About IMI Performance Products, Inc.

Over the last 10 years IMI Performance Products, also known as Hi-Torque Starters, has developed a full line of aftermarket Industrial, automotive, off-road, and marine starters. Our design coupled with the gear reduction technology of Nippondenso has brought us to the forefront of the automotive aftermarket. It is our belief that customer service and product reliability are two of the most important aspects in any business. With our unmatched quality control we continue to hold less than a one percent failure rate. Superior product reliability enables us to provide the highest quality product to our customers.

At IMI Performance Products, Inc. we are always learning. With the ever-increasing number of applications it is difficult to know the specifics of every unit. We pride ourselves on providing the most flexible and dynamic unit in the growing market of today. Over the years we have found that by simply giving our customers access to a variety of starter motors has allowed us to make custom applications for the hard to find replacement. We carry a full line of 12v, 24v, CW, & even CCW. With this combination of access the applications are limitless. If we don't have it, we can create it. What can we create for you?

All of our units are under the protection of our patents.

- US PATENT Nos. 5,163,335 & RE 35,425
- AUSTRALIAN PATENT Nos. 650151 & 670003
- CANADIAN PATENT No. 2073799-906
- GERMAN PATENT No. 42 23 209
