TEST EVERY VEHICLE

WHY TESTING EVERY VEHICLE IS BENEFICIAL TO YOUR BUSINESS

DID YOU KNOW

Each year, **\$60 billion** in needed repairs are not performed. Customers are keeping their cars longer and preventive care, like testing, can uncover key repairs that increase your business and help keep your customers safe on the road.

Manufacturers are adding more electronics, creating more demand on the batteries and charging system, which are critical for the vehicle to start.

Incorrect battery installation can lead to vehicle damage - an OE AGM battery can only be replaced with another AGM battery.

Testing the vehicle and providing the results allows customers to deal with issues before they become an inconvenient, expensive, or potentially dangerous situation.

NAPA recommends offering a quick 3-minute electrical system test to every vehicle in your shop. If you're not performing testing checks, you're missing out.

VEHICLES ON THE ROAD TODAY

The average age of U.S. vehicles on the road rose to 12.7 years in 2024 and is expected to hit 13 years by 2026

8% will replace an *alternator* or *starter* this year

25% will replace a *battery* this year

87% of people replace *battery* when shop test shows weak power

MOLYGEN

A new molecular dimension

A perfect combination of high-performance motor oil in combination with an extra added chemical friction modifier. The synergistic effect of the MFC technology contributes to increased engine efficiency and minimized wear, making these oils ideal for Asian and American vehicles with start-stop systems, hybrid vehicles, tuned and high-performance engines. The striking green color makes the oil unique on the market.

ECHLIN®

ENGINEERING IMPROVEMENTS OVER OE IGNITION COILS

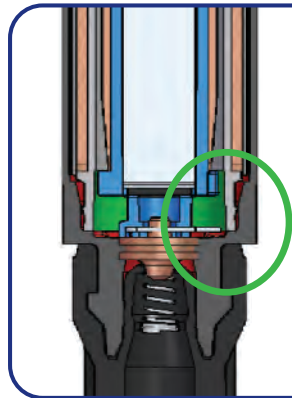

The Echlin® Design Eliminates Moisture Intrusion

When the O-rings on OE coils break down, moisture seeps in, leading to premature coil failure. The improved one-piece design of Echlin® Coils prevents moisture intrusion for a longer service life.

OE Problem:

The internal O-ring breaks down, allowing moisture intrusion which causes the coil to fail prematurely

ECHLIN® Solution:

We engineered an improved, one-piece design that eliminates the need for an O-ring and removes the chance of moisture intrusion

LOOKS RIGHT. FITS RIGHT. PERFORMS RIGHT.
