Congratulations on your purchase of a water-powered back up pump system! Reliability of your primary sump pump is very important. But, it is absolutely critical for the backup sump pump, which is your "last line of defense" against basement flooding to be 100% in working condition. A water-powered backup pump is one of the most reliable back up systems to be installed in your home. Yes, water-powered backup pump can run indefinitely, as long as city water is available. To make sure you water-powered backup pump is working correctly a periodic maintenance check should be performed, especially after heavy or persistent rainfall. If you clean and maintain your water-powered back up pump properly and regularly it will help extend its lifespan.

Caballero & Sons Plumbing wants to help keep you worry-free no matter what the weather is like outside! Help relieve the stress of possible water damage by a failed back up system, sign up for our maintenance program today! It is often recommended that you **do not** service your water-powered back up pump yourself, but leave that task to a certified specialist.
