PERIMETER LIGHTING

nFORCE® Perimeter Lights

Effective lighting solutions with forward and off-angle illumination, available in surface or recessed mount, deck/grille and interior windshield.

nFORCE Surface Mount

nFORCE Dual Deck/Grille

nFORCE Recess Mount

Bolt 2

Compact and effective light designed for versatility and reliability.

XF Flush Mount

This compact, flush-mount light with bluePRINT® compatibility fits seamlessly into any vehicle thanks to its low-profile design.

SL Running Light

Ensure vehicles will be seen from any perspective with this extremely versatile, bluePRINT® compatible running light.

DIRECTIONAL WARNING

mpower® Traffic Controller *Higher price, capabilities & performance*

Premium controller with a durable silicone lens, mounts in any direction, and provides separate controls for each facing.

TM100 Traffic Controller *Simple & affordable*

Easy-to-use traffic controller offering great visibility at an affordable price.

BEACONS

nROADS® Beacon *Multi-color, more configurable & style preference*

This versatile beacon offers 360-degree lighting, configurable LEDs and multiple color and mounting options for optimal visibility and durability in any environment.

4200 & 4500 Series Beacon

With optimal light distribution and long-life span of these traditional beacons allow for reliable signaling across a range of applications.

Ford Dual Beacon 360-Degree Lighting Kit

Quickly and easily install this two-beacon lighting kit to ensure visibility from all sides. The 360-degrees of light output ensures you'll be seen from any direction.

CONTROL SYSTEMS

800 Series Controller

A highly versatile panel featuring eight programmable buttons that support directional arrow function.

bluePRINT® Central Controller

Communicate clearly with this fully configurable communication hub for SoundOff Signal's innovative bluePRINT® control system.

ADD-ONS

bluePRINT Sync®

Provide warning system coordination between an entire fleet of vehicles through the use of GPS timing. Sync-equipped vehicles will automatically flash in unison when using the same pattern creating a calmer scene.

bluePRINT® Remote Node

Increase control with 10 additional outputs added to your bluePRINT® Central Controller via a single wire connection.

bluePRINT Link®

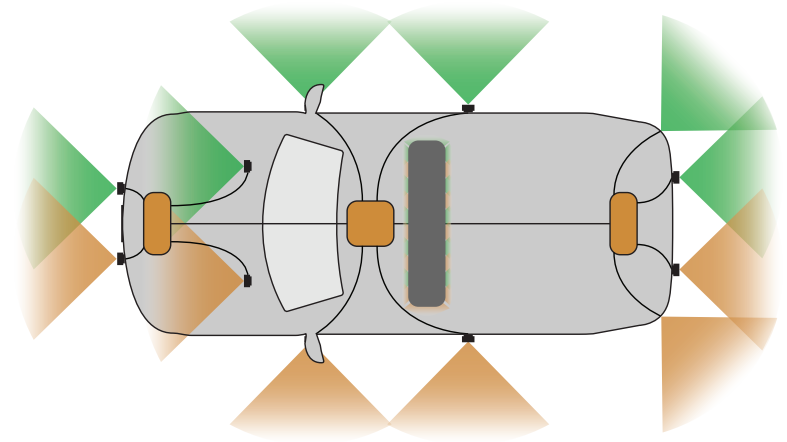

Access a wide range of vehicle data parameters enabling you to customize lighting responses with your bluePRINT® products.

BLUEPRINT® OVERVIEW

Decentralized Upfit

bluePRINT replaces many of these connections with a multiplexed data bus that allows minimal wiring and ultimate flexibility. The lighting and siren become programmable and automated.

Intelligent control system

Create situational-specific warning profiles

Networked, programmable, logic-driven and adaptable

Complete control of multi-color bluePRINT-compatible lights

Configurable to meet any fleet application or requirements

Offers a plug-n-play CANbus interface (bluePRINT LINK®)

Obtain real-time diagnostics from your vehicle

One-stop shop for creating all automatic logic control

Take total control of every output and input on your system

Configure all your bluePRINT Link® vehicle triggers

Power distribution capability for total control of accessories and load management

Quickly configure one or multiple lightbars, single or dual tone sirens, single or dual control panels — all through the SoundOff Central App

Snow plows, contractor trucks, utility vehicles, construction fleets and other heavy-duty equipment each create their own unique lighting needs

1

nROADS® Low Dome Beacon

Keep vehicles highly visible and work areas illuminated with 360-degrees of intense lighting coverage. This durable dome light has multiple mounting and color options to fit the needs of your environment.

2

nFORCE® Recess Mount

Reliable, effective lighting solution equipped with forward and off-angle illumination, as well as multiple color options and flash patterns.

3

Oval Warning Light

Communicate from all sides of your vehicle with 6" oval marker lights that create an intense pattern with no dark spots.

We deliver solutions that create improved working environments

1

nROADS® Mini Lightbar

Provide clear communication with this dual-color lightbar featuring easy programming and customized options such as takedown, stop/tail/turn and scene lighting.

2

mpower® Fascia 4"

Customize this dual-level lightbar to your needs with 360 degrees of continuous light, a durable hardcoated lens, built-in ambient light sensor and independent upper and lower module controls.

3

ACARI AT Series Mount

Designed for use with SoundOff Signal Mid & Mini Lightbars. By mixing Acari's innovative bracketry with SoundOff's leading LED lighting, we are able to offer a more effective and sustainable solution for all.

NOTES

About Us

SoundOff Signal is a global leader in vehicle lighting, controls systems and electronic warning solutions for the emergency, amber, government and off-road markets.

We are committed to a strategic focus on innovation, continuous improvement and quality, providing systems that work together seamlessly to improve vehicle visibility and communication.
