PERFORMANCE
YOU FEEL.
PARTS
YOU CAN TRUST.

BENEFITS OF SELLING A COMPLETE BRAKE JOB

All brake jobs are not created equal, and only a complete brake job creates efficiency in the shop, eliminates mistakes and provides consistent quality to your customers. In the context of parts required, the definition may vary based upon factors such as previous vehicle maintenance, mileage and vehicle age, but in the context of a job done correctly, it's the same every time. Follow a consistent approach, and brake service will quickly become one of your most valuable services.

INSPECTION

This is where you set the bar for success. Accurately assessing the needs of any given brake repair is only accomplished by disassembling the brakes for inspection. Test drives only verify symptoms. Visual inspections through wheel openings or inspection windows only yield guesses. Calipers must be removed for proper assessment of disc brakes; drums must be removed for assessment of drum brakes. Performing a thorough brake inspection allows you to provide an accurate quote and get the job done right, the first time, every time. This improves technician efficiency, prevents mistakes, and builds customer rapport by eliminating call backs and add-on charges.

HYDRAULICS AND HARDWARE

On disc brake systems, inspect the calipers for leaks, torn piston or slide pin boots, seized or binding pistons or seized caliper slides and pins which indicate the caliper needs to be repaired or replaced. Repairs are acceptable, but these problems are normally associated with higher mileage, and replacing the complete caliper is recommended for the best performance. Remember, calipers should always be replaced in pairs to ensure balanced, accurate braking.

LININGS, ROTORS AND DRUMS

For brakes to perform as intended, new pads or shoes must be able to break in against a properly finished surface. Only new or resurfaced rotors and drums, along with new pads or shoes, will allow this to occur. Break-in or bed-in procedures for pads and shoes involve a gradual build-up of heat to evenly transfer a layer of friction material onto the rotor or drum surface, to maximize brake performance and life. Don't omit this critical procedure. Heat dissipation is also critical for proper brake performance, and rotors or drums that are worn close to or below the service limit, as well as severely rusted components, will affect brake performance and longevity.

BRAKE FLUID

At minimum, brake fluid should be flushed or changed every two years, which will not only extend the life of brake system hydraulic components, but it can improve brake performance as well. If you're already opening the system for replacement of a hydraulic component, always flush the fluid.

Using high quality brake components, such as those from a trusted supplier such as NAPA, is yet another way to improve technician efficiency with kits and components that contain all the necessary hardware to get the job done the right way, the first time. Your customer will benefit from exceptional brake performance, safety, and the peace of mind from reputable parts.

For every \$200 spent on
Brembo Brakes get a

\$25 PREPAID
VISA® CARD*

Only NAPA Installer Rewards members and Auto Care Centers are eligible.

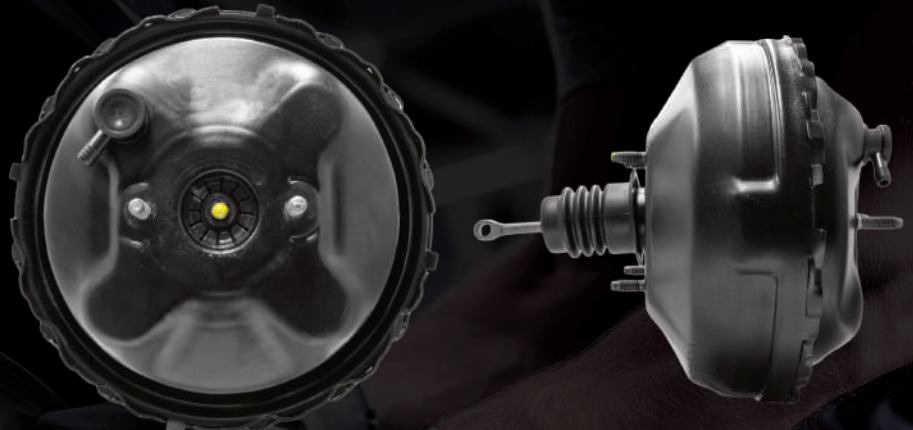

Contact your local NAPA AUTO PARTS store to enroll in the 2026 NAPA Installer Rewards program.

E-COAT HUB BEARINGS

Why NAPA E-Coat Is “BETTER” Than Other Competitors

- OEM process electrodeposition coating (E Coat), which provides superior rust & corrosion protection passing 240 hr salt spray test
- Protocol Steel offers extended performance and superior fatigue life
- High Quality Chevron BP-2 grease for all precision components
- OEM Integrated ABS Connectors for long life and durability
- Triple-lip seal design
- Orbital formed design on applicable parts for easy installation & improved pre-load condition to avoid over-torque
- Meet or exceed OE fit, function and performance
- 472 skus, ~93% coverage on Passenger / Light Duty Trucks
- 3 years / 36,000 mile warranty

Orbital formed design

Premium triple-lip seal design

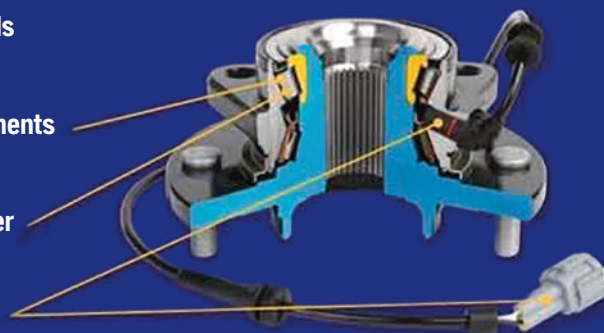

Electrodeposition coated

OEM lug studs

Precision Roller Components

Single and double row bearings - ball & taper roller matching OE design

OEM Integrated ABS Connectors for long life and durability

ADAPTIVE ONE Premium Brake Calipers

Adaptive One's E-coating is superior to the competitor's powder coating because:

- It provides a uniform layer of corrosion protection for both the housing and the bracket
- The ability to E-coat aluminum calipers offers a distinct advantage over all other brands
- E-coating inside the bracket bores helps prevent stuck brackets and reduce come-backs
- It passes a 96-hour continuous salt spray validation test
- All mechanical parking brake components are E-coated, including the cable brackets
- The electrodeposition coating is applied via submersion, and not a spray, offering more consistent and uniform coverage
- The coating is environmentally friendly, heavy metal-free, and OSHA and EPA compliant

POWER STEERING SOLUTIONS

POWERED BY REMY

THE BRAND TRUSTED & RELIED ON BY AUTO PROFESSIONALS EVERYWHERE!

Units come complete with necessary components delivering a true "job-in-the-box" solution (where applicable across the program). Simplifies installation, eliminates part-hunting for installers, and enhances the overall customer experience.

POWER STEERING PUMPS

Ready for installation with pre-installed steel pulleys and reservoirs, filters, clamps & mounting hardware. Remote reservoirs are included for units that have been identified as failure prone due to clogged filter/screen.

RACK & PINIONS

Ready for installation with outer tie rods and jam nuts included so there is no need to reuse any worn or corroded parts.

STEERING GEARS

Ready for installation with pitman arms and fasteners included which eliminates the need for special tools or torches to remove and reuse the old pitman arm.

SUSPENSION/EXHAUST

COMPLETE EXHAUST REPAIR. ONE SIMPLE KIT.

ELIMINATE GUESSWORK AND TURN BAYS FASTER WITH THESE COMPLETE REPAIR KITS.

The exhaust system works as a single unified assembly, so proper repair requires more than a new muffler. NAPA Exhaust Direct-Fit Replacement Kits simplify the job by including the application-specific parts you need for a complete repair in one convenient kit. No need to manage multiple numbers. No waiting for forgotten parts.

Full Kit with Everything You Need.

EACH KIT INCLUDES:

MUFFLER | HARDWARE | GASKETS & ISOLATORS
(Where Applicable)

SAVES TIME:

No more wasted time hunting down parts—each kit includes everything you need.

EASY TO INSTALL:

Direct-fit, OE-style hangers and routing ensure smooth installation with no welding or fabrication needed.

BUILT TO LAST:

Premium materials and construction help resist corrosion, vibration and wear.

NEW COMPONENTS:

Replaces worn hardware and isolators with quality matched parts.

CONSISTENT PERFORMANCE:

Parts are matched to ensure proper flow, backpressure and premium factory-style sound quality.

DEDICATED NAPA® TECH SUPPORT LINE: (800) 568-6664

RIDE SAFE WITH NAPA® SHOCKS & STRUTS

These aftermarket shocks, struts and strut assemblies – from the internal valving technologies to springs and top-mount components – are engineered to address each vehicle's specific ride performance and handling profile for safe, precise handling and control.

- Aftermarket Shocks for Every Ride Experience
- Application Engineered to Restore OE Ride and Handling
- Premium Technology for Quality Ride and Handling
- Technical Support for Your Team

A staff of ASE Master Technicians is available to answer all your questions and NAPA Products are backed by a Limited Lifetime Warranty and Feel the Difference Guarantee.

Dedicated NAPA® Tech Support Line:
(800) 568-6664

Feel the Difference® Guarantee:
(800) 206-4813

These units include all components needed for complete strut replacement optimized to restore OE ride and handling.

- Quality strut rod design helps maintain structural integrity.
- OE-style, application-specific coil springs help maintain ride height.

Vehicle-specific technology provides added comfort, handling and control while filtering out noise, vibration and harshness.

- Available in Monotube and Twin Tube designs

Specifically designed for hardworking vehicles.

- Magnum strut assemblies feature application-specific technology and coil spring design for a comfortable ride and extra support when under load.
- Magnum shocks for light commercial vehicles feature 10-stage valving and large bore for a controlled ride and long service life.

Replacement ride control solutions engineered for the ride experience.

LOADED BRAKE BACKING PLATE

Protect the braking system from debris and corrosive weather conditions with this rust-resistant replacement loaded brake backing plate. Dimensional verification and salt spray testing ensures proper fit and extended service life.

NOE 949-100
Cadillac 2020-02, Chevrolet
2020-01, GMC 2020-01

AIR SUSPENSION COMPRESSOR

When an original equipment air suspension compressor malfunctions on certain Cadillac, Chevrolet and GMC SUVs, it's often due to the compressor's DC motor overheating and causing a cascade of downstream system failures, including leaks in air lines, push-to-connect fittings and air bags or springs. Replacing a failed compressor with another OE unit only invites a similar costly repair or replacement in the future. This patent-pending Dorman® OE FIX® air suspension compressor features an innovative finned compression cylinder design that transfers 25% more heat than the factory cylinder during the compression process, providing a longer-lasting, upgraded repair. The increased rate and volume of heat dissipation also helps ensure the compressor operates within its optimal ranges, improving air suspension performance and vehicle handling consistency. A thermal protection device and a unique protective membrane provides additional protection against overheating that can damage the compressor.

STEERING KNUCKLES

When an original equipment wheel hub assembly is due for replacement on certain Ford F-150 trucks, the job can become difficult because rust has grown between the surfaces of the steering knuckle and the wheel hub bearing, ultimately resulting in the two assemblies seizing together. Although this problem is common in Salt Belt regions, it can also occur over time under normal vehicle use and when it does it can make the knuckle challenging or impossible to salvage. This Dorman® OE FIX® steering knuckle features a patent-pending and proprietary coating that helps prevent corrosion between surfaces, providing a more permanent and reliable repair than the factory knuckle design.

NOE 686-406 (Front Right)
NOE 686-407 (Front Left)

PRECISION ENGINEERING

The NAPA Premium Chassis Advantage

1 Zerk Fitting
Facilitates regular grease maintenance of ball joint.

Premium Greaseable Low Friction Design
Restores original steering feel, greaseable for extended life.

2 Corrosion Inhibiting Coatings
Greater rust prevention for increased durability.

3 Upgraded Hardware
Patented cotter pin design allows for tool-less installation and removal.

4 Knurled Housing
Ensures ball joint has proper press fit into control arm

Easier Installation
Hex grab allows for installation and removal without the stud spinning.

Layered Boot Seal
Provides tight fit against knuckle, helping to keep water and debris out.

NAPA Chassis Ball Joint Comparison*		 	
Feature	Benefit	NAPA	Competitor
1 Premium greaseable low friction designs	Restores original steering feel, greaseable for extended service life	✓	
2 Premium corrosion inhibiting coatings	Great rust prevention for increased durability	✓	
3 Upgraded Installation Hardware	Oversized castle nut and patented reusable cotter pin increases safety and reduces labor time	✓	
4 Knurled Housing	Ensures ball joint has proper press fit into control arm which is imperative for safe operation on vehicle	✓

COMPACT SERIES™

20V MAX*™

DEW DCG400B 20V MAX* ATOMIC™ 4" Angle Grinder

- Brushless, high-performance grinder designed for tight spaces with pneumatic-like power and enhanced control.

DEW DCG402B 20V MAX* ATOMIC™ 4-1/2" Angle Grinder

- Delivers powerful grinding and cutting performance in a compact, ergonomic design for ultra tight spaces

DEW DCG422B 20V MAX* ATOMIC™ Right Angle Die Grinder

- Compact right-angle design provides superior access and control in confined work areas.

DEW DCG420B 20V MAX* ATOMIC™ Die Grinder

- Brushless die grinder engineered for tight spaces that delivers optimized maneuverability and up to 445 MWO

DEW DCG420XB 20V MAX* ATOMIC™ Extended Die Grinder

- Extended reach design helps access hard-to-reach areas while maintaining professional-grade performance

DEW DCG430B 20V MAX* ATOMIC™ 3" Cut-Off Tool

- Make straight, clean cuts in tight or narrow spaces. Engineered for tough metalworking applications, this tool is equipped with the DEWALT® AN-TI-ROTATION System to help maximize control

DEW DCG432XB 20V MAX* ATOMIC™ Extended Cut-Off Tool

- Extended neck design improves visibility and access for precise cuts in difficult locations.

Maximum initial battery voltage (measured without a workload) is 20 volts. Nominal voltage is 18. Available while supplies last. ©2026 DEWALT.

New EV C.V. Axles

DESIGNED FOR ELECTRIC VEHICLE APPLICATIONS

Now Available for the Aftermarket

NEW

NAPA® New EV C.V. Axles are designed specifically for the demand of today's electric vehicles that deliver higher torque loads during acceleration compared to traditional ICE vehicles.

Additionally, they are engineered to minimize NVH (noise, vibration, and harshness) to provide the same quiet, smooth operation as the OE design.

MAXIMIZE YOUR SALES OPPORTUNITIES

EV numbers cover over 3.6 million vehicles in operation (VIO Data)

KEY BENEFITS:

- Designed to handle the high torque delivery and packaging considerations of electric drivetrains
- Constructed of advanced materials that offer improved strength-to-weight ratios while maintaining durability, improving efficiency, and enhancing overall vehicle performance
- Calculated improvements focused on minimizing NVH levels for a smoother and quieter driving experience
- Provide the same dependable quiet, smooth ride as designed by OE

FIT

Designed for EV applications.

FORM

Provide an OE matched replacement for high torque Electric Vehicles.

FUNCTION

Operate like the OE axle providing the same driving feel and standards for NVH.

FREE IS THE KEY TO A BRIGHTER FUTURE NAPA ASE CERTIFIED COURSE

For technicians working toward ASE certification, preparation is about more than passing a test, it's about validating the skills you use every day in the shop. The NAPA ASE Certified course, developed by Babcox's ASE-certified technicians, is designed to support that goal with practical, real-world training tailored to working professionals.

This all-video NAPA ASE Test Prep course covers the A1–A8 Automobile Certification exams and the G1 Maintenance and Light Repair exam. The curriculum focuses on the systems technicians' service daily, including engine repair, transmissions, steering and suspension, brakes, electrical and electronic systems, HVAC, and engine performance. Each module connects core theory with real-world diagnostic thinking, helping technicians strengthen both knowledge and problem-solving skills. Integrated practice tests allow users to assess readiness and identify areas that may need additional review before exam day.

National Institute for
**AUTOMOTIVE
SERVICE
EXCELLENCE**

Since 1972, the National Institute for Automotive Service Excellence (ASE) has established the industry benchmark for technician certification. Earning ASE credentials requires passing a rigorous exam and documenting relevant hands-on experience, typically two years in the field or a combination of education and work experience. This combination ensures that certified technicians demonstrate both technical knowledge and practical capability.

Technicians who successfully complete all eight A-Series exams earn the ASE Master Technician designation, one of the most respected credentials in the automotive service industry. Because certifications must be renewed every five years, ASE-certified professionals demonstrate an ongoing commitment to staying current with evolving vehicle technologies, advanced diagnostics, and updated repair procedures.

With today's vehicles incorporating increasingly complex electronics, networked systems, and advanced driver assistance technologies, structured exam preparation can help technicians study more efficiently and confidently. By aligning directly with ASE test objectives, the NAPA ASE Test Prep course provides focused, relevant content that supports measurable career advancement.

Offered at no cost to aspiring automotive technicians, the NAPA ASE course helps reduce barriers to certification while reinforcing professional development. Whether pursuing initial certification or working toward Master Technician status, technicians can use this training to sharpen their expertise, strengthen their credentials, and reinforce their value in a competitive and rapidly advancing industry.
