

Introducing our water system, designed to remove harmful nitrates and deliver fresh, pure water straight to your tap. Nitrates in drinking water can pose significant health risks, particularly for infants and pregnant women, as well as affect the taste and quality of your water.

Our advanced filtration technology effectively reduces nitrates and other contaminants, providing peace of mind with every sip.

Ideal for both homes, this whole home system easily attaches to any type of plumbing fixtures. Enjoy clean, refreshing water with the added benefit of knowing it's free from harmful impurities.

FEATURES

- Uses advanced metering technology, making the unit less expensive to operate
- Full digital controller with large LED display is in command through all stages of treatment, adjusting in response to changes in water usage
- Calendar override can be set regenerate on specific dates
- Components are constructed from materials that withstand corrosion and wear

SPECIFICATIONS

- **Tulsion®:** A-62MP
- **Type:** Strong Base
- **Matrix Structure:** Cross linked polystyrene
- **Functional group:** Quaternary Ammonium
- **Ionic form:** Chloride
- **Screen Size US Mesh:** 16-50
- **Particle Size mm (min. 95%):** 0.3-1.2
- **Stability Max Temp °F/°C:** 195/90
- **pH range:** 0-14
- **Total exchange capacity (meg/ml.min):** 1.0
- **Backwash Settled Density lbs/cft g/l:** 43-47
700-750
- **Reversible Swelling % Approx:** N/A
- **Reversible Swelling % Approx:** 52 ± 3
- **Features**
Premium grade resin for nitrate removal
- **Applications**
Selective removal of nitrate from industrial water and domestic drinking water.
- **Media Tank:** 10" x 54"
(25.5 cm x 137 cm)
- **Brine Tank:** 16" x 33"
(40.64 cm x 83.82 cm)
