

I am privileged to have been a part of TALC's Certified Landscape Professional program. It will go far to improve the knowledge and professionalism within the landscape industry and is certain to have significant and long lasting effects on the quality of the environment in Texas. Congratulations to you all on a job well done.

October 1, 1990

Michael D. Murphy

Head of Department of Landscape Architecture
Texas A&M University
President, Texas Chapter - American Society of Landscape Architects

We are aware of your committee's efforts to increase the professionalism of landscape contractors in Texas. As a state agency, this department deals with a large number of landscape contractors throughout the state. As a result, we are very interested in the potential benefits that certification could bring to this industry, as well as to the people of Texas, and, in turn, improve the quality of services and products available for state projects.

Craig Steffens

Chief Landscape Architect
Maintenance and Operations Division,
Texas State Department of Highways and Public Transportation

The purpose of TALC's Certification Program is to improve industry professionalism through increased knowledge. Ultimately this will enable landscape professionals to create greater value for our marketplace and will therefore benefit all involved. I have long believed in the goal TALC's Certification Program pursues so I have made the commitment to become a Certified Landscape Professional.

Len Gallagher, C.L.P.

Landscape Contractor
TALC President, 1986-87
