

Pest, Inc.

P.O. Box 1311 • Temple, TX 76503

German Roach Preparation

1. Remove everything from the kitchen and bathroom cabinets and drawers.
 - Place contents on a table or in the center of the room, cover with a sheet.
 - Try to not place items on counter-tops and stoves.
 - Leave all cabinet doors OPEN.
2. Clean areas to remove any grease, dirt, glue, and dust prior to treatment:
 - Counter-tops and cabinet shelving
 - Around appliances
 - Cabinets
 - Exhaust hood
 - Baseboards
 - Floors
3. Clean all dishes in the sink. Do not leave dirty dishes.
4. Remove dead insects and insect droppings.
5. Dispose of all trash.
6. Reduce household clutter.
7. Remove breakable items from the top of the refrigerator and stove top.
 - Our technicians will pull out and treat behind the appliances

Items may be placed back in the cabinets once the chemical is completely dry. After treatment has completely dried, a Clorox wipe may be used to clean the counter-tops and cabinet shelves in areas that food is handled or dishes are placed. Avoid cleaning cracks and crevices.

Don't be alarmed if you notice a few insects after the property has been treated.
