ea

1/2 Rate down-pressure spring for you planter tailpiece!

If you like the action of two Curvetines, but have difficulty setting the spring rate to a light enough setting, we strongly recommend our half-rate spring. This spring will allow you to use the full range of settings on your tail-piece. It also makes it possible to run two Curvetines per row in a much wider range of conditions. In general we recommend the lighter down pressure spring over equipping your Curvetines with press plates.

NEW! From DAWN

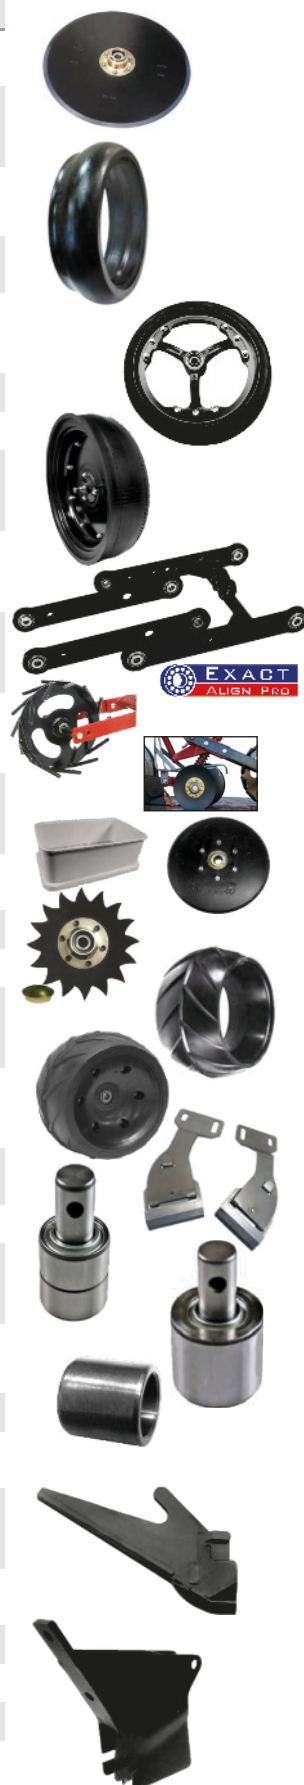

Gauge Ring 1305 Closing Wheel Insert

The Model 1305 Gauge Ring utilizes similar crumbling action of the Curvetine to assist with closing. Works well in cover crop and high-residue. Kit includes two steel spiked wheel closing rings that replace OEM rubber tire on v-close wheel.

SERRATED/SMOOTH COTTON CLOSING BACK-END

P6001CIH
P6002REV

Thick 5mm, long wearing, blades tear through soil and leave loosened soil for press wheel, assuring improved seed to soil contact. Does not slit soil, covers seed completely. Available for JD and CASE IH.

Includes: 2 Serrated Closing Discs with mount hardware, hubs & bearings and hub caps

U/47259
(SERRATED)

Serrated blades aggressively loosen soil eliminating side wall compaction. Both include heavy duty frame construction with two 8 closing discs, down pressure spring and 6-1/2" x 12" single rib traction tire.

U/47055
(SMOOTH)

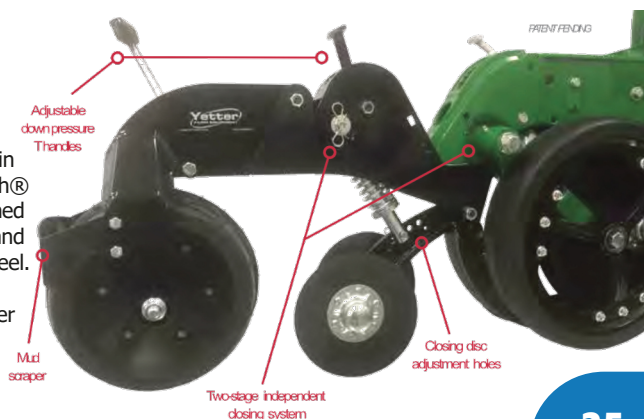

Also available with Smooth blades that are excellent for crops in light soil conditions
Smooth Fits JD 7200/7300 & early 1760, 1780 with MaxEmerge®2. Serrated Fits JD 1700 series
MaxEmergePlus, Pro, XP, XP Pro

FASTTRAC

Fast Trac Cotton Closing system with independently adjustable down pressure spring for closing discs & press wheels available for **JD, CASE IH, KINZE & WHITE** planters

- With true independent suspensions, firming wheel travels completely independently of then closing discs.
- Offers four down-pressure settings for closing discs and firming wheel.
- Capable of housing 8" or 9" closing discs, in smooth, serrated, or SharkTooth® Standard 6.5" chevron-patterned firming wheel can be removed and replaced with a V closing wheel.
- Optional liquid fertilizer kit available

SHIELD AG / ACRA PLANT

ACRA-PLANT V-SHOT In-Furrow Fertilizer

Now you can HAVE IT ALL!!

ACRA-PLANT V-slice's proven technology *eliminates seed roll-and-bounce* to assure uniform and accurate emergence, and apply starter fertilizers and other precision-ag chemicals where they belong, below and beside the seed.

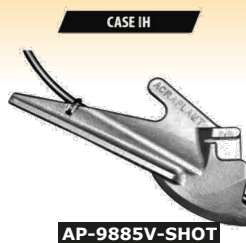

AP-1985V-SHOT

AP-1785V-SHOT*

AP-001885V-SHOT

AP-9885V-SHOT

*AP-1785V-SHOT FITS DEERE MaxEmerge PLANTERS BUILT BEFORE 2006 AND KINZE 2000. ALSO AVAILABLE FOR KINZE 4000 AP-4985V-SHOT AND WHITE PLANTERS (6000,8000 AP-1685V-SHOT) (9000 AP-1690V-SHOT)

FITS DEERE XP, PRO XP, AND MES PLANTERS.

SOLID CHROME V-SLICE

- INTEGRATED FERTILIZER TUBE
- INCLUDES REQUIRED HARDWARE AND FITTINGS TO HOOK UP TO PLANTER LIQUID DELIVERY SYSTEMS
- INCLUDES P55984 SEED TUBE CLIP

ACRA-PLANT V-SLICE INSERTS

Time-tested and improved V-slice inserts for your row crop planter. Maintains seed-to-soil contact in the toughest planting conditions, keeps seed trench depth constant and free of dirt and debris, while protecting your seed tube.

The V-Slice maintains even spacing and uniform depth of each seed in the row allowing for FASTER, MORE EVEN GERMINATION OF SEED.

AP-001985XP

V-SLICE INSERT FOR JD 1700-SERIES XP UNITS

- Designed to replace OEM seed tube guard
- No hardware required, bayonet mount

AP-009885

V-SLICE FOR CIH PLANTERS 1255 SERIES

AP-001785

V-SLICE INSERT WITH PIN/BOLT JD & KINZE 2000

- Designed to replace OEM seed tube guard/inner scraper
- Spring pin and bolt/nut provided with insert

P55984

SEED TUBE CLIP

- Recommended for use with all applications of AP-001785 and AP-001985XP

Crustbuster, Great Plains, International Drill, JD, Krause, Sunflower Drill, and Tye Drill,

REPLACEMENT TAILS AVAILABLE FOR ALL KEETON UNIVERSAL MODELS AND FOR DRILL MODELS
QUICK ATTACH BRACKETS ALSO AVAILABLE FOR JD, KINZE & WHITE

FurrowJet

FurrowJet is a planter fertilizer attachment which enables you to place an in-furrow starter fertilizer and dual-band of fertilizer 3/4" on each side of the seed.

By being near-furrow, this placement gives the seedling and crown roots **Immediate access to the nutrients**. Combined with accurate placement, FurrowJet allows a wide range of starter rates to be applied safely **While avoiding seed burn risk**

Precision Planting®

STARTER FERTILIZER DELIVERY SYSTEMS

CUSTOMIZED SYSTEMS THAT START WITH A 12V PUMP

See page 37

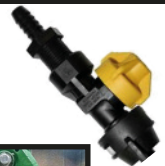

ASK ABOUT OUR IN-FURROW KITS!

OPTIONAL: Works great with Keeton's Tubed Seed Firmer, Schaffert Rebounders, Totally Tubular or Shield V-shots and can be used in conjunction with the MicroTrak Spray-Mate for accurate and consistent application.

WE ALSO CAN BUILD YOU A SYSTEM AROUND YOUR PUMP OR SPRAY CONTROLLER!

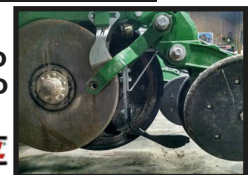

ADD 2# IN-LINE CHECK VALVES TO PREVENT DRIPPING AND KEEP LINES FULL, SO YOUR PRODUCT IS READILY AVAILABLE WHEN YOU TAKE OFF THROUGH THE FIELD.

flo-rite

FIRMER WITH LIQUID FOR JD ME & EXACTEMERGE w/SPEED TUBE FR425/555

HERSCHEL

Deeper Soil Profile Placement for Instant Early Plant Uptake

This simple yet effective design is totally protected by the disc blades

The 3/8" stainless tube will easily outlast the disc scraper. The optional seed bounce flap closes the opening between the disc openers assuring correct seed placement & eliminates seed bounce.

TT007 **JD 1700 Maxemerge 5**
 TT009 **JD ExactEmerge**

We recommend replacing discopeners when you install these fertilizer tubes

Schaffert PLANTER ATTACHMENTS

REBOUNDERS FUNNEL SEED INTO THE SEED TRENCH AND ELIMINATE SEED BOUNCE, UNEVEN SPACING & SEEDS FLIPPED ON TOP OF THE SOIL BEST IN THE FIELD FOR COTTON, SHALLOW PLANTED CROPS, LIGHT SOIL & HIGH RESIDUE MIN-TILL
CONDITIONS WHERE SEED BOUNCE IS A PROBLEM.

Schaffert G2 FERTILIZER DISCS FOR V-PRESS

- 2" X 2" placement
- 8" SINGLE Disc
- Triple seal bearing
- EASY bolt-on design
- Fits most JD, Kinze, Great Plains & Monosem
- Adjustable for optimal disc depth
- Center pivot walking beam equalizes pressure between the V-press wheel and disc

Schaffert G2 FERTILIZER DISCS FOR JD

- EASY bolt-on design
- 2" X 2" placement
- Triple seal bearing
- 8" Dual Discs

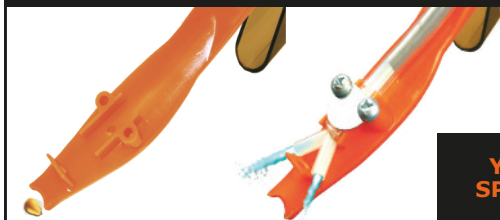

For JD Cotton Closing Back-End

Schaffert G2 FERTILIZER DISCS FOR CASE IH

- 2"x2" placement
- Uses existing 8" Cover Disc
- RH & LH Tube
- Formed, compact stainless tube mounts direct to row unit, NOT to cover discs
- Fertilizer hose attaches high up on planter

REBOUNDERS for Planters & Drills

Y-NOT SPLIT IT

FOR JD, KINZE EdgeVac & Great Plains w/ Clear-shot Mounting brackets available for Wavevision, Bullseye, Speedtube, & JD Exactemerge. Super Tuff (Orange)

Rebounder kits for WaveVision seedtubes.
 Rebounder kit for QuickAttach seed firmers & Case IH 1200

Available for Drills
 (some requiring brackets) JD, CASE, GREAT PLAINS, CRUSTBUSTER, SUNFLOWER, TYE, LANDOLL, FLEXICOIL, & KRAUSE

GX2 PUMP SYSTEM

The Schaffert fertilizer application system is uniquely designed and assembled to meet individual customer needs. The GX2 distribution center has dual pumps for maximizing desired fertilizer application rate. Made in the USA this bolt and go manifold specializes in fungicide, In-furrow starter, insecticides, and 2x2 nitrogen solutions.

ZIPPER SPIKED CLOSING WHEEL

- Feather soil into seed trench w/ angled spikes
- Zips furrow tightly shut while leaving room for seedling emergence
- Use left or right or both
- Long lasting die cast metal - Aggressively closes row
- **WORKS GREAT WITH G2 FERTILIZER DISC**

CAST ZIPPER CLOSING WHEEL

New all-cast Zipper & Mohawks
 Eliminate build up of mud due to having plastic rims. These wheels prevent wet soil from sticking to the flat spots in-between the teeth.

4LINK CLOSER

- Keeps the pitch of your closing wheels from changing with 6" of vertical travel.
- Allows for consistent fertilizer placement and furrow closing.
- **High adaptability for most planters and seed drills**
 \$550/row link only

CAST SPYDER CLOSING WHEEL

New all-cast Spyder closing wheels
 Heavy Duty 12lbs. Wheels designed for high wear situations in the field.

STARTER FERTILIZER

HAWKINS

The Hawkins 'NForcer™' injection system combines a coulter and shielded injection point to create a high speed, low horsepower liquid application method.

Pneumatic airbags provide quick and accurate down pressure. The unique design creates precision placement while maintaining minimal disturbance and moisture loss. Use the 'NForcer™' to *precisely place liquid fertilizer* at depths set by blade adjustment in all

soil conditions. The 'NForcer™' design is an effective solution in high residue without plugging or pinning.

The Hawkins 'NForcer™' can be utilized in a variety of applications and conditions including the Hawkins Planter 'NForcer™' for accurate placement of fertilizer at a depth of 0"-5" & horizontal adjustments of up to 8".

2969 INTELLINJECT FERTILIZER OPENER

Consistent placement on both sides of the seed

- Places liquid fertilizer behind the planter closing wheels
- Follows the ground contour during planting
- Air cylinder allows in-cab adjustments to downforce or allows unit to raise when not in use
- Provides placement of fertilizer up to 1 1/2" deep and 2"-3" off the row
- Drag chain helps close the disc opening and cover the seed trench

Works well mounted in between JD twin row planter units

Because Nutri Mate 3™ is mounted to the row unit, the planter parallel links let it float and the unit gauge wheels provide depth control so nutrients are precisely placed in relation to the seed.

Easily mounts to row units on **JD**, **Kinze**, **Great Plains**, **White** and **Case-IH** planters

DURA PUMP EASY CADDY AUTO SHUT-OFF OPTION

- Intuitive interface allows for the selection of manual or automatic operation
- Accurate to +/- .5%
- Meter capacity is 2 to 22GPM
- High-flow pump with up to 15GPM flow rate
- Optimized for repeatable batching; returns to the last volume amount dispensed
- 100% moisture sealed circuitry
- Includes Dura-Meter™ with impact and moisture resistant Lexan™ faceplate
- Calibration has 5 manual saves; 21 preset
- Available in 12 Volt or 110 Volt, and EPDM or Viton® options
- Features a 2 year warranty

ABS-4312V 12V (VITON)
ABS-4315V 110V(VITON)

ARAG® READ OR AUTO SHUT-OFF

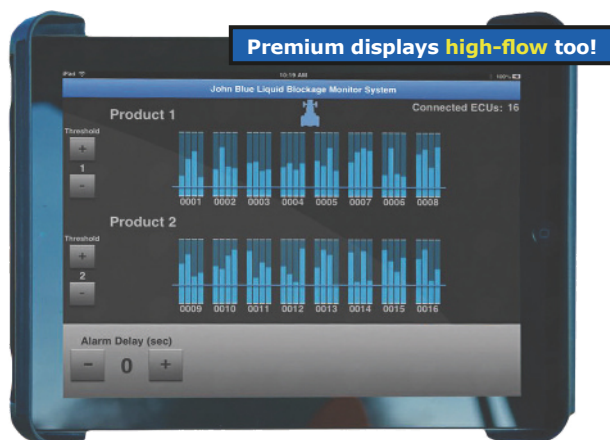

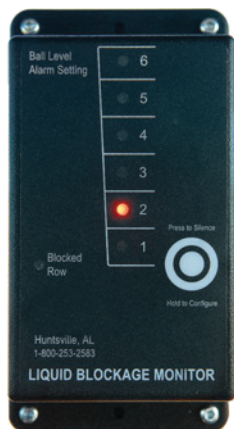

The programmable flow-meter reads from 5 to 106 gpm and has a backlit display. Uses a Shut-off valve with stainless steel ball and 2" threaded male connectors, coupled with transport handle and 32.8 foot power cable, on a 12 Volt DC meter.

AUTOMATICALLY STOP FILLING! SET IT AND FORGET IT!

Tank Filling
System

CDS-JOHN BLUE LIQUID & NH3 BLOCKAGE MONITOR

Premium displays **high-flow** too!

Magnetic Sensors mount behind the VisaGage II Flow Monitors. These can be mounted on existing VisaGage new magnetic balls are supplied. The system identifies where these balls are floating in each row during application.

WORKS IN LIQUIDS TOO DARK TO SEE THROUGH!

KNOW THE FLOW! IN CAB RATE MONITOR

Shows Both **Low-flow** & **No-flow** Rows

- The monitor shows both a visual display and an audible alarm.
- Not affected by cloudy or dark solutions, visual LED is to the side of the column.
- LED flashes at row until blockage is corrected, then it resets automatically.
- System will "pause" if you can't correct the problem immediately.
- iPad App is free at Apple App Store and Google Play.
(Requires iPad2 or newer & latest iOS)
- COMPATIBLE ON Ipad TO RUN ADJACENT WITH PRECISION PLANTING FieldView (pg.10)

Wireless Premium 12ROW & 16ROW setups available
Includes Interface & VisaGage II Monitors.
Does not include iPad
(Wired also Available)

AUTOMATIC RATE CONTROLLERS

SprayMate™ II

**Simple Precision!!
At a Great Price!**

Must have GVS Speed Sensor
or tractor speed cable.
Can be used with EMD to
control 12v pump

- ◆ Single rate controller for up to 3 separate boom sections with Master control
- ◆ Standard On/Off power switch
- ◆ Complete with 3/4" poly flowmeter, 1" flow control valve, and wiring
- ◆ Does NOT include boom control valves or speed sensor

SprayMate Plus can replace Raven 440 consoles with 5v to 16v 2011 & newer flowmeter. Order kit # 02026

RATE KING Dual Plus Display & Dual Rate

Automatic Liquid dual rate system

Includes: console, 2 flowmeters, GVS speed sensor, 2 servo valves, cables, & installation hardware.

- ◆ Controls 2 separate spray systems
- ◆ Speed, tank level, or area per hour can be seen on second display.
- ◆ Built-in boom controls for up to 5 separate boom sections.
- ◆ Compatible for VRA & as-applied maps.
- ◆ Customized Options Available

Electric Motor Driver

12VOLT PUMP FLOW CONTROL

Precise, Accurate & Effective Control of the Application Rate

Model #01757
or #01758

Micro-Trak's Pump Driver (**EMD**) enables all Rate Controllers (SprayMate™ II, MT-2405™ F II, MT-3405D™ F II, MT-3405™ F II, MT-9000™, Topcon, G52, Trimble, Raven and AgLeader Third Party Adapter Kits) to control the rate of flow by regulating the speed of a 12 volt pump. The **EMD** replaces the electric servo valve and will control most 12v pumps up to a max of 40A.

The EMD can be purchased as part of a customized kit complete with control console, speed sensor and flowmeter, or add to one of MicroTrak rate controllers

FLOW MONITORS

Calc-An-Acre II

Accurate Speed, Distance, & Area Measurement at an Affordable Price

Standard
(Wired)

- Wide range of use—sprayers, ATV's, trucks etc.
- Front panel is lighted & display is backlit for easy viewing at night
- Records up to 3 independent jobs
- Displays ground speed to tenths of mph
- Area per hour & accumulated hours function
- Allows active boom sections & partial tillage passes
- Push-button run/hold feature to stop area count when turning on ends & moving between fields
- Optional remote run/hold kit available for hands-free operation
- Weather resistant console & weatherproof connections

FlowTrak II

- ◆ TRIPLE counters for volume and area
- ◆ Track tank volume
- ◆ Tank alarm standard
- ◆ "No Flow" and "No Speed" warning messages
- ◆ Output control to turn a valve or pump on & off for batch control

The Flow-Trak II provides a complete picture of critical spraying functions and an accurate record of work done.

SPRAY & NH3 CONTROLLERS

RAVEN 450 Automatic Rate Controller

RAVEN

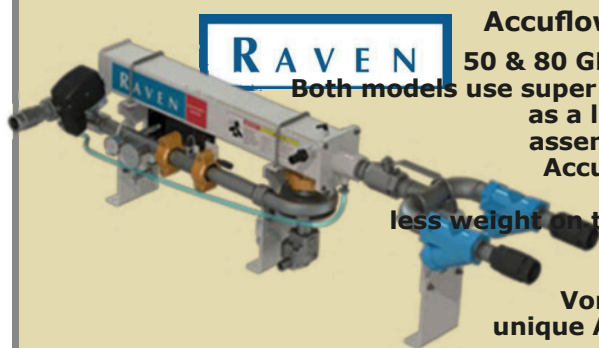

The 450 can meter NH3 with Proper Components

SCS-450 for up to 6-BOOM Sections

Liquid Kit Includes: Console w/serial interface (063-0171-220) · 1½" Poly Control Valve, 175 PSI (063-0171-894) · RFM 60P (1-60gpm) Poly Flowmeter (063-0171-985) · 12 FT. FLOW CONTROL CABLE · 12 FT. CONSOLE CONTROL CABLE **DOES NOT INCLUDE SPEED SENSOR or GPS Interface Cabling.**

SCS-450 is VRA & Data Log compatible

Holds 2 pre-programmed application rates it maintains, regardless of changes in speed. Manual changes can be made with the flip of a switch.

Accuflow Vortex System for NH3 Application

50 & 80 GPM for NH3 Application

Both models use super cooling technology to stabilize NH3 as a liquid for superior accuracy and control. This pre-assembled system is the epitome of time savings. The AccuFlow™ Vortex allows you to apply more anhydrous at faster speeds and cooler temperatures, with less weight on the toolbar. For even greater capacity and precise application, utilize the AccuFlow™ HP Plus System, which includes the Vortex cooler and a dynamically controlled pump. The unique AccuFlow™ HP Plus pump is designed for maximum performance and safety.

117-0171-571 Vortex HP+ 80 GPM NH3 Kit, Dual Inlet w/Hydraulic Pump, Fast Valve (PICTURED)

117-0171-574 Vortex 1.5" 50 GPM NH3 Kit, Dual inlet, 2 Valve System

The Agres ISO 30 works as a virtual guide, which will control the layout of the machines in your cultivation area, navigating in parallel paths, regardless of whether the route starts on a straight or curve, requiring only one start point and another end.

The system allows diverse field operations to be carried out, such as preparing the soil, planting seeds, cultivating the plantation and harvesting the crops. Thus, with the information generated and stored in ISO 30, you can manage your entire agricultural operation in a more effective and strategic way, in order to improve your productivity.

FEATURES

- Navigation on straight or curved parallel lines
- Control of break points and activity restart
- Recording of routes and maps of areas covered
- Real-time calculation of areas covered by the machine
- Record speed, distance and operating time
- Importing the guides project
- Storage and downloading of all recorded data

SPRAY-COMMAND™ CONTROLS

Select where you want to spray and at what pressure with all controls mounted to the SWING-ARM™.

LIGHT-BLOCK™ TECHNOLOGY

Algae needs light to grow. This algae-resistant material keeps the sunlight out and the spray liquid pure.

STEEL BOOM

Utilize your UTV with boom spraying covering up to 30 feet in one single pass. The nozzles are designed to spray efficiently to eliminate missing any strips and all nozzles are completely protected.

POLY-FLEX™ HOSE REEL

Unlike steel, this crack-proof, easy-wind poly hose reel will flex before breaks.

TIME-SAVER™ FORK-POINTS

The built-in fork slots makes the entire unit a breeze to lift and load.

SWING-ARM™

All controls are at your fingertips and within reach from the UTV cab. Hoses are protected and out of sight.

AUTO-DRAIN™ SUMP BASE

The sloped tank base channels every ounce of spray chemical to the drain. Just where it should go.

QUICK-ATTACH™ BOOM BRACKETS

Built-in boom connection points to save time and hassle when removing and attaching a spray boom.

EASY-START™ HONDA® ENGINE

Within the first few pulls, this trusty, reliable engine is guaranteed to start. Even after a long winter.

DIESEL & DEF TANKS

STOCK TANKS PROTECTED FLOAT FILLS FULLER!

DOUBLE CONE PORTABLE TANKS FOR LIQUID FERTILIZER AND HORIZONTAL TRAILERS

- EDURAPLAS tanks have:
- Total block out of sunlight, which prevents algae growth and keeps the water clean.
 - superior roof structure that prevents collapsing under heavy snow or rain.
 - 10-year warranty that covers any defects or damages, giving customers peace of mind.
 - Enhanced performance and quality, anchor points, ribbed walls, and compound colors.
 - Built in America from premium components and are rigorously tested for durability.
 - available in multiple sizes and colors to suit different customer needs and preferences.

VERTICAL & HORIZONTAL TANKS

HYPRO CLEANLOAD & HANDLER II

- Venturi with Cleanload & Handler and bulk draft capabilities
- Empty via the venturi or via direct pump draft
- Large hinged lids & camlock connections
- CifloRinse™ & ProClean bottle rinses
- Chem-Blade compatible (included on HANDLER II)
- Large-capacity 40 or 60 gallons
- 2" / 3" venturi systems

DUAL TANK MOBILE STATION

STANDARD FEATURES

Standard lengths of 40 FT or 42 FT
(custom lengths available)

42' has a 15' x 102" wide working deck space
Tandem axle configurations in spring or air-ride
New 25,000^{LBS.} rated axles (16 1/2" x 7" brake)

- Hutchens spring suspension with heavy duty springs
- 1 1/8" apitong floor (on working deck)
- PPG epoxy primer and black polyurethane paint
- Grote sealed wiring system with rubber mounted LED lights
- Jost 2-speed H.D. landing legs
- Aluminum front fenders and poly rear fenders

OPTIONAL FEATURES

- Spread axle or tri-axle available
- Ridewell air ride optional with suspension
- Two 2,610 Gal. Norwesco 100% drainable tanks with sight tube.(3210 Gal. Available)
- Ladders for tank access
- Plumbing to meet your application needs
- Rinse Systems
- Wet Seal Pumps
- Two 60 Gal. Mix tanks
- 3" Hose reel
- 3" Cast wet seal 13 HP. Electric start Honda pump

BESTWAY AG TRUCK SKID

- Back under Skid
- Lock fifth wheel plate on Skid king pin
- Attach front and rear Skid mounts to tractor supplied pinch plates
- 16' or 18' framed 1-1/2" wood bed
- Heavy duty tube frame with 8,000 LB storage jack stands
- Other tank sizes available
- Different options to meet various chemical plumbing and inductor needs
- Pull seed tender, or desired trailer, behind skid using rearintegrated receiver hitch and rear RV hook-up

TeeJet TECHNOLOGIES

Reliable Detection of Plugged Tips in a New, ISOBUS Compatible Design

Plugged or partially blocked spray tips can have a significant impact on the quality of your application. Streaks in the field caused by misapplication can result in yield reductions, increased weed pressure and the need to re-apply - all of which can be costly. The Sentry 6141 Tip Flow Monitor provides a simple, reliable solution to this age-old problem. Flow sensors mounted at each spray tip location monitor the flow through the tip and provide instantaneous feedback to the operator should a tip become clogged. By eliminating the need to detect plugged tips visually from the cab, operators can cover more acres in a day, and know, with confidence, that their sprayer, planter or fertilizer applicator is operating properly.

SENTRY 6141
ISOBUS TIP FLOW MONITOR

TeeJet
TECHNOLOGIES

UniPilot Pro Adapts to Your Field Conditions and Your Location

UniPilot Pro uses the very latest technology to compensate for rough terrain and tough field conditions. Three different sensors each measure machine dynamics in three axes - that means 9 axes of measurements happening hundreds of times each second.

Additionally, the UniPilot Pro system can be equipped with a steering angle sensor to further improve accuracy. UniPilot Pro is also ready to take advantage of any level of GNSS accuracy. Higher levels of GNSS accuracy will always improve steering accuracy, but stable, reliable steering is available with basic SBAS (WAAS or EGNOS) GNSS receivers. From autonomous to RTK, choose the level of GNSS precision needed for your application, and UniPilot will steer the machine with accuracy, every time.

FERTILIZER APPLICATION

SCHABEN

LA-9000 Liquid Applicator

Schaben LA-9000 Liquid Fertilizer Applicator

- Available in 1650 OR 1950 gallon units
- 27-55 ft. widths
- AcraPlant or Yetter coulters
- High lift double parallel linkage clears taller crops
- Rugged double toolbar 4x6 with large 2 1/4" hinge pins
- Adjustable wing down pressure to maintain uniform coulters depth
- Wheel drive piston or ACE hydraulic drive centrifugal stainless steel pump
- Flow monitors & flow check
- Call for a quote today!

2996 W/20" BLADE

- Comes with CAD tip rear knife for liquid or available dry fertilizer knife or inject
- 20" blade for deep root banding
- Fits most commonly sized toolbars.

Priced with 7x7 clamp & 22" shank. Depending on shank length & clamp kit needed price may vary.

Take control over your Nitrogen with YIELD FLEXX attachments. Improve your yield with perfectly timed applications.

- Light Weight - 5 lbs Per Unit
- Adjustable Height - 14" to 36"
- Adjustable Row Spacing - 20" to 40" Rows
- Minimal Maintenance Parts
- Brackets Available for Toolbars or Spray Booms

“high crop clearance and a powder coat paint that resists harsh chemicals with a dual-wheel capability with three axle width options”

“low-profile tank design that improves rear vision and stability”

The main features of the 8300 Vertical Fold are:

- short-coupled trailer that minimizes crop damage on turns
- hydraulic pump with a flow limiter for overspeed protection
- two-speed heavy-duty jack stand for easy hooking and unhooking
- flexible toolbar that can adjust to different row spacing options and has a wing kick feature, a hydraulic down pressure, and two-gauge wheels
- Patented AP coulters design that places nitrogen at a consistent depth and has a cast coulters, a hex shank, and the ability to set the degree of counter swivel.

The specifications of the 8300 Vertical Fold are:

- Empty weight: 8,320 lbs. (1350 gallon, 15 coulters)
- Hitch pin-to-axle length: 13'1" (1050 & 1350 gal) or 15'9" (1800 & 2400 gal)
- Tank size: 1050, 1350, 1800, or 2400 gallons
- Toolbar size: 30FT. 40FT. or 44FT.
- Delivery type: Knife or Injection
- Toolbar crop clearance: 27.5"
- Standard hydraulic pump: Ace 150-206F
- 7"x7" Single Toolbar
- Engine HP required: 150-180
- Quick fill size: 2"

The A18/A26 Side Fold: The Ultimate Tank & Toolbar for Precision Farming.

- Narrow transport width of 11'10" or 14'2" with hydraulic folding gauge wheels
- Enjoy sharper turning radius, less crop damage, and better operator visibility with single-reach tongue and low-profile tank design
- Fold the toolbar over the tank top for the shortest transport height
- Choose from dual-wheel or CAMSO Track options with three axle width settings
- Benefit from the long-lasting hydraulic pump with flow limiter
- 5"x7" double-tube toolbar in either 60' or 66' with external hydraulic fold cylinder
- Adjust the shank in eight different positions and the coulters swivel in any degree with the coulters casting and hex shank design
- Ensure even depth control and fertilizer placement in uneven terrain with the toolbar's three flexing sections and the trademarked Flex Hinge
- Narrow the travel width with the unique side-fold transport position
- Achieve consistent application across the toolbar with the four-gauge wheels
- Choose from 1800 or 2600 gallon tank sizes and knife or injection delivery types
- Get 27.5" toolbar crop clearance and 200-220 engine HP required
- Use the Ace 205-304F standard hydraulic pump and the 3" quick fill size

high crop clearance and a powder coat paint that resists harsh chemicals with a dual-wheel capability.

WHEN QUALITY IS IMPORTANT

ECONOMICAL!

When it's time to make in-season fertilizer, herbicide, insecticide or fungicide applications, you need to get the job done when the conditions are right.

POST EMERGENCE APPLICATION MADE EASY "Y" DROP TUBE SYSTEM

When it's time to make in-season fertilizer, herbicide, insecticide or fungicide applications, you need to get the job done when the time and conditions are right. The "Y" DROP TUBE SYSTEM is an economical, light weight and simple solution for post emergence application that can be easily mounted to your sprayer boom or toolbar.

KEY FEATURES:

- ▶ LIGHTWEIGHT
- ▶ ECONOMICAL/FLEXIBLE
- ▶ STANDARD 3' 4' & 5' LENGTHS
- ▶ CUSTOM LENGTHS AVAILABLE
- ▶ SMOOTH-IN-FIELD PERFORMANCE

BIGHAM BED PREP

High Flow Disc Bedder

Bed Preparation for High Residue Fields. The Bigham Super Duty High Flow Disc Bedder for Double Bar Mount is specifically designed for high residue bedding operations. We construct the Super Duty Disc Bedder with ultra-heavy duty components. Mounting arms are fabricated from heavy wall tube. This gang mounting arm arrangement is perfect for our Low Profile Series III Stack Fold Tool Bar. Put the Super Duty Disc Bedder to work and construct consistent beds quickly and efficiently in high residue conditions.

CHOPPER LISTER

One pass tool to support high-speed planting prepare seed bed, shape furrows & form trenches in one pass. Perfect, uniform seedbed aids planting and optimizes irrigation. Main chopper reels break up clods, incorporates residue and chemicals, and levels the top of the seedbed. Dual rear baskets refine the bed surface for planting. Choice of round or flat bar. Creates a smooth seedbed to support high-speed planting.

HIPPER CHOPPER

The Hipper Chopper aids planting operation and optimizes irrigation and drainage by configuring, preparing, and compacting seed beds and furrows. The uniformly shaped furrows between the elevated seed beds improve drainage and assist in irrigation. The Hipper Chopper can minimize required trips over the field by doing two or more jobs in one operation. The Hipper Chopper can simultaneously prepare a seed bed, shape furrows, and form drainage or irrigation trenches in a single pass over a given section of the field.

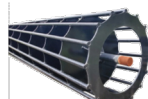

Round Bar

Flat Bar

Roller Drum

Tumbler Reel

8N Plow

Bed Knife

BIGHAM STRIP TILL

GEN 3 STRIP TILL

Bed preparation in a single pass. Disturb less soil for conservation of water, soil, and organic material, and eliminate wasteful multiple tillage and chemical application passes.

This tool tills planting strips for better crop growing conditions and increased water holding capacity, firms and prepares the seedbed for optimum planting results.

Easily handle large volumes of crop residue while providing the advantages of combined field operations to reduce field trips. Row unit mounts to 7x7" tool bar. Rugged rear gang is welded from structural tube and may be equipped with virtually any combination of attachments.

- Can be used to apply fertilizer in the top of beds
- Save trips and fuel with this all in one design
- Great bed prep for high-speed planters

- Saves up to 30% on fertilizer banding

BIGHAM

HIPPER TUMBLER

The Hipper Tumbler aids planting operation and optimizes irrigation and drainage by configuring, preparing, and compacting seed beds and furrows.

The uniformly shaped furrows between the elevated seed beds improve drainage and assist in irrigation. The Hipper Tumbler can minimize the farmer's required trips over the field by doing two or more jobs in one operation.

The Hipper Tumbler can simultaneously prepare a seed bed, shape furrows, and form drainage or irrigation trenches in a single pass over a given section of the field.

BIGHAM BED PREP & RIPPER

889 CULTI-LISTER

The Model 889 Cultilister gives you consistent beds across the field. With a parallel-link gang that conforms to your field like your planter units, you'll get identical beds from one pass to the next.

A vibrant mix of attachments and ground-engaging tools fit this machine to your farming practices. Plus, a few simple changes turns this machine into a high-speed cultivator or irrigation water furrow maintainer for different times of the year.

BIGHAM LILLISTON ROLLING CULTIVATOR

Versatile, high speed tool that performs a multitude of tasks, including seedbed preparation, chemical incorporation, and weed control. For over 60 years farmers have depended on the Lilliston Rolling cultivator to provide efficient operation and minimize cost of ownership. The new completely redesigned Generation 4 offers improvements in reliability and ease-of-use.

- Quick, Easy Adjustment (Improved Productivity)
- Parallel Linkage Design (Optional Downforce)
- 25% Less Weight and increased Strength using advanced materials (AR 400 Steel)
- and superior engineering (Tab & Slot Design)

BIGHAM PARATILL

Break up compaction without destroying soil structure. The Bigham Paratill lifts and bends subsoil to remove hardpans. The difference is in the award winning leg design. The leg is angled 45 degrees to the side at working depths of 12" to 17" to gently lift the soil, allowing it to fracture along its natural planes of weakness and then settle back again. This loosening improves water infiltration and drainage, encourages root development, and allows for deeper fertilizer placement. The gentle lifting action leaves topsoil and subsoil layers intact, minimizes clods, and leaves valuable residue on the surface.

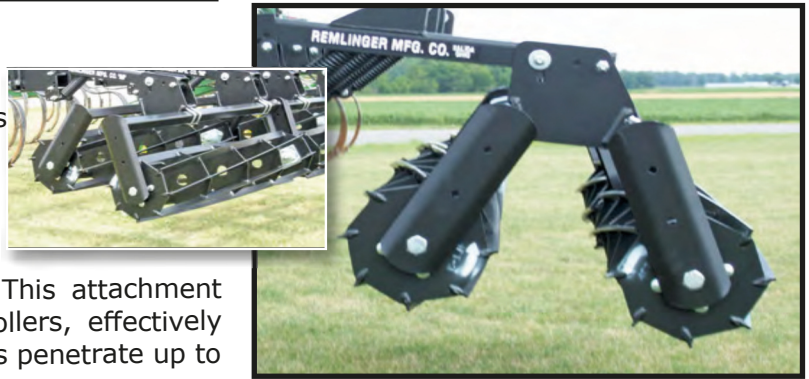

REMLINGER

Double Rolling Basket Harrow

- 12" diameter roller
- No center shaft to wedge rocks
- Heavy duty triple lip greaseable bearings
- Fits virtually all field cult
- Available with flat or round bar roller

The Remlinger Double Roller Harrow is designed to mount on field cultivators and other straight frame secondary tillage tools. This attachment combines two 12" spring tension mounted rollers, effectively breaking clods and churning the soil. The rollers penetrate up to 2" deep, mixing and firming the soil.

Single Rolling Basket Harrow

- 12" diameter roller
- Fits virtually all field cultivators
- No center shaft to wedge rocks
- Heavy duty triple lip greaseable bearings

Round Bar Roller

- Available Rolling Basket combinations
- Large 14" diameter roller
- 3/4" diameter bars

Remlinger 3 Bar Roller Flex Harrow

3 bar roller flex harrows mount on field cultivators and other straight frame secondary tillage tools. The attachment combines two tools into one. The 3 bar angle iron harrow breaks clods and levels the soil. The roller penetrates up to 2" deep, mixing and firming the soil. The unique design allows each tool to perform independently of the other.

Key Benefits

- Available in 3 bar-mounted designs
- 11" spike tooth on 9" spacing
- Each bar spaced 10" apart
- Single 12" roller with spring tension mounting arms
- 8 high carbon spiral blades
- No center shaft for better soil and residue flow
- Massive greaseable flanged disk bearings
- Adjustable roller can firm or shatter soil in one pass, effective even in conservation tillage
- Excellent performance in conservation tillage
- Mounts on most straight frame tillage tools
- Harrow sizes range from 3'6" to 6'6" in 9" increments

BESLER PRODUCTS

BESLER 8000 TRUCK BED

Constructed with 11 gauge deck plates, 4-inch channel stringers, and 3/16-inch channel cross members, these beds are tough and reliable. Ideal for heavy-duty tasks. Additionally, you can customize them with top-mount modular toolboxes, removable side rails, and bolt-on steps for under-bed tool boxes.

Key Features:

- Four under-bed tool boxes
- LED lighting and woven wire harness
- Bolt-in gooseneck assembly (30,000 lbs capacity)
- Customization options: modular toolboxes, removable side rails, bolt-on steps, and more
- With the Besler 8000, you're investing in efficiency, reliability, and rugged functionality.

It's built to exceed your demands and make your work easier

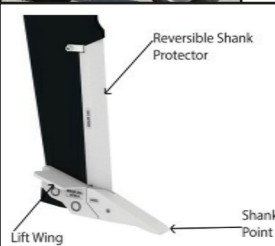

BESLER 4500 Ripper

5"x 7" Toolbar with Single Gauge Wheels and Reversible Shank Protectors for Double Wear.

Minimal Surface Soil Disturbance

Besler Options

- 20" Rigid or Spring loaded coulters
- Spring loaded closing wheels
- Lift Wing
- Comes in 3,5,7 or 9 shank options.
- Recommended horsepower 25-35 HP per shank
- Light Package available
- Three point attachment with Cat 2-3 Hitch

BESLER Stalk Chopper Model 8000/9000

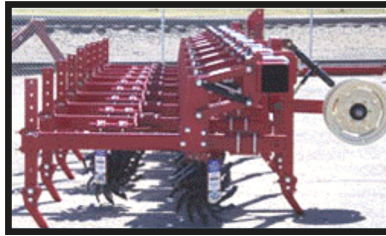

- 5 Spiral Blades on a double 7x7 tool bar
- Back Chopper Blades runs on reverse angle of Front Chopper Blades
- The toolbar can be filled with sand for additional weight
- Harrows or rolling baskets can be installed

30", 36", 38" and 40"

**Gangs have 3 different
angle settings to
maximize performance.
Available with optional
scraper.**

18"-20"
REVERSIBLE
CUTTER HEADS
(24"-28" ALSO AVAILABLE)

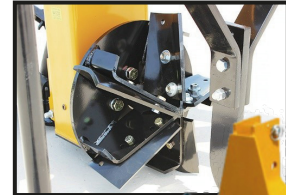

OFFSET & VERTICAL ROTARY DITCHERS

We offer both Offset and Vertical models,
and both drainage Ditcher body styles
can be ordered with either of our cutter head
sizes.

The Cutter head features five reversible blades
that can be turned over for a **second life cycle**.
The cutter head width is adjustable from 18" to
20" or from 26" to 24". Both drainage Ditcher
body styles can be ordered with either diameter
cutter head

Standard on all models is a concave skid shoe
design with the quick-adjust ratchet, which
allows the Ditcher to track better and form a
more uniform ditch.

The skid shoe mount is located behind the gear
case and helps prevent debris buildup
around the cutter head.

STRIP TILLAGE

CULTI-PRO

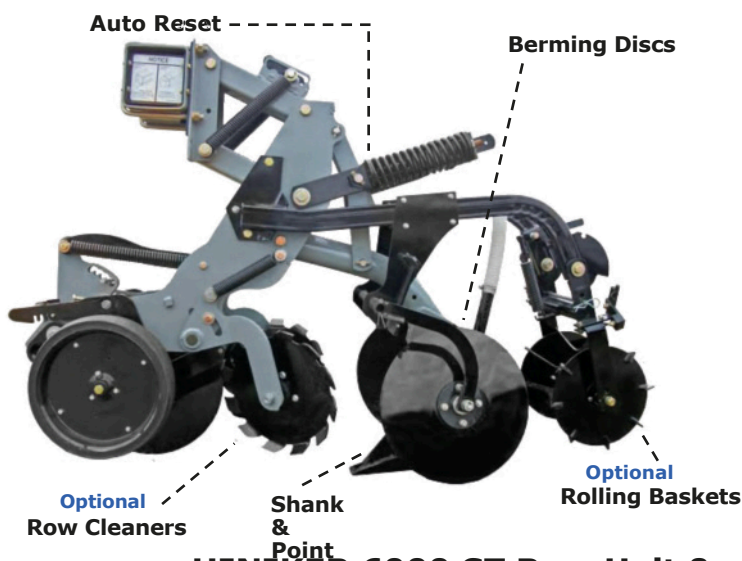

HIGH SPEED CULTIVATION IN ANY TILLAGE SYSTEM

The Hiniker CultiPro Cultivator is a high-speed row cultivator designed for efficient weed control and soil management. It features:

- Adjustable pitch for the share assembly, allowing easy hand adjustments without tools.
- Cutaway discs and shares for improved trash flow and minimal material flow into the row.
- Self-lubricated bushings at major pivot points for long life and easy maintenance.
- High operating speeds of 7-8 mph, suitable for high-residue conditions.
- Optional ridgers to move soil into the row for weed burial.
- Compatibility with cover crop seeding and harrow attachments for leveling and weed management.
- It's designed to accommodate row spacing as narrow as 20 inches and offers various options for customization.

Strip-tillage offers the advantages of no-till with the bonus of an earlier planting date. Strip-tilling fractures compacted soil. This causes the soil to warm more quickly and ends initial spring downtime, allowing growers to plant sooner.

HINIKER 6000 ST Row Unit & Basic Strip-Till Components

W/ Chrome point, 18" berming discs, 3/8" S.S. fertilizer tube with **Optional** 12" Adjustable row cleaner & 13" Wide rolling basket

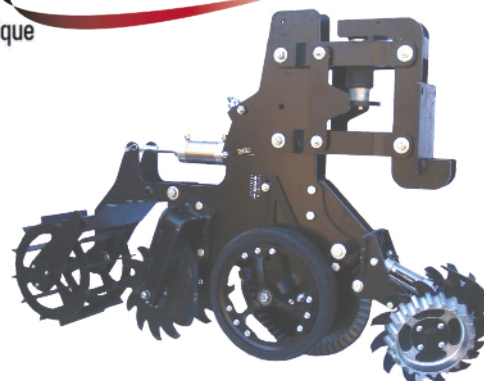

Yetter 2984 Strip Till Freshener CC

The 2984 CAB CONTROL Strip Freshener is specifically designed to address the unique challenges strip-tillers face in the spring,

- Quickly and easily adjust depth control
- Fine-tune row cleaner and rolling basket air pressure from the cab
- Create new strips in the fall or freshen existing strips in the spring
- Operate at 6 to 10 mph and at 1-1/2" to 4" deep, depending on depth setting
- Creates strips in untilled soil
- Places liquid or dry fertilizer in the strips
- Features 3-blade arrangement with rolling basket to condition strips for an ideal planting zone

OPTIONAL STAINLESS STEEL DEEP PLACEMENT DRY FERTILIZER CART

10-FOOT GRAIN BAG UNLOADER

With the capacity to load a 1,000-bushel trailer in about 7 minutes, the Loftness 10-Foot Grain Bag Unloader outperforms the competition not only in speed, but also in ruggedness and reliability. Stable site-to-site transportation. Fast setup. Easy operation. Straightforward maintenance. It's no wonder Loftness is North America's leading brand of grain bagging equipment.

GRAIN BAG LOADER 10

The GBL 10 provides maximum control over the grain bagging process with two 12.5L 15-inch SureGrip chevron- style traction tires equipped with extra large automotive style disc brakes. The unit includes a rotary hand wheel, which

precisely applies brake pressure to both wheels simultaneously while displaying the current pressure via a large liquid filled gauge.

ETS

ENVIROMENTAL TILLAGE SYSTEMS

SOIL WARRIOR SETS THE BAR

Ideal seedbed: Shallow tillage system creates an aerated seed bed that is warm, dry and mellow for quick germination and strong early plant growth.

Unprecedented soil management: A deep tillage cog wheel tills a zone 12" wide and 8"-12" deep while applying nutrients in the same pass. Adjacent soil and residue remain undisturbed.

Superior fertilizer placement: Banding nutrients creates a fertile zone for strong early growth and sustained development. Fertilizer is incorporated throughout the entire growing zone.

Minimizes compaction: Wheels ride on existing stalks or stubble limiting compaction. Seed is never planted in a wheel track.

Soil and water conservation: Undisturbed residue keeps erosion in check, provides an ideal environment for microbial activity, sequesters carbon and enhances organic matter.

- **Thick** $\frac{5}{8}$ " x 5" forged blade **for the toughest cutting jobs**

Flexxifinger®
The choice of mechanized farmers worldwide.™

The **Flexxifinger® Quicker Picker Rock Picker** is the world's first Rotary Rock Picker for skid loader use. Now Farmers and Landscapers can pick rocks with ease, picking rock 2 to 3 times faster than rock buckets. The Flexxifinger® Quicker Picker will fit on any skid loader with a quick attach plate. This design is modeled after the rotary combine and we all know how the rotary combine revolutionized the farming industry.

Simply scoop, spin, and the rock is picked clean. Made of heavy duty steel. Farmers can now pick rocks with ease, picking tough rocks that are barely visible. Simply scoop, spin, and the rock is picked clean. The Flexxifinger® Quicker Picker is versatile and can be used by landscapers with freshly cleared lots, picking tree stumps, pieces of wood, rocks, tin cans, hub caps and any other debris in its way. Junk yards and recycle yards can use the Flexxifinger® Quicker Picker to clean debris keeping sites clean.

LANDLUVR STRIP FRESHENERS

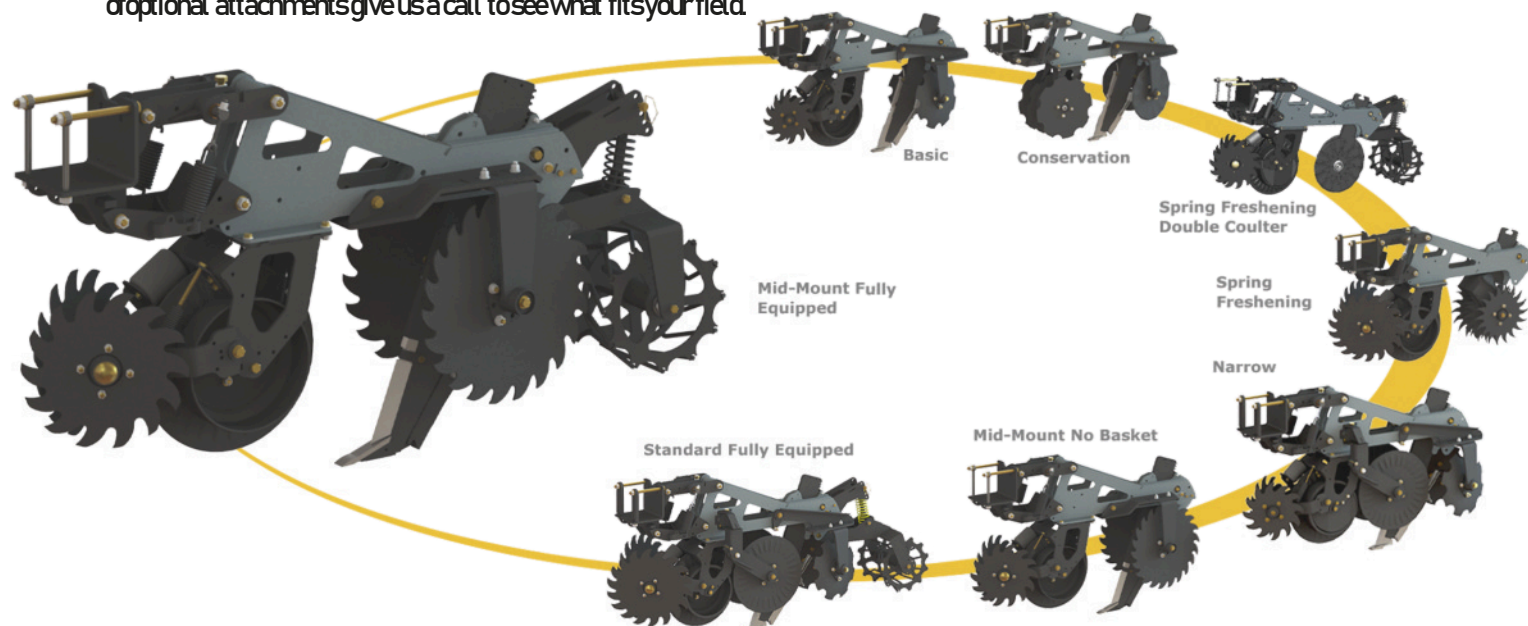

STRIP FRESHENERS

- Unique Design uses 4 spike-tooth blades to penetrate, lift, and crumble even hard, untilled soil
- Leaves a shallow zone of well-crumbled soil
- Lifts and throws soil inward, rebuilding the berm
- Can accommodate dry or liquid fertilizer
- Unique design allows for placement of fertilizer under loose soil
- Depth wheels run outside the strip for more consistent depth
- Can be operated at a wide range of speeds, with consistent results
- Easily fitted with a row cleaner. Like Yetter, Precision Clean-Sweep or any other front planter attachment.
- Allows planting earlier, smoother, and faster with better depth control
- Freshening combined with fertilizer application can reduce the amount of fertilizer carried by the planter. Simplicity of design doesn't require a rolling basket or dragging chains

STRIP-TILL UNITS

Improves soil health, reduce erosion, conserve moisture, Strip-till offers the versatility to adapt to different soil types and conditions while maintaining the benefits of reduced tillage. With a wide amount of optional attachments give us a call to see what fits your field.

IRRIGATION & LUBRICANTS

**POLY
SPLICE**

Easily connects two lengths of poly pipe using a locking mechanism to hold them together

COMBINE HEADER ATTACHMENTS

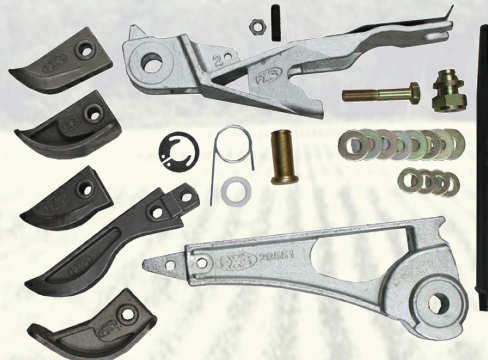

Flexifinger[®] FFA[®]

QD INDUSTRIES INC.

Farmers worldwide trust **Flexifinger** to put 'down' crops in the bin

* **FlexxiFloat[™]** Quick Detach Lifter Arm with Shoe

* Multiple shoe options available for different soil types.

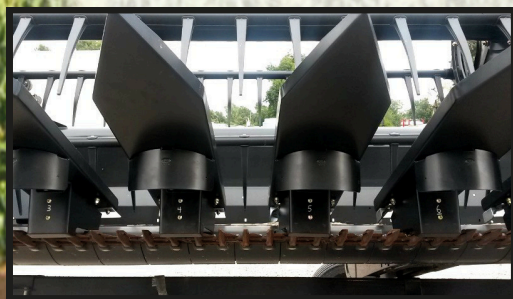

Quick Detach Corn Pans

You can now use your grain header to shell corn!!!

These Quick Detach corn pans fit most three-inch knife spaced grain platforms.

The units guide

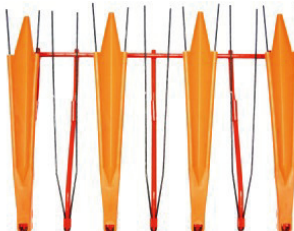

corn stalks to the cutter bar and ensure the cobs make it into the header. At \$430 per foot (avg.), the system cost is far less than compared with the cost of a corn header and you have virtually **NO LOSS ON END ROWS .**

DEPEND ON FLEXO-GUARD MILO GUARDS

- **PREVENT** Fall Away Heads
- **STOP** Drop Through Losses
- **CATCH** Thrown Out Heads
- **IMPROVE** Reel Action
- **REDUCE** Shatter Losses

Flexo-Guards, Inc.

REPLACEMENT PARTS FOR COMBINES

KONDEX®

Kondex Straw Claw® chopper blades deliver the ultimate value in residue management and product performance.

Our patented, self-serrating design uses a laser cladding additive on a through-hardened blade to control product wear and maintain blade sharpness longer. Controlled wear results in less chipping and blade damage, which in turn helps better maintain rotor balance and minimize maintenance.

ThreshStart Kit*

The KX7 concave system centers on patented box design, MaxThresh™ and MaxRound™. These boxes are designed with angled bars that meet the crop head-on, allow for customized threshing, and increase your rotary combine's capacity.

The KX7 MaxRound™ brings the benefits of a helical design into the round bar category, improving threshing in corn and soybeans while also maximizing separation in small grains and cereals.

Both the MaxThresh™ and MaxRound™ are heat treated and reversible to provide increased useful life. The design of the MaxThresh™ and MaxRound™ boxes allows for faster threshing and maximum combine capacity. This allows you to increase your concave clearance, reducing wear on your rotor and providing more flexibility to fine tune settings.

Kondex understands that not all crop harvesting conditions or combines are the same, which is why the KX7 concaves give you more configurations and options to best match your unique needs.

The KX7 concaves are Made in the USA, and are designed to outperform other aftermarket offerings.

A Better Thresh Begins with ThreshStart™

Kondex KX7 ThreshStart™ concave kits are designed for those looking to begin gaining improved threshing and grain quality with minimal investment. ThreshStart kits include two rows of KX7 concaves for installation in the front, most critical threshing position. Standard concaves can be installed behind them. Additional KX7 assemblies will provide even greater results.

SEED TENDERS & GRAIN CART

PATRIOT

220 bulk seed trailer priced w/ optional electric start (red or green)

Fold Auger w/ Springload

Direct Drive (no belts)

Pivot Bridges

Pro Box Seed Tenders

STANDARD FEATURES

- 182 Bushel Capacity
- Two Compartment Hopper
- 6" Auger Delivers Up To 8 Bushels A Minute
- 5.5 HP Honda Engine (Optional Electric Start)
- Variable Throttle Control
- Slide Gate For Shut Off
- Direct Drive (NO BELTS!)
- Spring Loaded Auger For Easy Transition
- Clean-out Door At The Bottom Of The Auger
- 235/80R16 10 Ply On 8 On 6.5 White Spoke Rim
- Long Enough Auger to Fill: John Deere's Central Commodity System & Case's Bulk Fill Productivity System

OPTIONS

- 12V Seed Treater
- Electric Start & Scales

Ask us about Demco or KillBros Grain Carts & Gravity Flow Carts.

Unload rate of 300 bu./min.

36 FEET

HARVEST LINK

Benefits of HARVEST

- Keep your equipment moving. Increase harvest speed.
- Extra capacity to unload grain carts into & keep combines running.
- Auger length gives the option of loading trucks on a secondary road
- Capacity of 3,000 bu. (based on #2 corn, 56#)
- 18" unload auger with UltraFlyte™ auger flighting

SPECIALTY SOLUTIONS

Mighty Mini

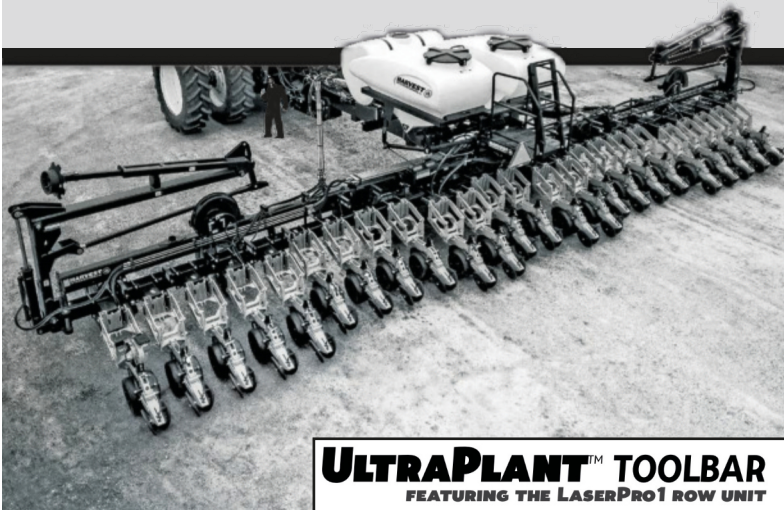

Innovative design allows you to easily CLEAR your grain bin auger from the SAFETY OF YOUR TRACTOR SEAT.

When it comes to grain storage safety.....the less you are in the bin the better!

Installation is quick and easy and blockages are broken up in seconds, saving you time and money.

The Mighty Mini from Sump Saver effortlessly slices and crushes obstacles approaching the grain sump, safely restoring grain flow WITHOUT EVER STEPPING INSIDE THE BIN!

SPECIALTY SOLUTIONS

The TTQ Trojan Stalk Shredder
Built for high efficiency and durability in
mulching row crops like cotton and corn
this stalk shredder is designed with:

- A Specially designed flail pattern increases mulching efficiency and quality
- Extra Flails: 6-8 extra flails per row distribute the workload, extending flail life and maintaining balance
- Replaceable Wear Skins: Easy replacement of wear skins to ensure consistent performance
- Heavy-Duty Bearings: Designed for trouble-free replacement
- Grease Points and Access Holes: Easy access for maintenance and inspection
- Low-Mounted Gearbox: Increases lifting height for easier operation
- Durability: Built with high-grade steel for strength and longevity
- This machine is built tough yet efficient,

SCORPION ROOT CUTTER

The TTQ Scorpion Root Cutter revolutionizes root cutting with its patented breakaway system, eliminating the need for constant disc flip and blockage fixes, making it highly efficient for tasks like killing cotton plants and clearing heavy root growth in other crops.

- **Durability:** Constructed with high-quality materials to withstand the rigors of tough farming conditions, ensuring long-lasting performance.
- **Versatility:** Designed to handle a variety of crops, making it a valuable tool for different farming applications.
- **Easy Maintenance:** Features a simple design that allows for quick and easy maintenance, reducing downtime and keeping you productive.
- **Adjustable Settings:** Equipped with adjustable settings to customize the depth and angle of the cut, ensuring optimal performance for your specific needs.

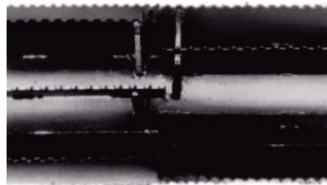

SPECIALTY SOLUTIONS

Cover Crop Crimper-Roller with a 3 point Hitch

The unique, staggered sectional blade design allows you to roll and crimp in one smooth operation at speeds up to 8 MPH. The Harrell Crop Roller Crimper features tubular steel construction, a category 3 hitch and overlapping drums. It is available in a 6 row rigid frame configuration and 8 or 12 rows with a hydraulic folding toolbar.

DOWN TIME ACTIVITIES

We have access to one of the best Truck Accessory & Outdoor equipment suppliers in the area, to get all your cleaning, truck and "down-time" needs!

We share the passion for truck parts, hunting, and fishing, so we offer you products to help you do what you do, once the work is done!

We are proud to offer some of the top brands in the industry for truck accessories and tires, including brands like Rough Country, Toyo, Nitto, Fuel, XD, Tommy Gate, Whitco, and VP Fuel. Not only can we provide a vast variety of truck accessories, but also outdoor brands in the industry including clothing brands like Banded, Columbia, Drake, and Sitka.

HIGH SPEED CULTIVATION & VERSATILITY

HINIKER

High Residue and Cover
Crops? Hiniker can Handle It!

SPEED & VERSATILITY In Any Tillage System

Middleworker point and shares permit high speed operation without slabs and buried crops common to sweep cultivators. Oscillating dual gauge wheels stay clean in muddy conditions while maintaining pinpoint depth control. Convenient lever adjustments allow for instant changes of all critical settings.

RIDGING & BEDDING Options

Flood irrigation, ridge planting, bedding cotton, in fact whenever you need to move soil into the row, the 6000 is your tool. Flip down the adjustable ridgers and conform the soil to your exact specifications.

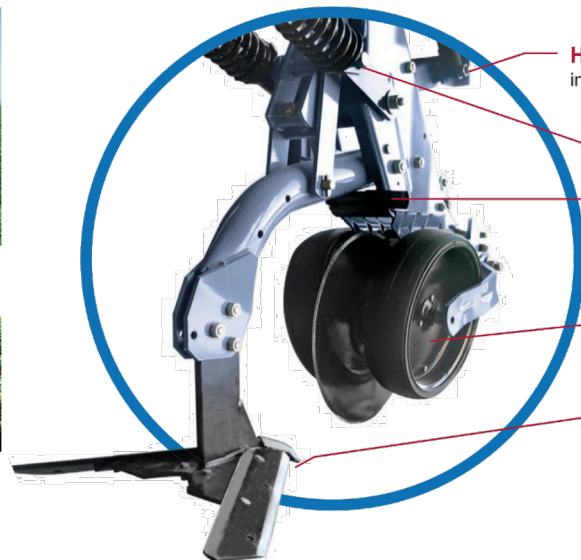

CUTAWAY DISC Option

Quick and easy pin adjustments permit 10 horizontal and 14 vertical settings.

High Speed Cultivation IN A WIDE RANGE OF CONDITIONS

The Hiniker 6000 Cultivator is designed to cultivate fast without burying vulnerable young plants in the row. The unique geometry of the Hiniker 3-piece sweeps ensures thorough cultivation with minimal soil movement into the row.

Highest Toolbar Clearance
in the industry.

Auto-Reset Mechanism
for improved rock protection.

Exclusive Lever (no wrench) Adjustment
of depth, coulter, and down pressure.

Oscillating Dual Gauge Wheels
offer planter like depth control.

Chrome Carbide Point and double sided 1095 steel shares outwear and outweed sweeps without troublesome slabbing.

FERTILIZER Options

"T" Shaped liquid fertilizer tubes place nutrients on each side of the row for better plant uptake.

NH₃ coil shanks accept flat knives for preplant or side-dress application.

Double disc closers help to seal NH₃ in heavy residue conditions.

Our mission statement is to see Deuteronomy 11:12-15 on our farms...a land for which the Lord your God cares for; the eyes of Adonai are always upon it from the beginning of the year up to the end of the year. And if you will diligently heed My commandments—to love the Lord your God and to serve Him with all your mind and heart—then I will give rain for your land in its season, the early rain and the late rain—so that you may gather in your crops. I will give grass in your fields for your livestock and you will eat and be satisfied....Because God made
