

Cost of Mini Dental Implants, MDI's

The cost of mini dental implants is one factor that may play a large role in your decision to select MDI's for your smile solution. While cost can be a determining factor, Mini Dental Implants provide many benefits that outweigh their cost. If you are considering dental implantation for replacing broken, damaged, decayed or missing teeth, consider all of the procedural benefits before basing your decision on cost.

Cost is often a consideration. At David M. Shemo, D.M.D., Mini Dental Implants are often up to 60% cheaper than their traditional counterparts. Here are a few reasons why.

When Dr. Shemo places the Mini Dental Implants, there is no invasive surgery involved. The procedure only takes a few visits to complete. Only a local anesthetic is necessary. The small incision made in the gum line does not require stitches. Traditional dental implants take several procedures to place, may require stitches and downtime, and do not provide immediate implant use.

Placing Mini Dental Implants is a single treatment, mildly invasive procedure that does not require downtime. You can return to your daily life immediately. This greatly reduces the cost of Mini Dental Implants because MDI's require less treatment time, less recovery time and less visits to the dentist!

While Mini Dental Implants work for most patients, some require additional procedures before the implant can be placed. This can also affect overall cost. Visit Dr. David Shemo for your FREE MDI Consultation. At your consultation Dr. Shemo will determine what treatments, if any, are needed. Dr. Shemo will also let you know what your overall cost for Mini Dental Implants will be. Each patient's needs are very different. Therefore, a consultation will determine your individual investment in your smile and oral health.

Mini Dental Implants are a safe and effective way to improve your smile for a natural look and feel, but knowing more about the cost of mini dental implants is an important step in moving forward. Call for your FREE MDI Consultation today, 570-822-4065. See if this innovative treatment, and price, are right for you.
