Rail

We offer our bridges stained with wood sealer to help prevent the effects of aging and splitting. Our weather resistant sealer gives the wood a golden honey appearance. We also offer painted bridges.

- Bridges feature smooth, sanded finish for weather resistance and durability.
- Bridges available with sealer or painted.
- Hand-crafted with selected cuts of #1 pressure-treated southern yellow pine.
- Harmless to pets and plants.
- Double kiln dried.
- Three styles of railing available for bridges.
- Japanese railing is 10" high.
- Standard bridge width is 32" inside and 47" outside.
- Narrow bridge width is 21" inside and 31" outside.
- Wider-than-standard bridges available in 1' increments.
- Laminated beam style is for bridges over 20'.
- Approximately 10% incline on bridge floor.
- Weight limit on regular and wide bridges is 1,000 lbs.
- Weight limit on narrow bridges is 500 lbs.
- Weight limit on bridge should not exceed 25 lb. per square foot.
- Custom bridges available built to your specifications.
- Bridge designs are subject to change without notice.

These sizes are standard. Custom sizes available.

| Bridge Length (Feet) | (A) Total Height of Bridge to top of Post (Inches) | (B) Clearance at Arch to top of Flooring (Inches) | (C) Clearance at Arch to Bottom of Flooring (Inches) |
|----------------------|----------------------------------------------------|---------------------------------------------------|------------------------------------------------------|
| 4                    | 42                                                 | 9                                                 | 2                                                    |
| 6                    | 46                                                 | 11                                                | 4                                                    |
